Thanks, he was the main person that wasn't sure about the process and since it's a bit all over, especially depending on the site I told him I would follow up. Libby

Thanks, Chris. I just spoke with Robert as well. Covered what you and I do from here in terms of press and congs and told him we'd be coordinating closely with him on Tuesday am.

I have no info on status or plans Bonita Peak PR, but expect Andrew may have current info?

For the Bonita Peak site, I have an email list of all the congressional staff that will be notified. I just use whatever approved language and bcc to all. I am guessing in the case of the Bonita Peak site i will just use what the press release states and send it off as well as coordinate with Cynthia to inform local government entities. She has a local stakeholder list we can pull from.

Same thing with CFAC, I will send approved language to MT congressional staff and work with Robert to see if he wants to send to local government officials as he would know who those are or have me do it. Both of these notifications would be done before a press release. Let me know if you have further questions. Thanks

Hi Rich and Chris,

There was some confusion during our staff meeting today regarding who would be doing what for the upcoming NPL listing of Bonita Peak and CFAC. Typically we've handled the local media, local officials and congressional notifications (which is just the local staffers) and just cc'd Sandy/Rebecca in the past.

Chris, for the congressional notices are you planning on sending out information to all the representatives? Would this also include State and local officials?

Rich, are you mainly forwarding out the national news release through Vocus and/or are you doing a Regional release as well? Will local media be included in the distribution?

Trying not to duplicate efforts and clear up some confusion. Robert in the Montana office is happy to do it all for CFAC but was unclear on the process. I historically know how it's been done but the world is upside down now☺ Bonita Peak I'm guessing is a whole different story.

Let me know. Thanks, Libby
