Regina looked into the status of the expected journal article coming from the 2016 PFOA/GenX sampling done in the WV/OH area around the Chemours' Washington Works plant. Still not submitted for publication, but may be submitted soon.

Rick,

I think I tracked down the right publication this time. Let me know if this is what you were talking about. It is nearing publication. I asked Andy to keep us in the loop and perhaps do a webinar for us if you are interested. Let me know.

Regina,

Thanks for contacting us on this issue.

You are probably referring to a draft paper that we are working on that summarizes the discovery of GenX in surface water around the Parkersburg, WV Chemours plant. This was first presented at a conference at Northeastern University in June of 2017 (attached above).

We're still working on this publication and hope to be able to submit it soon.

Please give me a call if you'd like to talk about any aspect of this study Ex. 6 Personal Privacy (PP)

Thank you,

Andy

Subject: Request from Region 3 Regional Science Liaison

Hi Andrew and Mark,

I am the RSL in Region 3. I have a request from one of my DW managers to track down a report or publication on research done in the Ohio River (I think it near West Virginia and may have to do with the Chemours plant there) that was similar to the work you both did on the Cape Fear River. He did not have a lot of information to go on but he mentioned the work was discussed as coming out in Aug/Sept of last year but then it got put off until February of this year. I know this is not a lot to go on but I was hoping you could me track the research and if it has been published. Thanks for any help you can provide.
