Subject: FW: NCEA Interagency Communication #281 – Benzo[a]pyrene: Notification of availability of courtesy redline copies -- E-MAIL 3 OF 4

Due to size restrictions on some of your e-mail systems (10MB), this is email 3 of 4.
This email includes the Appendices (clean version) only (1 file).

Subject: NCEA Interagency Communication #281 – Benzo[a]pyrene: Notification of availability of courtesy redline copies

Date Sent: January 4, 2017

Action: Two-week courtesy redline *(response not required)*

Documents:
IRIS Toxicological Review of Benzo[a]pyrene - (Final - Clean and Compared to IASDD)
IRIS Toxicological Review of Benzo[a]pyrene – Appendices - (Final – Clean and Compared to IASDD)

Purpose of Communication: Two-week courtesy copy prior to public release

Due Date for Comments: n/a – Major concerns should be communicated to us as soon as possible

---

Dear Interagency Colleagues,

Happy New Year!!

We are pleased to provide courtesy redline-strikeout versions of the final Toxicological Review of Benzo[a]pyrene and Supplemental Information for the 2-week courtesy redline period. The benzo[a]pyrene interagency science discussion meeting was held December 21, 2016. **We will be posting the final BaP assessment on January 19.**

Two versions of the benzo[a]pyrene toxicological review and supplemental information document are attached – a redline version showing changes made since you last saw the assessment and a "clean" version. As part of EPA's migration to a new website structure, the former password-protected interagency website is no longer available. We are exploring additional ways of providing a similar resource for sharing drafts of future assessments with the interagency reviewers. In the meantime, if you are unable to access the files attached to this email, please contact me and we will find another method of getting you the documents.

As a reminder, citations are linked to EPA's HERO (Health and Environmental Research Online) database, which provides bibliographic information and abstracts for all references cited in the Toxicological Review. Additionally, you have been given access to HERONet, which allows you to view the full-text studies and reports used in the assessment.

IMPORTANT Please note that effective this Friday, I am beginning a detail within another part of EPA. Therefore, if you have any questions, please contact James Avery at avery.james@epa.gov or 703-347-8668. He will be stepping in to cover my position while I am gone.
As always, you may also contact Vince directly.

Thanks,
Gina
