Attachments: Pratt PAH Mixtures_SOT 2016 Abstract 6 Oct clean.docx

A little more modification as Andrew took "particular" offense at too many data (forgive me, I can't help but pun...). The character count is still good. A clean copy is attached.

I understand this still needs IO clearance, is that correct, Gina?

Thanks!
Margaret

Good morning,

This abstract is much improved and I have only a couple of minor suggestions.

Please consider the comments and then send the revised draft to Gina and cc me.

Thanks!

Andrew

Importance: High

Dear all,

More changes made. Please review the attachment and provide comments. Character count is 2293 out of 2300 allowed. Reminder that submission deadline is Wednesday evening (Oct 7).

Thanks!
Margaret

It's getting closer, made some tiny edits, but I can't stay to make any real edits. I've attached a version with comments—I think there are a couple of opportunities to reduce overlapping material.

Thanks, Karen! We keep bumping up against that character count. Your version was 211 over. This version gets us to 94 over. Your thoughts?

Here's another version with a couple of tweaks (all previous edits accepted, just to help see the new ones).

The more I looked at it, the more I could see where Gina was coming from. Unless I'm completely misunderstanding, I think this addresses Gina's questions while mostly saying the same things. But probably best to run it by Lynn again when you're ready, just in case I've made it drift from where she thought it was going. I had a chance to discuss it briefly with her, Ex. 5 Deliberative Process (DP) Ex. 5 Deliberative Process (DP) At any rate, see what you think.

Hi Margaret,

Attached is your SOT abstract with a number of comments from Gina. Please do your best to address them and then send me an revised version (hopefully this afternoon). Also, we can talk after your 1-2 iAs meeting.

Thanks Margaret.

Best regards,

Andrew
