Thanks Roger! I was hoping to receive the most recent version so the January 2018 version would be great. Do you have it electronically?

Best wishes,
Heather

Hi Heather,

I could not locate the 2014 document that was referenced in the Order. I believe it may have been archived. I do have the updated "Quality Assurance Project Plan For PFOA Drinking-Water Sampling Program" submitted by Chemours and dated January 2018. This document pertains to the sampling and analytical procedures currently used for samples taken around the Washington Works facility. Hope all's well with you. Happy holidays!

Roger

Abby at MDEQ was looking for it. No deadline but I was hoping to close the loop within the next day if it was readily available.

Roger – do you have it handy/electronically?

Best wishes,
Heather

Hi Heather,

I believe I (and I am guessing Roger, too) was mailed a hard copy of this because during the negotiations I asked if we could see it. There is a small chance I am thinking of another document, but I am pretty sure this is the document I am remembering.

When do you need it? It is at my desk on 15.

Thank you,
Jenny

Hi Roger and Jenny,

Do either of you have a copy of the following document cited in our 2017 amended AOC with DuPont/Chemours?
Revised PFOA Quality Assurance Project Plan for the DuPont Corporate Remediation Group (URS, 2014)

Excerpt from the 2017 Amended Order -

> water sample. Water samples collected as part of post installation monitoring will be analyzed for PFOA. The water samples will be collected as described in the Revised Perfluorooctanoic Acid Quality Assurance Project Plan for the DuPont Corporate Remediation Group (URS, 2014), which is currently being updated. When the analytical results from the lead carbon bed or "Bed 1" water sample indicate that

Let me know if I should check in with someone else – maybe Andrew Hartten?
THANKS!
Best wishes,
Heather
