Subject: FW: Odor from paper mill

Hi Reggie,

It doesn't sound like she's looking for a response, but I thought you might want to forward to someone in the air program anyway.

Thank you!
Laurie

Subject: Odor from paper mill

Good Morning Laurie,
I live in Lancaster County, SC (Fort Mill specifically). Since moving in 12/30/20, the community has noticed an increase in a sickening odor coming from a nearby paper mill. Many of the surrounding communities, including mine, have escalated to our political leadership and local health department. However, nothing has been done - people are waking up in the middle of the night with headaches, becoming nauseous when going outside and what's worse, the house lingers with the smell for days. I am sure that you, nor any of our leadership would want to live in a home that smells like a sewage plant.

I am reaching out to plead with the EPA to look deeper into this issue as we are not gaining any traction here. It's very discerning to wake up nauseous every single day.

Thank you,
