Subject: Please Review: Riverside Public Meeting Post for August 5th

Hi Shereen,

Here's the post I drafted for the Riverside Public Meeting on August 5th. Please let me know if you have any edits. Thanks!

Riverside Industrial Park Virtual Public Meeting Tonight	Wednesday - August 5, 2020	**Twitter:** Tonight is our virtual public meeting on the proposed plan for the Riverside Industrial Park #Superfund site! Join us at 7:00pm to learn about our preferred alternatives for cleaning up contaminated soil, sewer water, waste and groundwater at the site. https://epa-riverside-proposed-plan.eventbrite.com **Facebook:** Tonight is our virtual public meeting on the proposed plan for the Riverside Industrial Park #Superfund site in Newark, New Jersey! Join us at 7:00pm to learn about the preferred alternatives we selected with @NewJerseyDEP for cleaning up contaminated soil, sewer water, waste and groundwater at the site. For the proposed plan and additional information about the site, please visit www.epa.gov/superfund/riverside-industrial The Riverside Industrial Park Superfund site is located on a 7.6-acre active industrial property on the banks of the Passaic River. Beginning in 1903, industrial operations that included the manufacturing of paint, varnish, linseed oil and resins started. After 1971, the site was subdivided into	

		15 lots, some of which have ongoing business operations. The sources of soil and groundwater contamination include historic site operations, accidental spills, illegal dumping, improper handling of raw materials and/or improper waste disposal. In 2009, at the request of NJDEP, EPA responded to an oil spill into the Passaic River that was eventually traced to two basement storage tanks in a vacant building on the site. EPA immediately took action to prevent further release of hazardous chemicals into the river by plugging a discharge pipe and addressing the tanks that were the source of the release at the Riverside Industrial Park site. Today, we are proposing the best methods to maintain the protection of public health over time.

Thank you, Shereen!! I'll post the flyer in English on our Twitter and Facebook pages the day of the public meeting and ask Lina Younes, who manages our Spanish Twitter pages (@EPAespanol), to post the Spanish flyer that day as well.

Please continue to share these flyers with the Social Media Team.

Subject: Riverside public meeting flyer for FB?

Hey social media team –

I know approvals need to happen, but if possible, and if you deem appropriate, attached is a flyer (in English and Spanish) promoting the Riverside public meeting. Can we post to Facebook? City of Newark requested this so they could share it on their page. If we can't, I understand.

Thanks,
Shereen
