Dear Gloria,

Thank you for your kind message. However the further communication regarding this case may come from another consulting company now not from Envigo. I have been told that you will be made aware that the new consulting company is taking over work on this case. The new company is based in US therefore it is more convenient for our client.

Please can you let me know if I need to submit anything via CDX with respect to this change?

Thank you.

Kind regards
Monika

Hi Monika,
I put in the 15 day suspension. If you could work towards putting in the suspension through CDX, that would be best but if your hands are tied for now, I can wait.

Best,
Gloria

Dear Gloria,

I am sorry it takes long to send the request via CDX for the latest suspension but as it is required now to provide substantiation for each CBI claim I have to wait for my client to provide me his responses. I am afraid that the system will not let me send the Support form until I have the substantiation document.

Is this acceptable please?

Thank you.
Kind regards

Hi Monika,
Thank you for the update and I will wait until you have more information.

Also, management is asking that new information including requests for suspension past 15 days be sent through CDX, so please enter the suspension through CDX. It can be as long as you need it to be and I can rescind the suspension days if something changes on the company's end.

Best,

Dear Gloria,

Thank you for your kind assistance. Our client is considering the regulatory options and they have some queries. Please can you help us understanding the engineering report, i.e. is there a specific part which we should pay attention to?

In the EPA action letter it is stated that there is a concern for acute toxicity however we have submitted the test report on acute toxicity (please refer to Attachment no. 12 in the original PMN). Additionally, and also as stated in the engineering report the compound does not raise concerns regarding mutagenicity or genetic toxicity in vivo and is unlikely to be carcinogenic. We would really appreciate if you could give us more details as to why the OEDC 422 and OECD 486 are required?

Our client is also considering an analog substance which could possess any data on the health effects information but it is difficult to identify the appropriate analog.

Another question which our client has is whether we can change the application without selecting these 3 options?

Please can you give us your comments regarding the above?

Thank you.

Subject: RE: Concerning Your Case

Dear Gloria,

Thank you very much for contacting me with respect to our submission.

I will summarize your concerns with regards to the substance and will inform our client respectively while waiting for the official EPA letter.

If I understood correctly, may I request the engineering controls report to be sent to us via fax?
The number for the fax is: (0044)01480 892362.

Thank you.
Kind regards
Monika

Hi Monica,
Can you please call me again. Another submitter called me right before you called.

Best regards,
Gloria

Hi Monica,
I know it is very late your time. Would you be free to talk tomorrow at 9am EST to talk about your case. Unfortunately, I can't list the PMN number in an email to you as that is CBI.

Best regards,
Gloria
