Hi Mark,

We got pinged by ORD for an update on our dietary indicator. Do you have an update on when we could get estimates of lbs of OPs and NMCs? I figured it would be easier if we sent you what Don provided the team back in 2017. The attached email also includes the Excel files with the format we are hoping to get. In my previous email, I indicated that we needed lbs by chemical and year. However, based on the attached file, we would also need commodity. We are hoping to get at least up to 2017 for the usage data, but if you have 2018, we'll take that too. Let me know if you need more information. Thanks again for your help.

Phil

Hi Mark,

Thanks for taking the time to discuss the report on the environment (ROE) indicator we are attempting to update. The graphs of the toxicity-adjusted pounds applied for the NMCs and OPs are on the 2nd from the last page. These were last updated in 2015, so it would be great if you could get us updated estimates by the end of May of lbs applied of OPs and NMCs by chemical (so that we can tox adjust them and then sum them together) and by year. I don't think the original version had a reference to the Sales and Usage report (p. 9), but I added that in there to give the ROE folks some kind of reference. Let me know if you have any questions or need more details.

Phil

Phil et al,

Thanks again for meeting on this earlier! The attached document contains a few edits and some detailed comments. Please review and mark it up....also, my comments are for internal discussion - feel free to delete before sending back to ORD. Several issues in particular:

- PDP 2016-2017 – We are working on it, and hope to include that after peer review (Contact BEAD for updated Pesticide usage data)
-
- **Ex. 5 Deliberative Process (DP)**

Hi, folks-
I've attached the revised draft final file for the Dietary pesticide exposures indicator Technical Documentation. ERG had a few remaining questions you'll see in the comment boxes but no show-stoppers of any kind.
Please let us know how the indicator development is going and whether we can help in any way. We look forward to receiving the draft materials.
Everyone have a great weekend!

Cheers,

Pat
