Good Afternoon,

Attached please find the non-response decline other spreadsheet which contains a list of folks identified based on previous Consent Order programs as non-response or decline and provides the status of contacts and attempts to contact that were made by AECOM on behalf of Chemours. As required in Paragraph 42 d) and related to the first bullet listed below, AECOM, on behalf of Chemours, has contacted or attempted to contact all the residents included in the spreadsheet within 30 days of the effective date of the 2009 Consent Order as Amended. During the update meeting on January 25, 2017, Andrew discussed the status of the Craft residence with you and the fact that this was an unsafe situation in 2012. In addition, Andrew explained that nothing has changed in the appearance of this property since that time and that Ali Pearce believes it is still an unsafe situation at this time. As such, AECOM has not attempted to recontact this residence. Thank you.

Kathy

Subject: First Amendment to the Order on Consent - Requirements Met

Good Afternoon Everyone,

On January 10, 2017, I forwarded Roger, Jenny and Kevin a copy of the master spreadsheet that includes all ongoing sampling and resampling programs that Chemours voluntarily began around June 2016 while negotiating the language for the First Amendment to the Order on Consent. On January 11, 2017, Andrew Hartten hosted a webex meeting attended by Roger Reinhart, Jenny Wilson, Jim Bennett and me. During this meeting, I provided an overview of the status of the various programs included in the spreadsheet. During the discussion, and with submission of the spreadsheet, the following requirements as identified in the First Amendment to the Order on Consent (effective date January 5, 2017) were met:

- Per paragraph 42 d) - Within 14 days of the effective date, provide EPA a list of all public or private water systems that previously declined or did not respond to offers of temporary or permanent alternate drinking water drinking water supplies. This list is provided in the NRDO Pre HA tab in the spreadsheet. This information has been shared and discussed with EPA several times previously and the updated status was summarized and discussed.

- The NRD Post HA tab in the spreadsheet contains a list of residents that have been identified as non-response or decline since approximately June 2016 when the new sampling and resampling program began. EPA agreed that these newly identified non-response or decline residents do not need to be recontacted within 30 days as required by Paragraph 42 d) because these residents had just recently been identified and contacted. All on this list will be contacted in January 2018 as required in paragraph 42d) to meet the requirement of checking with residents on an annual basis.

Please let me know if you have any questions. Thank you.

Kathy
