Not really, it's an IAG and we have much less control. Same relationship as we have with ORNL. Besides the computer difficulties, they lost time working on shutting down work at one of our sites. They have also had more LOE on this effort than I am paying them.

Aren't they our "contractor". Can we talk to the PO?

ACE is having some trouble finishing up. It looks like Wayne is working to reschedule our call for next Thursday.

Wayne and I have a call with them on Thursday afternoon. My ORNL IAG folks were also helping on some questions Wayne had on trying to recreate some 2006 RG numbers.

Hi Stuart –

Hope you and yours are doing well.

Were you able to touch base with USACE?

Thanks

We are supposed to have a call with them today. Heard from 2/3 ACE, their computer problems sound worse than EPA's. First ACE risk assessor thinks it will delay him a week.

Hi Stuart –

Have you spoken to the Corps? Are they still on schedule to make this happen by early April?

It's a paperwork exercise so there shouldn't be too long of a delay if any.

Thanks

Mary,

Just reaching out to determine when we want to schedule our follow-on discussion/meeting. At our meeting we were tentatively looking at the end of March possible very early April. Appreciate trying to get this on the calendar soon.

Thanks
deb

Subject: EPA consultation process on the use of RESRAD BUILD

Mary,
Thank you for allowing the Navy to participate in your meeting with OSD regarding the PRG calculator/RESRAD consultation process. My interest was in learning how the consultation process works as we have had difficulty gaining EPA concurrence unless the PRG calculator is used. Although I was encouraged to hear the consultation process usually takes from a few days to a week, I was surprised to learn the consultation had not begun for buildings at either the Former Hunters Point Shipyard (HPS) or the Former Concord Naval Weapons Station. Per an action item at the meeting, the attached emails are the information provided to EPA to initiate the HPS consultation process. If further discussion is needed please let me know.
Regards
Lawrence
