SUBJECT: APPLICATION FOR BONUS PAYMENT D.U.P.C6-C-169

Dear Mr. Williams:

We are returning herewith your applications for bonus payment dated January 31, 1953, in the amounts of $1,626.23 and $1,473.86, covering shipments from the Brown Vandever allotment under mining property certification number D.U.P.C6-C-169.

The subject application is being returned for your signature. Please sign in the space provided for your signature and return the application to this office for payment.

Thank you.

Very truly yours,

L. A. Walker, Deputy Director
Production Division

BONUS PAYMENTS

August 22, 1952

SYMBOL: OC:JXC

Reference is made to your letter of August 18, 1952, concerning bonus payments on an Indian allotment lease, where ore shipments have been made in the name of a contract miner. The situation in this case appears to be similar to that of the Skyline lease on the Navajo Reservation.

Section 60:6 of Circular 6 states that: "The Commission expressly reserves the right to decide.....the person to whom the bonus should be paid." Section 60:6 (k) provides that: "The person (other than a royalty payee or the like) who has lawfully received payment from a station or mill for the delivery of ore from a certified mining property may apply for bonus payments under this section."

Although Mr. Sitton has shipped the ores in his name, it appears that they should have been shipped in the name of Mr. Williams, who is the lessee of the property and who is the only person authorized to ship and receive payments for delivery of ores from the property, because the Secretary of the Interior, or his designee, has not approved an assignment of the lease. It is my opinion that bonus payments (assuming that the property is certified) would be payable only to Mr. Williams.

CERTIFICATION OF THE BROWN VANDEVER INDIAN ALLOTMENT (I-149-IND.-8913), PATENT NO. 1118314, GRANTS MINING DISTRICT, McKINLEY COUNTY, NEW MEXICO

SYMBOL: MI:TT

MC-59 DOPC4-C-165

Abstract:

The property is a lease from an Indian Allottee. No Atomic Energy Commission withdrawals affect the area. The mine will be subleased. No conflicts are in evidence. No ore was sold before February 28, 1951.

It is recommended that the property be certified.

Introduction:

The application for certification, dated August 19, 1952, was received on August 21, 1952, from Glenn D. Williams, (b) (6) [redacted]

The property was examined on September 11, 1952. No one was working the mine on the day of examination.

Status of the Land:

The property is leased for mining purposes from an Indian Allottee. The lease has an acreage of 163.38. There are no Atomic Energy Commission withdrawals in this district. The property consists of the N½ of the SW¼ and lots 3 and 4 (which makes up the W½ of the SW¼) of section 18, T. 13 N., R. 10 W., Grants Mining District, McKinley County, New Mexico.

The property can be reached by going west on Highway 66 for 8.2 miles from the Bluewater Buying Station; thence turn right and follow a graveled road for 4.5 miles; thence north 0.6 mile; thence northwest 0.4 mile , at which point is the mine. The property is a legal subdivision and can be located by the section corner.

Ownership:

The quarter section was removed from the public domain by a patent (No. 1118314, dated April 11, 1944) issued by the U. S. Government to Brown Vandever. The patent does not reserve the mineral rights to the United States.

MAT. 15-3
cert. appl.
Brown Vandever Ind. All
(I-149-Ind.-8913)

A mining lease (I-149-Ind.-8913) is recorded in the McKinley County Courthouse, Gallup, New Mexico, in book 8 of "Leases", page 154, entry No. 27377. The lease is from Brown Vandever to Glenn D. Williams and J. T. Hutton for the purpose of exploring for and mining uranium and related minerals. The terms of the lease are:

1. The lease runs for 15 years and is for the purpose of prospecting and mining uranium and related minerals.

2. Royalty - payable to the Superintendent of Indian Agency.

   a. Minerals or other products not included in mine value per dry ton - 10% of gross value.

   b. Royalty on uranium ore is on a sliding scale ranging from 10 to 20% of mine value per dry ton in accordance with the resolution of the Navajo Tribal Council No. ACS-80-51.

3. Bonuses - Lessee pays 10%.

4. Annual Rental - $1.00 per acre per year payable in advance. Rental does not apply on royalty.

5. Development - Lessee shall expend at least $10.00 per acre per year.

6. Surface Damages - $10.00 per acre. This can be applied on royalty.

7. Labor - Shall be Navajos when qualified.

8. Lease - Cannot be sublet without the approval of the Secretary of the Interior.

No evidence of any conflicts or adverse claimants was obtained. Mr. Williams stated that he intended to sublease part of the section to Noel Thompson.

Production:

The records of the Finance Branch, Colorado Raw Materials Office, are in accord with the applicant's statement that no ore was sold before February 28, 1951.

If certified, the property would be eligible for bonus payments on 10,000 pounds of U_3O_8.

Recommendation:

It is recommended that the Brown Vandover Lease be certified for bonus payments.

Production Possibilities:

The ore horizon is the Todilto Limestone. An incline has been driven to intercept the ore which lies beneath some forty feet of overburden. A high radiometric anomaly in a drill hole prompted this work. The ore had just been reached. Further development will be necessary to determine the size of the ore body.

Re: CERTIFICATION OF BROWN VANDEVER INDIAN ALLOTMENT (I-194-IND-8913) PATENT NO. 1118314, GRANTS MINING DISTRICT, McKINLEY COUNTY, NEW MEXICO

Dear Mr. Williams:

Your application for certification of the above mining claims has been examined by our engineers.

The property as certified consists of the E½ of the SW¼ and lots 3 and 4 (which make up the W½ of the SW¼) of section 18, T. 13 N., R. 10 W., Grants Mining District, McKinley County, New Mexico.

The certification number you will use in making application for bonus payments is D.U.P.C6-C-165. Several copies of an Application for Bonus Payment form are enclosed for listing each month's production since March 1, 1951.

As there have been no pounds of U_3O_8 produced between April 9, 1948, and February 28, 1951, inclusive, 10,000 pounds of U_3O_8 are eligible for bonus payments when contained in ores mined from this property and delivered to a qualified mill or Commission ore buying station between March 1, 1951, and February 28, 1954, inclusive.

Very truly yours,

Leland A. Walker
Deputy Manager

SUBJECT: APPLICATION FOR BONUS PAYMENT - BROWN VANDEVER ALLOTMENT
D.U.P.C6-C-165

Dear Mr. Williams:

There is returned herewith your application for bonus payment, dated December 4, 1952, in the amount of $15,009.64, covering shipments to the Anaconda Copper Mining Company at Bluewater, New Mexico, from the Brown Vandever Allotment, under mining property certification number D.U.P.C6-C-165.

The subject application is being returned for the reason that it is not in agreement with the records of the Anaconda Copper Mining Company as to the name of the shipper. The Anaconda Copper Mining Company's records indicate that these shipments were made by N. Thompson and G. Williams; therefore, the application will have to be submitted in the names of both parties and signed by both parties unless it is a partnership, in which case it may be signed by either N. Thompson or G. Williams as partners. This is in compliance with Domestic Uranium Program Circular 6 which states that the bonus shall be paid to the person or persons who have the legal right to mine and sell the ore.

An application blank is enclosed for your use in resubmitting this application.

Very truly yours,

Frank H. MacPherson, Director
Production Division

Grand Junction, Colorado.

Dear Mr. MacPherson:

Please refer to your letter of December 9, 1952, with which you returned my application for bonus payment under mining property certification number D.U.P.C6-C-165.

Mr. Noel Thompson does not have a legal right to the mine nor to sell the ore, but only has a mining contract. His name was included on the settlement sheets solely for the convenience of the Anaconda Copper Mining Co. in identifying shipments, but at their suggestion it has been dropped on all settlements sheets after October.

I shall resubmit an application in January, 1953, including December shipments. In the meantime, the Anaconda Copper Mining Co. is writing you to explain the appearance of Mr. Thompson's name on my settlement sheets, and I trust you will then be able to make the bonus payments in my name.

Very truly yours,

Glenn D. Williams M.P.

DATE: Jan. 19, 1953

INDEX: MAT. 15-3 Cert. #165 Brown Vandever

TO: J. B. Knaebel, Mgr., New Mexico Operations, Anaconda Copper Mining Co., Grants, New Mexico

FROM: Sheldon P. Wimpfen, Manager, Grand Junction Operations

SUMMARY: Approximately two months ago you sent a copy of ore purchase contract No. BRS-4 between your company and Glenn D. Williams of Gallup, New Mexico...

The regulations of the Department of Interior provide that no assignment of leases on Indian land may be made without the approval of the Department of Interior. No person other than the approved lessee has a legal right to ship such ores from the Indian Reservation and, should Mr. Williams request certification for bonus payment under the provision of Circular 6 for the ores shipped to you under Contract BRS-4, we would be unable to certify such shipments for payment unless Mr. Williams has received formal assignment of the mining lease covering this property.

FILED: In view of the foregoing, it is suggested that you advise Mr. Williams of the situation, in order that he may obtain the formal assignment of the mining lease as soon as practicable.

Dec. 22, 1955

E.B. Doggett

C-165 Brown Vandever, Grants District

Date: December, 1952 Engineeer: P.W. Simmons

Noel L. Thompson has mining contract on 20 acres of this section, Glen Williams holds lease.

Contract calls for Williams to drill ahead of working faces to keep development in ore.

Ore body originally discovered while Sitton was in partnership.

Ore occurs in a roll 50 feet below the surface, has been followed for 150 feet to date with a cross sectional dimension of 10x20 feet.

A production of 600 tons per month with seven men is being maintained.

General wage rate for Navajo labor runs from $0.85 to $1.00 per hour. A skilled Navajo rates $1.15 which is considered tops.

Ore is hauled 17 miles to Bluewater and costs 9¢ per ton mile.

Date: January 1953 Engineer: T. Toren

This incline operation is producing some 600 tons of 0.18% ore per month. Essentially all of the rock mined is shipped and attempting to sort or resue does not seem feasible, dollarwise. Stope faces 15' by 15' are being worked. Less than 20 tons of waste have been removed. The ore reserves are continually being extended by Williams' wagon drilling program.

C-165
Visited: 9/12/56 Final Engineers: Taylor & Gay

Eligible balance exhausted in March, 1953.
This property is still producing at the rate of about 600 tons per month.
No irregularitees noted with respect to bonus payments.

PAID-OUT CERTIFICATION

Certification No. C - 165 Brown Vandever Indian Allotment

All eligible production bonus on this certification has been paid.

Per notification from Finance Division dated April 30, 1956.

December 27, 1957

Mr. Ray Lindlof
Federal Uranium Corporation
248 South Main Street
Salt Lake City, Utah

Dear Mr. Lindlof:

The following lands in the Grants District are being kept in withdrawn status for use of the AEC:

T 13 N, R 11 W, NMPM
Section 3, lots 1 and 2, $S\frac{1}{2}$ $NE\frac{1}{4}$, and $S\frac{1}{2}$
Section 11, all
Section 13, $SE\frac{1}{4}$, $S\frac{1}{2}N\frac{1}{2}$

We do not expect to lease any Commission-controlled land in the near future. When any lands are leased, the leases will be let on a competitive bid basis under the terms of Circular 8, a copy of which is enclosed.

The $SW\frac{1}{4}$ of section 18, T 13 N, R 10 W, was certified on November 6, 1952, under Certification No. DUP C6-C-165. All eligible bonus payments have been made on this property, the last having been made in 1953. Therefore, the new ore body you referred to in the middle of the $SW\frac{1}{4}$ of section 18 would not be eligible for additional bonus payments. Your firm's eligibility for a certification on other property in the area, such as the $E\frac{1}{2}$ of section 18, would have to be determined after an investigation based on an application for certification in accordance with Circular 6.

Van Alstine sends his regards.

Very truly yours,

R. H. Toole, Chief
Leasing & Development Branch
Mining Division

☆ U. S. GOVERNMENT PRINTING OFFICE: 1954-294551

We may take a lease on the E 1/2 of Section 18, if an agreement is concluded with the present lease holders.

Do you have any information on the status of the SE 1/4 of Section 13? If it is an A.E.C.-held area, we would be interested in an operating lease. I have heard various stories on this 1/4 section, and would be interested in the facts.

T13N, R11W

We were originally certified, I believe, for the NE 1/4 of Section 24. Will we be eligible for additional certification in the area?

Thank you for any information you can give us on these matters.

Yours very truly,

Ray Lindlof

Dear Bob:

I am enclosing a map, showing some of our holdings in the Haystack Butte Area of New Mexico. We are relinquishing our Indian lease in Section 24, but are developing a new ore body in the middle of the SW 1/4 of Section 18. We may take a lease on the E 1/2 of Section 18, if an agreement is concluded with the present lease holders.

Do you have any information on the status of the SE 1/4 of Section 13? If it is an A.E.C.-held area, we would be interested in an operating lease. I have heard various stories on this 1/4 section, and would be interested in the facts.

T13N, R11W

We were originally certified, I believe, for the NE 1/4 of Section 24. Will we be eligible for additional certification in the area?

Thank you for any information you can give us on these matters.

Yours very truly,

Ray Lindlof
