Subject: RE: Exposure Data for Consumer Uses

Thank you for the response Doug. I think sooner is better. I have also spoken with Steve Bennett, and he is recalling that ACI and HCPA may have submitted some of this exposure information as part of public comments on either the scope or problem formulation for 1,4-dioxane. Steve is looking to see if he can find it, and our science team is looking too. I would be surprised that our team missed the data if it is already in the docket, but we are checking.

Is it possible to have a call and discuss what we are looking for on Monday?

doug

Hi Doug,

Thanks for the note and we'd be happy to stay in touch. Can you shed some light on your timing? I think this may take the form of some outreach to some member manufacturers and some sense of that timing from your end would be very helpful – copying Kathy and Nathan of our team.

Doug

Subject: Exposure Data for Consumer Uses

Hello Doug

Hope you are doing well, and staying safe.

As you may know, the agency is deliberating on 1,4-dioxane as part of the final risk evaluation under TSCA. As far as I know, there are no final decisions on the uses.

Some of our exposure assessors are interesting in better data on consumer exposure for surface cleaners, dish soap, dishwashing detergent and laundry detergent. We have also asked the biocides panel, and that request is pending. I just talked to Hal at RB and he suggested reaching out to you as well.

Do you have time for a call soon to discuss whether ACI has any exposure data that could be useful?

Thanks, doug
