Subject: Ecology Meeting with CPMA & trade associations

Hi Jaime –

I'm helping to coordinate the upcoming Ecology meeting with the Color Pigment Mfg. Association. They are meeting with Polly Zehm, Deputy Director, and staff on Thursday afternoon from 2:15 – 3:00 p.m.

Dave Wawer, Executive Director of the CPMA, is coordinating introductory meetings to help build collaborative partnerships between government and industry.

Dave is planning to introduce representatives from several national trade associations that work in the colorants supply chain. These organizations are interested in serving as strategic industry resources for future collaboration and communication related to inadvertent PCBs in products. The colorants supply chain coalition includes color pigments, printing inks, paints & coatings and plastics.

The following are expected to attend:

- George Fuchs-Technical Director, National Association of Printing Ink Manufacturers
- Marie Gargas – Regulatory Director, PLASTICS
- David Darling, Vice President Regulatory Affairs, American Coatings Association
- David Wawer – Executive Director, Color Pigments Manufacturers Association NA
- Harold Fitzpatrick – CPMA; Fitzpatrick & Merritt
- Dr. Robert Mott - Global Regulatory & Compliance Manager, Sun Chemical Corporation
- Dr. Mark Vincent – President, DCC-Lansco
- Dr. Ramesh Kumar - Senior Technical Sales Manager NA, Clariant Corporation

Ecology has been actively working on efforts to reduce PCBs in products for several years, including work with the Spokane River Regional Toxics Task Force, supporting DES implementation of RCW 39.26.280 related the procurement of PCB free products and packaging and educational presentations and workshops.
