Dear Mr. Veneroso;

Your letter dated April 11, 1977 file C1-726-92 addressed to PPG Industries eventually found its way to me for reply.

Our antifreeze is ethylene glycol with inhibitors and is <u>not</u> regulated by the DOT; the flash point is 250° F.

We are in the process of reissuing a MSDS on antifreeze and will forward a copy to you when available.

Very truly yours,

R. J. Gardner
