Prashant,

Yes. Next Friday. I will reach out to GEPD and set up a call with everyone on Friday. Be safe.

Sincerely,

Rob, I assume you mean next Friday? I spoke with Kirk regarding availability and he and I are generally available next Friday.

Prashant,
I have all internal EPA comments and I am compiling. EPA does not yet have comments from GEPD. EPA and GEPD were going to get together this week and all of that was postponed based on the GA governor's directive to state employees. Plus, I was at a symposium last week in Phoenix with international attendees and need to stay isolated from the EPA office and GEPD for another week and a half. If EPA and GEDP can set up a call early next week, draft comments should be able to be shared before the end of the week. Would a call on Friday work for Honeywell?

Sincerely,

Robert H. Pope, GS-14

Rob,

I hope all is well.

Regarding GW sampling, as we discussed in the November meeting, we were going to submit the SCR for EPA's review. Once EPA had a chance to review, we would then meet to determine if there are, in fact, any additional sampling needs. Do you know when the EPA will be in a position to provide comments? Based on that we can schedule a call.

Prashant,
At this stage, I'm not sure about when we can reschedule our discussion. Will this impact scheduling the field work for OU2? EPA's goal was to provide feedback on the SCR before the groundwater sampling was accomplished. When you get a chance, I would like to discuss with you when we might re-schedule the meeting (likely as a call or skype meeting) and get the field work accomplished.

As an aside is the OU1 work impacted?

Sincerely,
