Subject: RE: SPI meeting next tuesday (6th) at 2:30
Attachments: Draft SPI GHG BACT Additional Info Needed-ea_notes.docx; SPI-Anderson_GHG_BACT_analysis-revised-final.pdf

Gerardo/Shaheerah – Attached is the updated BACT analysis for Greenhouse Gases for the Anderson PSD permit. We have updated the analysis to include the items discussed. One item not discussed that we have intentionally left out of the analysis is an update on the court deferral of the Tailoring Rule as well as the fairly recent vacatur by the court on the same deferral. While the mandate for the most recent court action has not been finalized, we have the left the BACT analysis wording to reflect the Tailoring Rule with the anticipating it will soon be in-effect for biomass.

At this time, we are proceeding voluntarily to include GHG emissions, including GHG BACT for biogenic sources in the PSD permit and understand this to be a discussion point tomorrow.

Also attached is a brief red-line response to the specific items in the prior note. I'll bring a few hard-copies of the BACT analysis tomorrow. See you at 2:30.

Thanks Dave.

Based on our discussion today, here is the draft agenda:

1. Introductions
2. Discuss voluntary inclusion of GHGs in the PSD permit
3. Power Contract
4. Re-notice of Permit
5. Timelines

I've also attached for our discussion on Tuesday the items Shaheerah has shared with you regarding additional data needs for item number 2 in the agenda.

Gerardo –

For the meeting next week, we'll have myself, George Emmerson (Owner), and William Sloan (Morrison & Forster – counsel) for the meeting. There's a potential we may bring David Branchcomb, our PGE contracts person. I'll also have Eric Albright of Environ on standby via phone is we need to dial him in… at this point and thinking not and may have a separate call with just him and technical staff if need be.

Will see you at 2:30 at your offices.
