Hi Jeff --

Checking in on this.

Thanks much - Tom

Hi Jeff --

As of earlier today the promised engineering and health reports for these consolidated PMNs still have not shown up in CDX. Could you look into?

Thanks much - Tom

Tom, Documents were uploaded into CDX yesterday in the respective consolidated cases.

Hi Jeff –

Checking in on this. Unless we are missing something, we see no updates in CDX since the support document filing of 07/22/2020.

Thanks – Tom

Tom.

I have the request to have the Standard review for the 10 chemicals and the two engineering reports to be 3rd party sanitization. I was not able to find the raw exposure reports. Ecotoxicity was no effects at saturation and the only numbers in the exposure report would be fugitive and stack air release and they are captured in the SR document.

The review was for Respirable Poorly Soluble Particulates (RPSP) drinking water and ground water exposures were not relevant for the route of concern.

I am hoping to have it into CDX late next week.

Thanks

Jeff

Dear Jeff,

We were just wondering if you had had a chance to put the reports for these cases in CDX yet. Please let us know.

Best regards,

Keller & Heckman

Rhys,

I will have the reports sanitized and put into CDX, This is an old case and I did Fax the reports to Gavin. The Standard Review Report has all the reports summarized, Since this is just an Human Health case and the Consent Order summarized those reports also I will get both sets (eng and exp) into CDX.

Give it about two weeks to be put into CDX, We are currently in the process of packing and moving.

Have a great Weekend

Jeff

Subject: RE: Report Request - P-15-04X2-04X7 and P-15-05X5-05X8

Afternoon Jeff,

In response to our previous request for the sanitized engineering and health reports for each of the two consolidated PMNs and the single Standard Review Report covering the two consolidated PMNs, you indicated that the reports have not been updated since they were sent to the submitter back in 2016. However, the submitter has notified us that it cannot find the report in its files. Nor can it find any record of having received the reports. Accordingly, we again request that sanitized copies of these reports, which already having been provided to the submitter must exist, now be added to CDX so that the submitter can access them.

At this time the submitter is not asking EPA to perform a new review. Rather, the submitter needs the reports to independently assess EPA MOE/Fold Factor calculations and then determine if the information in the two submitted toxicological studies would support a request to modify or revoke the consent order for the subject PMNs.

Thanks,

Rhys G. Daniels, Ph.D.

Rhys,

I cannot locate where your listed in the PMN as an Authroized official. I did fax 3rd party sanitized documents eng, exp, standard review to the technical contact during the review. A new contact was to be added (Deb) to the PMN but that never happened and my last communication went to only contact in the PMN and it is listed in CDX for you to review of the inhalation studies. If the contact would like me to sanitized documents we now will put them directly into CDX (with the respective consolidated set) and no longer email them. Can you Modify the two consolidated PMNs with the updated Contact information and I can Sanitize the Engineering report, exposure report and the Standard review

Report. Sine they came in as two different submission there will be an exposure report and engineering report for the respective submissions. However the Standard review is for both sets.

Thanks

Jeff

Subject: Report Request - P-15-04X2-04X7 and P-15-05X5-05X8

Morning Jeff,

In January 2018, our client entered into a TSCA consent order with EPA covering 10 PMN substances, designated as P-15-04X2 through P-15-04X7 and P-15-05X5 through P-15-05X8. As stipulated in the Consent Order, our client submitted draft final reports for two toxicity studies to EPA in July 2019.

In connection with modification or revocation of the TSCA Consent Order, the submitter has requested that we obtain copies of the original and any updated, post-study submission versions of the Initial Review Engineering Reports, Structure-Activity Reports, Health Reports, and any other reports the Agency prepared during review on the potential toxicity of and exposure to the PMN substances.

Because we are listed as technical contacts in the original PMNs, we request EPA to provide the sanitized documents directly to us.

As always, please let us know if you have any questions concerning this request.
