I think we're good with what's been posted. If we get inquiries about the "February 2018" reference at the top of the report, we can explain this is the month that Chemours did the sampling (as evidenced by the sampling dates on the chart). However, the results were shared with us in March. I think we're good. Thanks for checking, Rick.

Ok, we did get some preliminary results on March 2nd sand March 8th. We received the validated results in a report on March 20th. Your statement is correct, Joan.

That's fine. Just know the title in the document will be inconsistent with the web and the desk statement.

Rick – is it?
If not, Christina – can you do it there? Is that too much work?
I just don't know who is in today in the regional office who can do it.

Christina, can you post the attached PDF under the Washington Works bullet on:
https://www.epa.gov/pfas/site-specific-information

Let's call the PDF: Chemours Company well sampling results (March 2018)

Does that work for folks?

If so, Christina, let us know once it's up.

Andrea,
Please see attached table for GenX (HFPO-DA) sampling results for the 14 public and private water supplies in West Virginia and Ohio.
Is it possible to get it posted onto the website soon?
If so, we may still be able to make the notifications today – please advise.

Thank you!
