Hi Laura,
Back in 1995, actual RECLAIM emissions were 73 tpd and in 2019 they are 18.1 tpd. RECLAIM allocations were 100 tpd and are 22.6 in 2019. The 2015 shave will lower allocations to 14.5 tpd by 2022.

Let me know if you have further questions or need more details.

Regards,
Mike

Subject: [EXTERNAL]quick question

Hi Mike,
I am working on a briefing paper. Could you tell me with the 2015 shave, how many tpd of NOx the RECLAIM program has achieved over the life of the program? I thought I heard that number somewhere, I think with industry comments, but I couldn't find it quickly. Do you happen to know?

Thanks,
Laura
