Subject: CES Mendota - Follow up on Comments on Class VI application
Attachments: Potential Carbon Sequestration projects in R9 (11-18-20).xlsx

Hi John and Vincent,
At our last UIC meeting, EPA agreed to provide a table of potential carbon sequestration projects and to update the table for each meeting. Attached is an updated table of projects we are aware of; we've had at least a preliminary discussion with each of these project proponents.

Also, thanks again for the input you all provided on the proposed CES-Mendota project and our discussion last month. I recognize we did not get through all the state's input, so I'd like to schedule a follow-up discussion. I am thinking the week after Thanksgiving would probably work best at this point, so please let me know if Dec 2nd or 4th would work on your end and we can get a meeting on the calendar.

Thanks,
David
