On further reflection it seems that this well would be too far to the southwest to be an Elwood's well. Can the City provide a map showing where this well is located and where the construction will take place so I can make sure that this is not an Elwood's well?

Thank you for your consideration,

Jim

My best guess is that this is a groundwater monitoring well for the Former Elwood's Cleaners dry cleaners site. The City of Modesto has been investigating this former dry cleaners. Please let me know if this well can be preserved. If not, I will contact the City's consultant to let him know it needs to be abandoned appropriately.

The State will be building a new court house in this block.

The well is located in the middle of the block, on the 10th street side of the abandoned alley
A picture of the lid is attached

Let me know if you know who this well belongs too.
thanks

Dan England
City of Modesto

Tu, Jennifer, James and Jim,

Dan England from the City of Modesto informed me this morning that the city is going to construct a new City Hall building in Modesto between G and H Streets and 9th and 10th Streets. I have reviewed the map for the Halfords Plume as well as the figure I have showing the Elwoods Plume and I do not see any impact on our wells but wanted to inform and check with you.

Dan, there is a well referred to as 04 (see attached figure) that is on 10th Street between G and H. According to my records this is a City of Modesto drinking water supply well and is not ours.

Based on my review the city will have no impact on our wells - please let me know if you have different information and do not agree. Thank you.
