Subject: Inquiry about Chloramine
Date: Tuesday, January 19, 2016 12:27:18 PM

Bill,

A call came in this morning (not to me) from a Mike Fitzgerald at the Stockton Record asking about EPA's apparent position that "chloramines are safe" in drinking water. I don't have much context on this and our resident expert Bruce Macler cannot be reached so we are trying to track someone down at HQ that can respond to this. We may need to contact the reporter directly to get him to be more specific. Regarding protocol, should we contact him directly of have Soledad make the call since Michele is out today? The reporter has a 5:00 deadline.

Paul
