**Subject:** Polluted Well Water

Dear Mr. Peterson:
This is a complaint letter regarding how myself and many, many other people of North Carolina are being treated by Duke Energy Company. I Have 2 letters from the North Carolina Department of Health telling me that I can NOT DRINK OR COOK WITH MY WELL WATER!!!!!!!!!!!! Duke Energy is supplying myself along with many other with bottle water all while telling us that the chemicals in our wells are 'NATURALLY OCCURING' One of the chemicals in my well water that worries me this most is Arsenic. I have a 22 year old daughter who has been sick now for 6 years and during the time she was in the last part of her Junior and her Senior years in High School she had constant [redacted] Once I found out that there is Arsenic in my well water and knowing what I know about Arsenic I put my daughter on Bottle Water and the [redacted]. She is still sick with many other health problems but at least those 2 cleared up. NO AMOUNT OF ARSENIC is safe, people use it as a poison. Arsenic slowly builds up in a human's body and [redacted] Think of what this arsenic is doing to people who live in a house with well water that has Arsenic in it and drink it over many years. Such as a child being born to a family then growing up drinking, etc with the Arsenic Polluted Well Water. So PLEASE DO AN INVESTIGATION INTO THIS and INTO HOW DUKE ENERGY IS DOING THEIR BEST TO BUY THEIR WAY OUT OF TAKING CARE OF THE MANY PEOPLE THEIR COAL ASH PONDS HAVE MADE SICK OVER THE YEARS WHILE THEY HAVE BEEN MANKING HUGH PROFITS. THANKING YOU VERY MUCH IN ADVANCE!

VERY SINCERELY YOURS,

[redacted]
