I am sending this email to all environmental directors and Tribal Historic Preservation Officers and/or cultural resources staff who received the emailed letters inviting the Tribe to consult with the EPA Region 8 Underground Injection Control Program on the two UIC permitting actions at the Dewey Burdock uranium in-situ recovery site near Edgemont, South Dakota.

Please find attached the web link to the sound files and slide presentations for the UIC presentation I gave during the web conference June 10, 2013. There are also sound files and slide presentation for two previous web conference conducted for the Tribes who requested that EPA present information about the Cheyenne River Water Quality and radiation sources and risks at uranium ISR sites. These two topics include information that does not directly pertain to the UIC program permitting actions, so they were presented before the initiation of the EPA Region 8 UIC Program NHPA 106 consultation process.
