Pat & Yogesh,

For our upcoming call next week, EPA wanted to let you review the letter that we sent to Chemours on November 8, 2017 and their subsequent response. The letter followed an in-person meeting that EPA had with Chemours in September in which we asked Chemours to address additional streets in their New Geographic Areas or "step-out areas". Thus far, Chemours and their contractor, AECOM, have been working to address those residents in the identified areas and to make sure they've been sampled and provided treatment or have been connected to public water (if they've exceeded the HA). Please let us know if you have further questions.

Best Regards,

Kevin Rowsey
