Soaps - no longer go to sewer
~~go~~ are pumped now
before sewer
straight to

TANK 400 -

Nitric acid
Only no dye

Methylene Chloride
Formic acid
Phenol Cresol
all tank 401 hot

2PPM = 10 cation

Deburring Machine Soap
use
& "VF-77 Biodegradeable
Cleaner Compound
surfactants, wetting agents,
water & cleaning aides
soap goes to sewer

Deburring for steel
Compound DPM 52049

BOE-C6-0119596

Industrial
Hygiene
34233
Beckley

Bldg 20 ⇒ wash Rack uses ~~Steam~~ - grease

Steam Cleaner is pollinoum Hydroxide solution

Chrome plating 2FF11 ← location

has chromic acid
Sulfuric acid
Hydrochloric acid
water & Electro Cleaner

Sodium Hydroxide

non skid use blasloff (1415)

Sulfur dioxide & polymers

in ↓

Process Tanks pumped

Chrome destructs sup + solids are taken to land fill

consists of mostly chrome ~~solid~~ water goes direct

- Records to Bill Barnack
about chem mill.

- Acid used
in chrome destruction area
Sulfuric acid
5% Caustic (Sodium Hyd)
by wt.
Sulfur dioxide
polymer solution (Bill Engel) contact

Cooling Tower - Bill Engel could give list of all chemicals used — 38284

No handouts here

all sluff goes to sewer

Line Sludge -
