Hello Daniel,

Your quick background information is accurate. I attached a map of the sampling area and the POLREP, as FYI. **Ex. 5 Deliberative Process (DP)**

Ex. 5 Deliberative Process (DP)

Let me know if you have any additional questions.

Eduardo

Hi Daniel -

Thanks for the thorough summary. I did help out on the site. However, Eduardo Rovira (copied) was the lead OSC. However, I'll follow up with Eduardo and we'll get back to you this week.

Kelley

>
> Additionally, there are residents with private wells. EPA sampled close to 50 private wells, based on who responded to EPA about sampling their wells. There were private wells which exceeded the HAL, and they were given filtration systems. There are still a number of private wells which were not sampled for due to unavailability/unresponsiveness of the resident.

As I am preparing for the public meeting, I am trying to predict possible questions/concerns. I believe a concern will be:

1. Residents will want to have their wells resampled.
2. There are residents who never had their wells sampled.

I wanted to reach out to you to prepare for this concern. I think it would be a fair concern and would like to be able to address this if it comes up. From a removal standpoint, would we be able to have sampling of wells (particularly wells that have never been sampled) concurrently with our Remedial Investigation?

Thanks!

Daniel Taylor
