Dose-response section will be clean for David by ~next Friday. Appendix attached (response to comments should be close; lit search and evaluations likely to undergo significant revision/ condensing).
Good idea to wait, particularly if you are planning to concentrate on the cancer hazards.

Thank you, Andrew! Yes, perhaps just send me the clean hazard this evening when it goes to David; with Bob's permission, perhaps I shall wait until tomorrow to delve further into that.

I'd appreciate an updated appendix, particularly the response to comments part, if that is stable.

Will bear in mind that the D-R is rough. I can provide high-level comments unless a more polished version is imminent.

Thanks again and good luck with everything!
Kate

Oh, you probably do not have permission to see it. Here is the latest (note: it is actually being sent to David by COB today, so it is still being edited/ cleaned up). Barbara or myself can cc you on the "clean" hazard section to David this evening. Do you need the current appendix? Note: the current dose-response section is "very rough".
Thanks, Kate.

Good morning Andrew!

I'm looking for the latest and greatest formaldehyde draft. You mentioned it was on the shared drive… can you please email me the link, or pop by to point me to the right directory/file?

Here is what I was able to find, clearly a fail:

Ex. 6 Personal Privacy (PP)

Thank you!
Kate
