Specialized Labor Cost Estimate
Canadian Radium & Uranium Site

Task: To validate all radiological parameter analytical results for the groundwater samples collected from the Canadian Radium & Uranium Site in December 2016.

Samples to be Validated:

5 Aqueous Samples

The validation of the radiological parameters can be completed at approximately 3.0 hours per sample. Therefore, 15 hours will be required (3 hours x 5 samples).

Labor (Rick Haaker - Part-Time Weston CHP/CIH - Labor rate is fixed with no multiplier): Raw Rate is $110.00/hr

Canadian Radium & Uranium Site (TO-0007-0023):
15 hours X $110.00/hr = $1,650.00
No ODCs will be required
Total Estimated Cost = $1,650.00
