Matt and Jenny. I also learned from Andrew Hartten that HFPO-DA (GenX) was first used at Washington Works around 2011, first in pilot-scale testing. GenX totally replaced PFOA in the Teflon line in 2013. Slide 4 needs to be revised to reflect this.

Subject: Some More Edits to the RARE Grant Slides

Hi Matt and Roger,

Matt, thank you for making edits to the slides. I greatly appreciate it. However, I fixed two more things on the attached slides:

1) Grammar on slide 5, so it now says, "How long will it take for GenX"
2) Spelling of tumorogenesis on slide 2. I looked up the word and I think that is correct even though the dictionary doesn't seem to like it.

Also, sorry I didn't do this last night. I spent almost the entire day working on briefing papers for the Administrator.

Finally, please let me know if you suggest any changes after you present. If you do, I will make them and e-mail them to Carole before I present.

Have a good weekend,
Jenny
