Sania,

I don't recall if I got to this. I need to send this on to Kate Sullivan and am unsure if the final legacy Excel file is in my posesion.

Can you shed some light.

Mark

Sania,

I think I corrected all of the findings you pointed out. Here is the new spreadsheet. I will come by asap to be sure.

Mark

See email below from Clark Freise. They are looking for lab results. Andy, I think the data are in your court. Can you make your data review a priority so that we can get this into Sania's hands?

Thanks.

Tim

Subject: ORD assistance

Tim,

When we met in Cincinnati you said you would be pushing to get us results faster from the work we are doing collaboratively with ORD. I appreciate everything that our teams are working on and realize that the "ask" is huge given the large number of samples across multiple media. I wanted to provide you with our priority list so that the "ask" might hopefully be more manageable. Obviously we would love to have all of the results ASAP, but the priority would

be Samples 700 – 720, 800 – 820, 721 – 736 since these support our current efforts to evaluate a pilot air treatment plant that Saint-Gobain is looking at adding to their facility. It is very similar to the system installed in Taconic, so the results could help inform that site also. Since these are not the first in I thought I would break them out of the pack.

Thank you again for the partnership and support,
Clark
