Subject: Re: AllenCo Symptom Reports

Hello all,

We can stand down. I spoke with Chris McCullough at DOGGR and below is the report out:

- AllenCo was completing hydro pressure testing in the pipes and a small amount of oil residue mixed mostly with water back flushed during depressurization creating the odor
- This may have happened earlier this week
- The clean up of water and oil residue was completed today as well as the area was steam pressure washed
- Chris was out at the site, today, with the AQMD to be sure things were in order
- Chris admonished AllenCo for not following a better procedure of having vacuum capability to immediately clean up the issue
- It was also, reported that a neighboring sprinkler has been broken and has flooded part of the AllenCo location with approximately 50 barrels of water. That too has been cleaned up.
- Chris spoke with Nancy Ibrahim today and explained what had happened and he reported that she was not that happy about the situtation. Chris mentioned to her that he admonished the AllenCo folks about handling things more properly.

----------Message End----------

Thank you.

Subject: AllenCo Symptom Reports

Hi all,

Nancy with La Esperanza contacted Mandi to report odors and symptoms associated with activities at the AllenCo property. She said AQMD has sent 3 inspectors out and she also suspects DOGGR may be doing work onsite.

Matt is contacting AQMD and DOGGR to see what information they can offer, and based on what he finds, will advise on next steps.

Katie
