Yes sounds good.
@Kathleen....take a at the following attachment. I did something similar for DINP, creating dropdown menus for my categories. If you think this will help Kobina, feel free to pass it along.

Sounds like a good approach. I suggest you work with Kobina. You are talking to him to coordinate the other BaP work, so you might do it all together. Does this sound good, Teneille? I will send a note to Kobina once I hear back.

Subject: SSC assistance

Hi Ravi,
I have another potential assignment for a SSC related to BaP. I have a list of about 60 citations that the reviewers want us to consider. I think we need some way to track what we have done with these studies. I propose having the SSC create a table that includes several columns: for the citation, abstract, included, excluded, where included, basis for exclusion, and comments. I would like the assigned SSC to fill in the columns for citation and abstract. This will help me to do an initial screening based on the abstracts.

Does this sound ok? Do you have other suggestions on how to track these recommended citations? (I submitted them to HERO, so they should all be there in case we need to consider them further).

Let me know and I will forward my request to Teneille.

-K
