Subject: Dewey-Burdock uranium in-situ recovery site near Edgemont, SD

Gay,
I hope this email finds you well and in good spirits. Per our phone conversation, thank you for your assistance in securing that this important topic get on the next Great Plains Tribal Chairmen's Association in Bismarck, ND, September 11-12, 2015.

The EPA would like to meet Tribes who have an historic interest in the Black Hills, in addition--a meeting with the Tribal Historic Preservation Officers and Environmental Directors of interested Tribes will be scheduled during the same timeframes.

Meetings will be informal "inform and educate" meetings with the goal of leading up to formal government-to-government consultation.

The purpose of the meetings and draft agenda:

- Explain EPA's role at the proposed Dewey-Burdock uranium in-situ recovery site near Edgemont, SD.
  - UIC regulatory mission to protect groundwater and scope of applicable regulations.
  - UIC permitting process, including the public participation process.
  - Ways in which Tribes can engage in the public participation process.
- Provide information about EPA's general Tribal Consultation Policy.
- Discuss EPA's options for consultation under Section 106 of the National Historic Preservation Act.
- Get feedback on the interest of each Tribe to engage with EPA in formal government to government consultation.
- Engage in a listening session so Tribal representatives can express concerns and ask questions. (We will not necessarily be able to answer the questions there, but the questions will help us with future communications and decision-making.)

Once the details are in place, the EPA will mail letters to Tribal leaders about the upcoming meetings. At least one conference call with interested Tribes to plan the final agenda for the above meeting to make sure topics of interest will be included.

Should you have any questions, or need additional information please feel free to email or call me.
