-001 Tip or Complaint: My dog had to undergo emergency surgery in January 2021 because her condition worsened overnight: She had suddenly developed a huge lump that started to bleed, had a foul smell and was infected by the minute. After surgery, she was diagnosed with a soft tissue sarcoma grade 2 in January 2021. A second surgery is scheduled for late March 2021. She had been wearing a Seresto collar for over a year. The site of the lump is extremely close to the collar. After reviewing the product's package, I found a toxicity warning on its side, and I immediately proceeded to remove the collar from my dog. The package states that the collar is toxic to humans. How can a product be known to be toxic to humans be simultaneously safe for pets and be available for sell???!!! Please

contact me should you need photos, vet reports or my own testimony. I want to know the specific steps I have to take to ensure that Bayer receives my complaint and that a fair resolution is sought.

Violation Still Occurring? Yes

State DEP/DEQ/DEM Notified? No
