All – New Indy is proposing to shut down the stripper for maintenance for 8 days beginning 9/18/21, and route all condensate to the ASB. They also state that the MACT allows for up to 10% excess emissions.

During our meeting with New Indy last Friday, didn't New Indy say they would check into storing the condensate during maintenance activities?

I'll send a calendar invitation for a call this afternoon to discuss our options.

Regards,

Todd Russo
