Today or Monday if we ship?

Mike

If it is missing, then we may be able to work out a trans-ship to CHM.

Sorry for any confusion. I will wait to see what the CLP labs says, but I assume our options are limited?

The CLP lab seems to have it as received also, but I will ask them to confirm. Possibly it was an extra? - NT

Robert,

Coolers made it to LSASD: good temps and no broken containers. All samples for Meals analysis are accounted for. We do have a container that should be with the CLP shipment.

Sample **LCO-10S-SD** **CLP # DBFM7** 8 oz. glass jar
What would like us to do with it?

Thanks,

Mike Beall

Attached are the COC pdf and xml file for 20-0334. Three coolers shipped overnight today. Fedex 771198722832.

We had to use an 8oz glass jar for one of the temp blanks .. it is marked on the lid.

Let me know if you have any questions.
