Sure! Part 146.3 has these definitions for *Confining bed* and *Confining zone*.

Confining bed means a body of impermeable or distinctly less permeable material stratigraphically adjacent to one or more aquifers.
Confining zone means a geological formation, group of formations, or part of a formation that is capable of limiting fluid movement above an injection zone.

The confining interval would be equivalent to the confining zone. In practical application that would be a geologic formation containing shale.

Thanks

I am unfamiliar with the term 'confining intervals'.

Can you advise?

Thanks

Here is the link to the UIC permit application:
https://www.epa.gov/sites/production/files/2015-10/documents/7520-6_0_508c.pdf

I have attached the UIC regs that I have downloaded into Word for my personal use.
They are 40 CFR 144 and 40 CFR 146.
The permitting requirements are found in 144 subpart D.
The regs covering the public participation process are found at 40 CFR Part 124.

Ok

We can certainly start that way.

Would you please send me the forms or citation to the forms and rules if they are available on the web for an application for a Class V permit in your region?

Thanks

Hello Mr. Ganje,
Would you mind emailing me your questions, please? Then I can either set up a call with the right people to provide the answers, or email the answers.
Thanks!
Valois

Hello

I have a couple of questions. Would you be kind enough to call my cell at your earliest convenience tomorrow?

Thanks
