Hi Susan,
I'm the only one that had a chance to review the slides today. Allan and I are off tomorrow. I don't think there are any big issues, mostly clarifying edits and some suggestions.

As the District moves forward with using the NSR Reform calculation of a baseline actual emissions to projected actual emissions test, you may want to consider giving it a different name in your slides, or being more vague in case the District wants to revise the test in more stringent ways, like how projected emissions are calculated, how could have accommodated is determined, etc. The slides mentions that you want to ensure it is enforceable, which made me think you may want to tweak it.

Laura

Subject: Draft Slides for Reg XIII WGM

Hi Laura,
Attached are the revised slides. I put a blue start to indicate the slides that changed. Hopefully you will have some time to take a look. We appreciate your thought regarding the "true federal applicability test" with the major source thresholds. We did not include here, but when we get to the details of the second tier test, that is where we will discuss it. Thanks for helping us out – appreciate the creative thinking.
Susan
