Subject: Monday meeting

Hi Mark,
Could you take the lead on putting together an update on ongoing/planned PFAS activities in NC that are being led by EPA ORD and R4?
Water
Air
Any other media (biosolids, fish, ...?)
Both Chemours and non-Chemours related
On Monday morning, there is a 45-minute time slot for such an update - presentation and Q&A.
I can chat tomorrow - still in Boston today.
Best,
Detlef
