Frank, Bill, Kat, Josie, and Lynette –
I'm so happy to see this webinar topic! Fun to see my Skeo, EPA, and TPL worlds merging. I'll miss the webinar due to a teaching obligation (The topic? Conservation!)... I will spread the word and likely beg you for a recording.
Wishing you all a happy new year.
All best,
Walker

Subject: EPA Superfund Redevelopment Webinar - The Brilliant & Profitable Role of Conservation Easements in Superfund Site Redevelopment

Good morning,

EPA's Superfund Redevelopment will be hosting a webinar entitled, The Brilliant & Profitable Role of Conservation Easements in Superfund Site Redevelopment, on Tuesday, January 28th, 2020; 1:00-3:00 PM EST.

You are receiving this email because you participated in one of Superfund Redevelopment's reuse planning Regional Seeds with Skeo Solutions or because you have requested to receive webinar announcements, and Superfund Redevelopment wanted to invite you to participate in this free webinar. Attached please find a flyer with more information about the webinar, including how to register.

Lucrative projects, public benefit and happy communities - land conservation easements can play a brilliant and profitable role in the redevelopment of Superfund sites and brownfield properties. Part of Superfund Redevelopment's roundtable webinar series, this training will focus on opportunities, benefits, strategies, liability protections and risk management for partnerships between developers, local and state governments, and land trusts. This interactive session will include robust Q&A as well as an opportunity for participants to share their perspectives on how to encourage more and faster Superfund site redevelopment across the country. Presenters will answer questions about available resources and support, share best practices and update participants on the latest tools and guidance.

This webinar is free of charge and open to the public. Please feel free to share the flyer with others that may be interested in attending!

If I can provide any further information, please do not hesitate to be in touch.

Thanks,
Josie Torres
