If we think it is too early, we can hold this off. We need to be able to explain the data that was collected and how we interpret it.

Maybe next week is a good time to discuss interpretation of the data? After that, if time permits, we can discuss how to talk to the public about it.

Thoughts?

Hi Derek,
It seems a little pre-mature to me to discuss the data with the public. We are still discussing it internally, as I mentioned to Liz and Paul yesterday. That said, I am available to discuss with the Navy on those dates and times, and yes, I'd like to include Terry Han.

Nina

Hi Nina,

We are talking about meeting to discuss the strontium data with the public. I am not sure if you want CDPH involved. Do you want to be involved?

Wayne Yolanda and I have Wed, May 26 from 9-10 am; Thurs, May 27 from 9-10 available. Do either of these times work for you?

Thanks,
Derek

The question on the building RG evaluation is important and tough to answer. We are hopeful the Navy is taking some steps to address concerns raised in our August letter on the 2019 RESRAD evaluation. With the technical teams in discussion, there seems to be some forward momentum.

A parcel by parcel update with pictures of fieldwork would be great! Please do share the complete slide deck next week. Again, I just want to be prepared for any questions EPA might be asked on the Navy's work. While the Navy has made great progress on the remedies for many parcels, I hope we are on the same page of not suggesting fieldwork is complete in areas we don't have RACRs. There is work to do.

I'm out most of next week (and it seems the technical teams still need to decide next steps regarding the strontium data). Could we get something on the schedule the week of May 24 to discuss communicating this? Looks like the following times may work: Wed, May 26 from 9-11 am; Thurs, May 27 from 9-11 am or 1-3 pm; or Fri, May 28 from 9-11 am. Could you set something up? I imagine Nina might want to participate, too.

Thanks Yolanda!

Thank you for the quick review!

I plan on giving a parcel by parcel update on status and include pictures of recent field work. Very big picture, other than the results slide for Parcel G.

The only tricky topic that I expect will be the building radiological goal evaluation. "Why is it taking so long?"

Let's plan on meeting next week to discuss.

Derek

Thank you, Derek. Can you help me understand what topics the Navy plans to cover at the HPS CAC meeting? I understand Dr. Hunnicutt asked for a summary of all the Navy's work and want to be sure I'm prepared for any question that might come to EPA on the topics the Navy covers.

We recommend the Navy make the last bullet on slide 3 in parallel structure with the previous bullets. A suggested new bullet could read: "Plutonium, thorium, and uranium data collected at 10% of samples in specific locations identified in the work plan." I also suggest have "Parcel G" in the title of this slide.

Probably sooner than later, we should schedule a discussion on presenting the strontium data and the Navy's activities to address some of the higher sampling.

Wayne/Yolanda,

Attached are the slides on Parcel G to be presented at the May 24 CAC meeting. Please provide comments/concerns by May 19.

The soil results are through Jan 31. At some point we need to discuss how we are going to present the strontium data and confirmation sampling. Any thoughts?

Best Regards,
