Subject: RE: Ahlstrom- Thilmany Mill

Thank you. I will check with the supervisor and Gail, but I am thinking we will want a discussion. The way I understand this source, we know they cannot meet the standard and while they are working on it, they are conducting SO2 monitoring as past of a compliance plan.

I will check schedules here and send an invite.

Subject: Ahlstrom- Thilmany Mill

Hi Maria,

We have drafted an NOV for the Ahlstrom - Thilmany Mill based on the information we received through the Information Requests we have sent. The case team has been looking at the SO2 data from the boilers and has determined violations of the permit limits which were set to ensure the facility is complying with the NAAQS. Before we send out the NOV, we wanted to see if WDNR wants to discuss and understand the violations further. We are aware of the NAAQS SO2 issues occuring around the facility.

I will off next week and the second half of the following week. If you want to have a discussion on the NOV, we can set something up for Aug. 24 or 25 or the week after that.

Thanks!!
