If violations – still check out root cause?
Have meetings with citizen groups?
Representative operation =
Askania House info – pressure
Upcoming projects
When get 114 response for ET?
Do self monitoring; use COMs for finding bad ovens.
How many ovens out of service.
Production rate now vs when had more batteries
How is business going
Uhde still here.
Cleaned up baghouses
36 hr coke – 13, 14, 15, 19, 20
Was 12,300 tons/day
Now doing 8500 tons/day 1–3 batteries
21.75 hrs
B, C, = 24 hr coke

Penn Avenue
US Steel not own

Lots of trade issues, 337
Granite City, Fairfield, Gary - down
2 BFS down
permanently idled

USS Clairton is only one running now.
Cedar database = Operating, Maintenance
March - signed
Stack relations, 2, 3, 15 batteries
15 Battery - was not idled - 4-5 years
2005 - 2006 2007 - throwalls on B battery = all of them
thru 2016 - for this
1,000,000 - 1,500000 / oven
throwall
"C" battery - changing
OK

incr coking time - effected oven walls
Lose beneficial carbon
8 pushes = 1-3 batteries
COMS -
303 stuff everyday
Veolia does this
Angela here 5 days / week.
Met with Pearl Future - 2014
Thru 2016 - will operate same way
Only supply on plants.
July 22 - send us 114 info
Coke MACT ICR
Iron + Steel MACT
7 people before but only 5 now. in Darzinko group
25% down from before on labor.
Can't say about future

Low emission quench towers, double set of baffles
5A, 7A
19-20, 13-15
Low emission quench towers
50 Million each for new towers
Get tower info on quench towers
Get copy of screens
Linde technology
5C Rule
2 Ambient PM monitors - Midt & M5
Cons towers - smaller,
now double baffles
Spray off baffles = every other push
5.8 Million tons Coal
4.3 million tons Coke

Gas prices, quit drilling

people went back to Texas

I asked for Askania hand info

Blend coal at river

2 barge unloaders

2500° oven temp.

Only control push emissions, not travel.
