Purpose of Communication: FYI

Due Date for Comments: n/a

Dear Interagency Colleagues,

As most of you are aware, we have been working on a multi-year agenda for IRIS that identifies the top priority chemical assessments that the IRIS Program will focus on in the next few years. The multi-year agenda focused on the reprioritization of chemicals from the existing 2012 IRIS agenda and was informed by EPA's program and regional offices' most current needs, with the addition of two assessments (nitrates/nitrites and perfluoroalkyl compounds [PFCs] that were identified during the process as a very high priority. By working with EPA program and regional offices, the IRIS Program has confirmed the importance of ongoing assessments and identified the highest priority assessments for future development.

As we near public release, we wanted to provide you with a heads-up and share a copy of the multi-year agenda with you. We intend to release this on Tuesday, December 15th. Until then, please consider this a close-hold item and do not circulate.

If you have any questions, please feel free to contact me at Ex. 6 Personal Privacy (PP) If you would like to email, please contact me at jones.samantha@epa.gov.

Thank you,

Samantha
