Washington Examiner: Daily on Energy: The latest clues from Manchin for energy policy; April 8th, 2021 by Josh Siegel and Abby Smith
https://www.washingtonexaminer.com/policy/energy/daily-on-energy-the-latest-clues-from-manchin-for-energy-policy

MANCHIN'S LATEST FILIBUSTER FUSS: Sen. Joe Manchin won't vote to eliminate the filibuster and he's also skeptical of reconciliation, because he's told us this hundreds of times already, but it's worth looking for clues about ramifications for energy policy in his latest warning.

Manchin, the chairman of the Energy Committee, advised President Joe Biden and Senate Majority Leader Chuck Schumer against using the reconciliation budget procedure to bypass the Senate filibuster and ram through major legislation with party-line votes.

"We should all be alarmed at how the budget reconciliation process is being used by both parties to stifle debate around the major issues facing our country today," the West Virginia moderate Democrat said in a Washington Post op-ed. "I simply do not believe budget reconciliation should replace regular order in the Senate."

Biden is claiming he's open to compromise on his big green infrastructure bill, but notably he's not talking about toning down the content of the spending in his proposal, just how to pay for it.

That won't be enough to get any GOP votes, in our view, because they see a political advantage in tearing down the package as Green New Deal-lite (Can you really envision Republicans going for a Cash for Clunkers-style EV rebate program?).

That means Democrats almost certainly will have to use reconciliation, the procedure enabling them to pass the infrastructure bill through the split Senate by a simple majority, with Vice President Kamala Harris as the tie-breaker.

Manchin could single-handedly block the plan from making it through reconciliation: It's hard to see that happening though.

Notably, as Axios' Ben Geman observed in his newsletter today, Manchin does not mention energy and climate-related policy in name-checking a bunch of areas that should go be approved on a bipartisan basis and go through so-called "regular order." His list: Voting rights reforms, instituting health-care protections and changes to the federal tax code and business regulations.

Biden's infrastructure plan also includes a specific carrot to Manchin, proposing to extend an advanced manufacturing tax credit program offering companies subsidies to build or retool manufacturing and industrial facilities in rural areas (hello West Virginia) to make clean energy technologies. Manchin has proposed legislation to this effect. And not to mention the infrastructure plan goes big on carbon capture, Manchin's favorite technology.

Manchin could get more wins too: "He wasn't as strident on reconciliation as he was on filibuster," a lobbyist following the infrastructure negotiations told Josh. "It's a smart move because it increases the cost Schumer needs to pay for his vote."

It's easy to imagine Manchin falling in line once Biden takes a crack at wooing Republicans, and inevitably fails. Does he really want to be the guy who killed what Democrats see as their best shot to chance significant climate legislation?

BIDEN'S BET ON REBATES TO SPUR ELECTRIC VEHICLES: Biden's infrastructure proposal promises to give consumers point-of-sale rebates to buy American-made electric vehicles in order to help battery-powered cars become affordable for everybody, Josh reports in a new story digging into whether it would actually work.

The idea is modeled after a $392 billion trade-in program proposed last year by Schumer to provide drivers rebates to swap old gas guzzlers with zero-emission vehicles, in what would be a major expansion of the Obama administration's $3 billion "Cash for Clunkers" program.

Schumer talks it up at every chance he gets, touting it would remove more than 63 million gas vehicles off the road over a decade, replacing 25% of the gas-powered fleet.

Proponents want to lower sticker prices: Which remain higher than gas-powered cars despite the lifetime cost of owning an EV being lower.

A rebate designed to encourage the purchase of electric vehicles could bring in new buyers, beyond just the wealthy people who frequently buy new cars.

"What you would see is new buyers coming out rather than people who would have bought a new car anyway," said Ryan Gallentine, director of transportation at Advanced Energy Economy.

You can't do it in isolation: Auto market analysts and economists say a trade-in rebate program on its own is unlikely to spur demand for electric vehicles, which remain stuck at 2% of U.S. total sales.

What's also needed are policies to mandate stricter fuel-efficiency standards, along with investing more in charging infrastructure to reduce range anxiety, spending on technology to reduce the cost of batteries, and incentivizing factories to build electric vehicles.

And timing is important. If rebates are offered before supply, charging, and production capacity are scaled up, it might not be effective.

"You have to sequence it correctly," said Kristin Dziczek, senior vice president of research at the Center for Automotive Research.

SHELL BACKS DEMOCRATS' BID TO SAVE METHANE RULES: Shell lent its support yesterday to an effort by Democrats to use a procedural tool to cancel a Trump administration action that would essentially block the EPA from controlling methane emissions from oil and gas production.

European-based Shell became the first oil major to endorse a resolution introduced by Democratic Sen. Martin Heinrich and Independent Sen. Angus King of Maine, who caucuses with Democrats, to use the Congressional Review Act to scrap the Trump administration methane rollback in a fast-tracked manner with a simple majority vote.

Why it matters: Environmentalists said Shell's endorsement could encourage other big oil companies to do the same. While Big Oil and its trade groups have said they support Biden's plan to impose direct federal regulation of methane, they've been silent about Democrats' CRA tactic until now.

"Energy companies that want to be part of the climate solution are going to support the methane CRA," Ben Ratner, senior director with the Environmental Defense Fund+Business, told Josh.

MEANWHILE, GLOBAL CO2 AND METHANE LEVELS SURGED LAST YEAR: Even with the pandemic, which temporarily drove down greenhouse gas emissions as countries went into lockdown, global carbon dioxide and methane spiked in 2020, according to measurements released yesterday by the National Oceanic and Atmospheric Administration.

Global carbon dioxide levels rose by 2.6 parts per million last year, the fifth-highest rate of increase in NOAA's 63-year record. Pieter Tans, senior scientist at NOAA's Global Monitoring Laboratory, said if the economic slowdown hadn't driven emissions down, 2020 would have seen the highest increase in CO2 levels on record.

Levels of methane, a shorter-lived greenhouse gas that is dozens of times more potent than CO2, also surged last year, with the largest annual increase on record. NOAA said that preliminary analysis shows the primary driver of increased methane came from biological sources, such as wetlands or livestock, as opposed to oil and gas production.

"Although increased fossil emissions may not be fully responsible for the recent growth in methane levels, reducing fossil methane emissions are an important step toward mitigating climate change," said Ed Dlugokencky, a research chemist at the Global Monitoring Laboratory.

BIDEN TAX PLAN TARGETS $35 BILLION IN FOSSIL FUEL SUBSIDIES: The Treasury Department estimated yesterday that ending subsidies for fossil fuel companies, a component of Biden's infrastructure plan, would provide $35 billion in federal revenue over a decade.

The Biden administration argues subsidies are accrued "within a handful of large firms" that can afford to lose federal government support.

"The main impact would be on oil and gas company profits. Research suggests little impact on gasoline or energy prices for U.S. consumers and little impact on our energy security," Treasury officials wrote in a broader report on Biden's tax policies.

They contend that tax breaks used by oil and gas companies discourage investment in cleaner alternatives, and "undermine the fight against climate change."

The administration aims to counter that imbalance by providing a host of new and expanded subsidies for EVs, transmission, carbon capture, and energy storage. The Treasury report does not list specific tax policies used by fossil

fuel firms that it's seeking to change. But the industry has largely argued that provisions enabling them to deduct certain drilling costs and carry forward losses for future years are not designed specifically to help fossil fuels.

EPA SET TO FORMALLY SCRAP TRUMP SCIENCE TRANSPARENCY RULE: The EPA sent yesterday a rule to the White House budget office for interagency review that would eliminate a Trump administration regulation seeking to restrict the kinds of science the EPA could use in policymaking.

The move comes after a federal district court, in a ruling in early February, raised significant doubts that the Trump administration's rule was on solid legal ground. That ruling, from a federal district court judge in Montana, struck down former EPA Administrator Andrew Wheeler's attempt to make the science transparency rule effective immediately, but the judge also strongly suggested that the entire rule lacked legal basis.

The court ruling has allowed the Biden team a much easier and quicker path to scrap the Trump administration's action, which environmentalists and public health experts argued could have hamstrung the EPA from setting stricter pollution limits.

GLOBAL CENTRAL BANK NETWORK TO STUDY BIODIVERSITY RISKS: The Network for Greening the Financial System, a global network of central banks focused on climate change, announced this week it would expand its work to study the financial risks of biodiversity and nature loss.

NGFS, of which the Federal Reserve is a recent member, will partner with one of its research stakeholders, the International Network for Sustainable Financial Policy Insights, Research, and Exchange, on the study. The aim of the research is to help central banks and financial supervisory authorities meet their biodiversity commitments, focusing on land-use and deforestation, according to a news release.

Related...JPMorgan expands deforestation policy: The U.S. bank said today it would require clients in the palm oil sector to meet "no deforestation, no peat, no exploitation" sourcing standards, as well as expand its policies on "forest-risk commodities" such as cattle, paper and pulp, and cocoa. JPMorgan will also increase forest management requirements for companies in the mining and infrastructure sectors, the bank said.

The move comes in response to shareholder pressure, including a resolution brought by Green Century Capital Management, an investment adviser to fossil fuel-free mutual funds. Green Century withdrew its shareholder resolution in response to JPMorgan's policy changes.

MORE FROM JPMORGAN: The bank also announced today it is launching a "green economy" team to help boost the growth of four sectors — renewable energy, efficiency technology, sustainable finance, and agriculture and food technology.

"Our Green Economy banking team will not only deliver industry-specific advice, solutions and services to help green enterprises grow, but will also use our leadership position to promote a more sustainable world," said Brian Lehman, who will lead the new team, in a statement.

JPMorgan announced in October that it would seek to align its financing with the Paris climate agreement, with a pledge to set interim targets for 2030 this year.

WHAT IS INFRASTRUCTURE (BABY, DON'T HURT ME): Biden is taking it upon himself to defend his broadly defined infrastructure plan that seeks to spend big on electric vehicle charging, transmission lines, clean energy R&D, manufacturing batteries, and more, saying the U.S. should be focusing on industries of the future.

"The idea of infrastructure has always evolved to meet the aspirations of the American people and their needs, and it's evolving again today," Biden said in an address yesterday. "Two hundred years ago, trains weren't 'traditional'

infrastructure either until America made a choice to lay down tracks across the country. Highways weren't 'traditional' infrastructure until we allowed ourselves to imagine that roads could connect our nation across state lines."

INTERIOR'S NEW SOLICITOR NOMINEE: The White House nominated Robert Anderson yesterday to be the Interior Department's solicitor, the agency's top lawyer. Anderson was director of the University of Washington's Native American Law Center, and previously worked at Interior in the Clinton administration as Associate Solicitor for Indian Affairs and Counselor to the Secretary.

Government Executive: EPA Begins Rolling Back Trump-era Union Policies; April 8th, 2021 by Erich Wagner
https://www.govexec.com/management/2021/04/epa-begins-rolling-back-trump-era-union-policies/173237/

The Environmental Protection Agency and the American Federation of Government Employees will revert in part to their previous 2007 contract, and the parties will begin negotiations on an entirely new contract later this year.

The Environmental Protection Agency this week moved to implement President Biden's workforce executive order, working with its union to roll back to a 2007 contract until the parties can negotiate a new agreement.

Last year, EPA implemented a new union contract on the American Federation of Government Employees, following a largely pro-management decision from the Federal Service Impasses Panel. Among other things, the agreement severely reduced union officials' access to official time, restricted what matters could be the subject of grievance proceedings and gave management more leeway on employee performance evaluations. It also denied the union access to agency office space and supplies.

Those provisions were the result of a trio of executive orders signed by former President Trump in 2018 aimed at reducing the influence of unions across the federal government.

In January, Biden signed an executive order rescinding those orders, as well as several other edicts that he deemed to be anti-federal employee. Last month, the Office of Personnel Management issued guidance instructing agencies to reopen union contracts that contain the provisions of Trump's workforce executive orders for renegotiation, and to temporarily revert to pre-Trump labor agreements in the meantime.

According to a memorandum of understanding between EPA and AFGE, the union and agency will revert to their previous 2007 contract on matters pertaining to official time, grievance procedures, office space and performance evaluations.

On official time, the agreement also ensures that local union officials receive official time in accordance with pre-Trump executive order practices established on a region-by-region basis.

"Council officials will continue to receive reasonable and necessary official time," the document states. "This means that local officials will follow MOUs related to the amount of official time. Local officials will be granted official time that was in effect pursuant to MOUs prior to July 2019."

The deal restores access to the agency facilities, particularly office space and supplies. And it partially reinstates the policies on employee evaluations that was in effect as part of the 2007 contract between EPA and AFGE. The parties also agreed that for management to put an employee on a performance improvement plan, the agency must have "justification" first.

"The parties agree that effective April 7, 2021, Article 34 (Employee Performance Evaluation) from the 2007 agreement will replace the 2020 MOU bargained between the parties regarding performance, except that there will continue to be a 3-tier performance appraisal system until the parties address this issue in term bargaining," the agreement states. "Both parties reserve the right to bargain performance at the term."

One area where the parties will not revert to the 2007 agreement is on telework and work schedules. The 2020 contract's article on telework will remain in effect, except its requirement of the number of days spent in the office "will be delinked" from the number of days per week that employees may work remotely. The parties indicated they will further discuss telework and alternate work schedules during term negotiations.

The memo sets up a two-week review period for management and AFGE to review the rest of the 2007 contract for provisions they would like to see implemented moving forward, and negotiations on a new collective bargaining agreement will commence within 90 days of the end of that review.

EPA and AFGE also agreed to conduct joint training on collective bargaining, with an eye to repairing the labor-management relationship at the agency.

"This training includes but is not limited to training on interest-based bargaining, relationship building, permissive bargaining and any other training the parties agree is appropriate," the document states. "[The] parties agree to pursue partnership opportunities that enhance working conditions of EPA employees and further our collaborative efforts toward improving the labor-management relationship."

In a statement, AFGE Council 238 President Gary Morton applauded the agreement, and was hopeful it will portend a more positive relationship between his union and the EPA.

"This interim agreement restores employees' right to full representation at the worksite and will make it possible for employees through their union representatives to resolve any issues they encounter," Morton said. "This is a huge step in the right direction, and the union won't stop fighting until we eliminate all of the anti-labor provisions forced on us by the previous administration."

Agency

Washington Times: House Oversight Republicans demand docs on EPA's seemingly 'politicized' firing of Trump appointees; April 8th, 2021 by Haris Alic

https://www.washingtontimes.com/news/2021/apr/8/house-oversight-republicans-demand-docs-epas-seemi/

Top Republicans on the House Oversight and Reform Committee are demanding the Environmental Protection Agency turn over any documents relating to the abrupt firing of 40 outside science advisers appointed by former President Donald Trump.

Rep. James Comer, a Kentucky Republican who serves as the committee's ranking member, told The Washington Times the dismissals warranted further scrutiny as they appeared to be politically motivated.

"President Biden's political purge of 40 appointed science board members is jeopardizing the credibility of the Environmental Protection Agency and shows this administration is fast-tracking their radical far-left agenda," Mr. Comer said on Thursday.

Mr. Comer and his colleague on the oversight committee, GOP Rep. Ralph Norman of South Carolina, have sent a letter to the EPA requesting any and all "documents and communications" related to the matter.

The action comes after EPA Administrator Michael Regan surprised many earlier this month by announcing the removal of 40 outside science consultants from two of his agency's high-profile advisory panels.

Ken Paxton, Texas attorney general, sued for blocking people on Twitter

Mr. Regan's dismissals targeted Trump-era appointees to the Science Advisory Board and the Clean Air Scientific Advisory Committee. Both panels have significant sway in promulgating environmental regulations by deciding which information and data the EPA uses for such decisions.

The Clean Air Scientific Advisory Committee, in particular, plays a large role in determining regulations on air quality and pollution.

Chemicals

JDSupra: PFAS: The "Forever Chemicals" In Consumer Products And Why Businesses Should Take Care In Their Marketing; April 8th, 2021 by Vinson & Elkins LLP

https://www.jdsupra.com/legalnews/pfas-the-forever-chemicals-in-consumer-1758593/

PFAS (per- and poly-fluoroalkyl substances) have garnered significant national attention in the last few years. PFAS have made recent headlines in multi-million dollar settlements, Biden campaign promises, proposed EPA rules, congressional hearings, and state-level regulatory efforts across the country. For more about these activities and further background on PFAS please see this previous post.1 Growing public attention to PFAS (and thus, PFAS presence in consumer products) is consistent with recent trends in consumer demand for environmentally friendly or "green" products. Businesses have responded to this interest in green products by increasing their environmental marketing efforts, particularly with respect to highlighting the absence of a PFAS known as PFOA (perfluorooctanoic acid). But with a larger spotlight on a PFAS family consisting of thousands of unique chemicals, businesses should take care to manage how they advertise product information to consumers to avoid running afoul of U.S. regulations against deceptive advertising. The Federal Trade Commission's ("FTC") Guides for the Use of Environmental Marketing Claims (the "Green Guides") set forth federal guidance for businesses to help navigate issues like this one.2

Background on the Green Guides

The Green Guides were first issued in 1992 and lay out general principles businesses should consider when making an environmental claim about a product. The Green Guides also include guidance on how businesses should expect consumers to interpret specific claims and, importantly, how businesses can appropriately limit or qualify their environmental marketing claims to avoid misleading consumers. The Green Guides are not FTC rules or regulations, rather, they serve to warn about the types of marketing claims the FTC might find deceptive and therefore be in violation of Section 5 of the FTC Act ("Section 5").3 The FTC can bring an enforcement action if it believes that all reasonable interpretations of an environmental marketing claim are not truthful, are misleading, or are otherwise "not supported by a reasonable basis."4 Accordingly, any business looking to avoid an FTC enforcement action over its PFAS marketing (or any environmental marketing) should take care to review the Green Guides.

In the 2012 updates to the Green Guides, the FTC introduced guidance on several new categories of environmental marketing. One of the new categories covers free-of claims (e.g., "this product does not contain asbestos"). The Green Guides explain how even a truthful free-of marketing claim can be considered deceptive if the product "contains or uses substances that pose the same or similar environmental risks as the substance" advertised as not present in the product.5 Potential FTC action against PFAS marketing would most likely relate to this category of guidance. Thus far, the agency has brought "free of" enforcement actions over marketing claims representing that the product was either free of volatile organic compounds, chemical-free, or emission-free. For more information about FTC enforcement trends, please see this previous post.

The Green Guides and PFAS

Though the FTC has never brought an enforcement action concerning the marketing of products containing PFAS, the combination of the Biden administration's commitment to addressing PFAS and growing consumer awareness of PFAS could lead to an increase in FTC activity in this space. Businesses that market their products as free-of one particular type of PFAS without any qualifying language should be aware that some consumers might interpret such statements to mean the product is free of all PFAS — or at least the most concerning ones. For example, many cookware products today are advertised as PFOA-free, as the chemical has been largely phased out of production in the U.S. But some consumer advocate and environmental groups dispute whether the PFOA-replacement PFAS used in production are safe. Other organizations have called for the removal of PFAS from consumer products and encourage shoppers to avoid PFAS products all together. Thus, related PFAS claims could be seen as potentially misleading to consumers under current FTC guidance. The FTC has been criticized by these same organizations for not previously addressing PFAS marketing materials. Like the example above, potential FTC enforcement actions over PFAS marketing would most likely

center on a “free-of” claim, but could conceivably be brought for allegedly deceptive biodegradable or non-toxic marketing claims. Accordingly, businesses should vet their PFAS marketing against all subsections of the Green Guides.

Take-aways
Increased public and political scrutiny on PFAS in consumer products could prompt the FTC to ramp up its activity addressing PFAS marketing. This activity could take the form of additional clarification to marketers of PFAS-containing products or new enforcement actions. Either way, with the changing regulatory landscape and the Biden administration’s focus on these issues, businesses should revisit PFAS claims they make to consumers, and, when doing so, use the Green Guides as a critical benchmarking tool.

Infrastructure
NPR: EPA Chief Says Biden Infrastructure Bill Will Help The U.S. Face Climate Change; April 8th, 2021 by Steve Inskeep
https://www.npr.org/2021/04/08/985253393/epa-chief-works-to-reverse-trump-era-environmental-policies

President Biden's $2 trillion infrastructure plan isn't just about roads, bridges and affordable housing but also about dealing with climate change, the Environmental Protection Agency's new leader says.

EPA Administrator Michael Regan says the nation's water infrastructure has been neglected for decades and is "increasingly becoming more vulnerable."

It needs to be "stronger and more resilient to face the climate change impacts that we are seeing right here right now — impacts to our wastewater treatment facilities, stormwater infrastructure to help reduce flooding," Regan says in an interview Thursday with NPR's Morning Edition.

With His Legacy In Mind, Biden Seeks U.S. Transformation With Infrastructure Plan
Biden's plan includes $56 billion to modernize water systems around the country and $45 billion to replace the nation's lead water pipes, which include those that bring water to an estimated 6 million to 10 million homes.

Regan notes that lead exposure is "a serious public health issue — especially on our children, where we can see irreversible and long-term health effects, including decreased IQ, focus and academic achievement."

Hope And Skepticism As Biden Promises To Address Environmental Racism
"So through the American Jobs Plan [the infrastructure bill], we will not only tackle public health concerns like this, but it creates good-paying jobs and helps to build a stronger economy," he says.

Reducing carbon is key to countering climate change, and energy markets are already shifting away from heavy carbon-producing sources such as coal toward natural gas and renewable energy sources such as wind and solar.

"Markets are driving this conversation. Technology has caught up to the conversation," Regan says.

"We have to lessen our reliance on fossil fuels. There's no doubt about that," he says. "But we also have to spur technological growth that not only reduces or eliminates the emissions, but possibly captures the emissions. It's an all-hands-on-deck approach. And so what we want to do is work with our business community, our entrepreneurs, our technology innovators."

Trump EPA Erects New Barriers To Crucial Science
Regan previously served as North Carolina's environment secretary and worked in the EPA in the Clinton and George W. Bush administrations. He says it was "painful to watch the agency from the outside" as President Donald Trump attempted to change the EPA.

"So, morale was low. But let me just say that the staff here are resilient," Regan says. "The energy level has increased. Staff are engaged. And what I've committed to is returning to scientific integrity, transparency, and the staff voices will

be heard and will be a part — a major part — of the solutions that we propose to these complex challenges facing our country."

Regan says he's reviewing the decisions made under the Trump administration "to evaluate if science, facts and data were properly applied and where they were not, we will reverse course."

Pesticides

USA Today: Watchdog group petitions EPA to ban Seresto pet collar after thousands report harm; April 8th, 2021 by Johnathan Hettinger

https://www.usatoday.com/story/news/investigations/2021/04/08/seresto-pet-collar-linked-reports-harm-epa-asked-ban/7137972002/

The Center for Biological Diversity filed a legal petition Thursday morning asking the U.S. Environmental Protection Agency to ban a popular flea and tick collar that has been linked to thousands of incident reports about pet and human harm.

The Seresto collar, developed by Bayer and now sold by Elanco, has faced increased scrutiny, including a Congressional inquiry and class action lawsuits, following a March story by the Midwest Center for Investigative Reporting and USA TODAY. The story found more than 75,000 incident reports of harm linked to the collar, including at least 1,698 pet deaths and almost 1,000 people harmed.

The Center for Biological Diversity, a national nonprofit conservation organization that acts as a watchdog of the EPA as part of its mission to protect endangered species, obtained those documents showing the widespread harm and shared them with the news outlets.

The group's petition, to which the EPA is required to respond, argues that the agency needs to take action to protect pets and people. Seresto has been the subject of more adverse incident reports than any other product in EPA history, according to EPA documents, yet the agency has not taken any action to inform the public of risks associated with the pesticide-based collar. The petition outlines how the EPA's registration decisions regarding the pesticides failed to protect pets and humans.

"Every day this is on the market, someone else might get poisoned," said Lori Ann Burd, environmental health program director for the Center for Biological Diversity.

The U.S. Environmental Protection Agency, which under federal law must decide whether the use of pesticides causes unreasonable adverse effects, did not immediately respond to a request for comment about the petition.

Burd said petitions have been filed over controversial pesticides in the past, including chlorpyrifos, a pesticide linked to brain damage in children, and tetrachlorvinphos, another pesticide often used in pet collars. The National Resource Defence Council originally petitioned to ban it in 2009. Neither pesticide has been banned, despite years of legal action.

Burd said the agency frequently ignores petitions, but organizations have a six-year statute of limitations to sue the agency to get them to respond.

The Biden administration has pledged to follow science in its decision-making and has raised concerns about Trump administration decisions that valued politics over science.

"If this administration wants to show it's different, this is the chance," Burd said.

Get the Coronavirus Watch newsletter in your inbox.
Stay safe and informed with updates on the spread of the coronavirus

Elanco Animal Health spokeswoman Keri McGrath said in a statement that the company stands by the safety of Seresto collars, and there is no medical or scientific basis to cancel the registration of the collar.

The company is "disappointed this is causing confusion and unfounded fear for pet owners trying to protect their pets from fleas and ticks," she said.

McGrath said more than 80 countries have rigorously reviewed and approved the product, and that incident report numbers are "raw data" that cannot be used to draw conclusions on what caused adverse incident reports.

"Thorough investigation of available data has shown no established link between exposure to the active ingredients in Seresto and pet deaths," she said.

Elanco Animal Health, a former subsidiary of Eli Lilly and Co., did not immediately respond to a request for comment. Elanco purchased German pharmaceutical giant Bayer's animal health division in 2019 for $7.6 billion. In its 2019 annual report, German agribusiness and pharmaceutical company Bayer reported revenue of more than $300 million on Seresto alone. In previous interviews, Elanco has said that it has reviewed the 1,698 incident reports related to pet deaths and found no link between the collars and the deaths.

Pesticide approval problems

The U.S. Environmental Protection Agency is in charge of regulating products containing pesticides, and conducts registration review of chemicals every 15 years.

Seresto collars, which are supposed to work for eight months by frequently expelling a pesticide onto a pet's fur, contain two active ingredients: flumethrin and imidacloprid.

A watchdog group has petitioned the EPA to ban popular Seresto flea collars after reports of pet deaths.

Imidacloprid is a member of the neonicotinoid class of insecticides, which are the most widely used in agriculture. Much of the registration focused on agricultural uses, though imidacloprid is frequently used in pet flea and tick treatments. Imidacloprid and most neonicotinoids are banned in the European Union because of their links to massive die-offs of non-target insects such as bees.

Flumethrin is a pyrethroid insecticide that is only used in one product: Seresto.

Both pesticides are in the final stages of re-approval. Many of the studies the EPA approval is based on are conducted by the company that sells the product.

The petition argues that the EPA underestimated the danger of the collar in its approval of both pesticides.

For example:

▶ Epidemiological studies of both pesticides found that when pregnant women are exposed to the chemicals, their children have an elevated risk of autism spectrum disorder.

▶ Despite a Bayer study emphasizing the two chemicals "synergy," or the toxic effects caused by the mixing of the pesticides, the agency only looked at each chemical individually when approving Seresto.

▶ In a 2017 risk assessment for imidacloprid, the agency relied on toxicity studies on rats to determine that the chemical is safe for dogs, despite studies showing that dogs are more sensitive than rats at one-seventh the dose.

▶ In a 2017 risk assessment, the EPA determined that children exposed to imidacloprid in pet collars could be at risk. However, after the assessment, Bayer Animal Health submitted two new studies that lowered the likelihood that

children would be exposed. One of these studies was conducted on rats using an agricultural seed treatment, rather than a pet collar.

The petition also includes copies of a handful of complaints filed by pet owners and veterinarians about Seresto with the National Pesticide Information Center and Food and Drug Administration.

Company says incident rates are low
Under federal pesticide laws, companies must submit incident reports associated with products to the EPA. Often, the company receives the complaint via customer service and then later forwards the complaint numbers to the EPA.

The Center for Biological Diversity argues that this leads to an underreporting of incidents, but Elanco and associated veterinarians argue it could inflate the number of adverse incident reports because the reports show correlation, not causation.

In a recent interview, Renee Schmid, a senior veterinary toxicologist at the Pet Poison Helpline and SafetyCall International, said she is "very comfortable with the safety profile with both of these ingredients."

Schmid said the Pet Poison Helpline has received 400 calls about Seresto in the past five years and about 9 out of 10 involve a pet ingesting the collar. Most of those pets were vomiting or had diarrhea.

Elanco recommended that the Midwest Center and USA TODAY speak with Schmid. Elanco frequently hires SafetyCall International to assess the safety of Seresto, as well as other products.

Schmid said one of her colleagues did a review of incidents related to Seresto and found that it was unlikely Seresto caused the 1,698 deaths.

"We feel the likelihood of a true fatality being due to the ingredients in a Seresto collar would be very, very low," Schmid said.

With more than 25 million collars sold, the overall incident review rate is also low, Schmid said. In a press release, Elanco said it has an incident rate of 0.3%, meaning one-in-300 dogs has a reported issue. Most of those are hair loss, the company has said.

Water

The Kansas City Star: Wastewater rates will keep going up in Kansas City, but less under new deal with EPA; April 8th, 2021 by Steve Vockrodt

https://www.kansascity.com/news/local/article250525539.html

Wastewater rates for Kansas City residents and businesses will continue to go up under a new agreement with a federal agency, but less than originally anticipated.

Kansas City officials reached a new deal with the U.S. Environmental Protection Agency and the Justice Department that is expected to lower the cost of a federally mandated project to overhaul the city's sewer system.

Kansas City leaders this week touted the new agreement, which has been a long-sought goal at City Hall.

"When I came into office, renegotiation of the EPA consent decree was a top priority," Kansas City Mayor Quinton Lucas said in a statement. "Since August 2019, I have met with our federal elected officials, administrators and rate payers with concerns about being able to afford their increasing bills."

As a result, Kansas City residents are expected to see annual wastewater rate increases of no more than 6% through 2035. Before this latest agreement, yearly wastewater rate increases of between 8% and 13% were planned for the next 14 years.

It's not uncommon to hear complaints from Kansas City residents about the increases in their water and wastewater rates, which show up together on the same bill every month. Water and sewer bills used to be easy payments to make.

But Kansas City for decades relied on an outdated combined sewer system that had a knack for spilling sewage into rivers when heavy rains burdened the city's sewers.

The EPA and the Justice Department reached an agreement with Kansas City in 2010 that required the city to fix and modernize its sewers. It was up to the city to figure out how to pay for it.

City Hall's main plan to fund the expensive sewer overhaul — at a projected cost of $5 billion — was to pass the cost onto residents and businesses through rate increases.

In 2011, the average residential water, sewer and storm water bill was $58.81. At that time, water was the largest segment of that average bill, accounting for $30.74, or just more than half of the cost to residents. The average sewer charge was $25.57.

Nowadays, the average combined water and sewer bill is $103.89 a month. Sewer charges have primarily driven the increase in monthly bills. The average sewer charge now is $63.47, good for a 148% increase since fiscal year 2011.

The bill increases alarmed not only residents but political leaders. In 2018, Missouri Sen. Roy Blunt and then-Sen. Claire McCaskill, as well as Rep. Emanuel Cleaver, asked the Trump Administration to approve modifications to Kansas City's agreement with the EPA.

On Jan. 15, the Justice Department proposed an amendment of its agreement with Kansas City in federal court, which in March was approved by Judge Gary Fenner of the U.S. District Court for the Western District of Missouri.

"I'm glad that the changes announced will bring relief to those who need it most without hampering Kansas City's progress in completing the largest public works project in its history," Blunt said in a statement.

Kansas City's revised consent decree with the EPA allows the city to use newer, greener technology to reduce sewage overflows at a reduced overall cost.

Yes, please, get it to us as soon as you can. Thanks.

Also, OGC has completed review of all other fact sheets. Their comments are coming to OPP and OPPT as soon as we receive them from OCFO.

Subject: OCSPP HFS Return: OCSPP-25 (Seresto).

Hi Dan and Khanh:

Thanks so much for the HFS! So far, we're going well and most have minor edits that do not require any further NPM action.

That said, for Seresto, we do have a return vis-à-vis the Talking Points (see attached). The Background and Key Points are great, but given the high visibility nature of Seresto, like many others with EJ issues or high Congressional scrutiny coming up in these Hearings, we think the Talking Points need some re-wording to both highlight the value of OPP, while acknowledging citizen and professional action and reporting on the issue. Also, to the extent that the Talking Points can give a timeline, clearer explanation of the current status and how the EU is doing on this (as a comparison), that would be useful.

Guidance in comments in the attached. I would be glad to discuss further by phone or e-mail.

Thanks!

Then I would leave it vague and just say specific timeframe without an example. The registrant shouldn't be learning about the expectations from a budget hearing.

As to recommended timing for the letter itself, I suggest requiring them to submit a plan within 10 days, with the actual, full data submission within 30 days. They can always request an extension.

Best,
Catherine

On Apr 12, 2021, at 3:47 PM, Saunders, Jennifer <Saunders.Jennifer@epa.gov> wrote:

Hi Catherine, one quick follow up:

Re: the language about the 6a2 letter timing for when the company will have to submit the data, do you have any thoughts? The letter that is currently going through review has a 10 day due date, after talking to David he thinks a month or two is more reasonable, and currently in this one pager it says 8 weeks (which seems long to me). Do we want to commit to a time frame for submission now, as the 6a2 letter hasn't gone all the way up the chain yet? If not, should we change the one pager language to something more vague like "One we issue the directive to the company, they will have to submit the requested information within a specific timeframe (e.g., 8 weeks)."?

Thanks, just want to be sure that nuance wasn't missed!

Hi Dan and Khanh:

Thanks so much for the HFS! So far, we're going well and most have minor edits that do not require any further NPM action.

That said, for Seresto, we do have a return vis-à-vis the Talking Points (see attached). The Background and Key Points are great, but given the high visibility nature of Seresto, like many others with EJ issues or high Congressional scrutiny coming up in these Hearings, we think the Talking Points need some re-wording to both highlight the value of OPP, while acknowledging citizen and professional action and reporting on the issue. Also, to the extent that the Talking Points can give a timeline, clearer explanation of the current status and how the EU is doing on this (as a comparison), that would be useful.

Guidance in comments in the attached. I would be glad to discuss further by phone or e-mail.

Thanks!

Hi Catherine,

Our draft response to the latest comments on the Seresto one-pager are attached. The clean version is *almost all clean, though we have one comment in there for you on providing a time estimate for our response/action.

Thank you to Cathryn and Melanie for providing support on this!

Please let us know if you have any questions.

US EPA administrator directs agency to focus on environmental justice

Terry Hyland, Chemical Watch

https://chemicalwatch.com/245761/us-epa-administrator-directs-agency-to-focus-on-environmental-justice

EPA Administrator Michael Regan has directed the agency to consider environmental justice in its actions and planning, a move that could lead to more aggressive measures to address chemical exposures that disproportionately affect vulnerable populations.

"Too many communities whose residents are predominantly of colour, Indigenous or low-income continue to suffer from disproportionately high pollution levels and the resulting adverse health and environmental impacts," Mr Regan said on 7 April.

The directive lays out four main steps for EPA programme offices to take, including incorporating environmental justice when assessing impacts to "pollution-burdened, underserved and tribal communities in regulatory development processes".

The new focus could impact the TSCA evaluations of the next 20 high-priority substances as well as its review of ten already-completed. It also could affect the agency's development of risk management rules, with a closer look at 'fenceline' communities located near chemical facilities and other groups with greater susceptibility to chemicals of concern.

It comes just two weeks after acting chemicals office chief Michal Freedhoff said her office would increase its engagement with relevant communities and tailor its risk-based approaches to addressing risks to them.

An EPA spokesperson said the agency "is actively working to ensure the agency's TSCA efforts consider environmental and health effects on environmental justice communities, including minority and low-income populations".

"EPA will work to ensure environmental justice considerations are included within TSCA's process of identifying and addressing unreasonable risk – as the law explicitly told the agency to do," the spokesperson said.

The agency said it would keep stakeholders updated as "next steps are determined".

Wastewater Leak at Florida Plant Fuels Federal Oversight Debate

Pat Rizzuto, Sylvia Carignan, Jennifer Kay, Bloomberg Law

https://news.bloomberglaw.com/environment-and-energy/wastewater-leak-at-florida-plant-fuels-federal-oversight-debate

The EPA—not states—should regulate fertilizer waste storage sites, environmental groups say, pointing to problems like those in Florida where a leak in a reservoir wall nearly unleashed millions of gallons of wastewater.

The vast pools of acidic, radioactive wastewater are "environmental disasters waiting to happen," said Jaclyn Lopez, senior attorney with the Center for Biological Diversity's Florida office.

Such pools sit atop huge piles of wastes generated by fertilizer production at about 70 sites across the country, including the Piney Point facility in Manatee County, Fla., near Tampa Bay.

The center and 16 other environmental groups in Florida, Louisiana, Texas, and other states petitioned the Environmental Protection Agency in February to regulate the wastes as hazardous under the Resource Conservation and Recovery Act.

The petition was filed under the Toxic Substances Control Act. It also asked the agency to use the chemical law's authorities to evaluate health and environmental risks of phosphogypsum and process wastewater, which are generated by fertilizer production; to require companies to carry out new tests; and to prevent the waste from being reused.

"EPA is reviewing the petition and will respond as appropriate," the agency said in an email. TSCA's deadlines give the agency until early May to make a decision.

'Not Representative'

The 480-million-gallon Piney Point phosphate plant reservoir began leaking late last month, according to the state's emergency order. A breach over the weekend prompted evacuation orders for more than 300 residents and a governor's office declaration of a state of emergency, although the orders have since been lifted.

Florida's Department of Environmental Protection plans to close the entire Piney Point site, not just the leaking pond, department Secretary Noah Valenstein told a state House committee Wednesday.

That doesn't resolve the broader problem, Lopez said. If the reservoir that has threatened to flood areas near Florida's Tampa Bay "isn't a catastrophe, there will be another one," she said.

But Kathy Mathers, vice president of public affairs for the Fertilizer Institute, said the Piney Point ponds "are not representative of modern phosphate fertilizer plant phosphogypsum stacks and pond systems," which she said are tightly regulated and don't need the additional controls that the petitioners are seeking.

Naturally occurring radioactive materials such as uranium, thorium, and radium can be in fertilizer waste, according to the EPA. Tests, however, have shown the pond's water isn't radioactive, state officials have said.

Instead, the primary concern has been about the spills' potential to cause problems such as algae blooms, a widespread problem in many areas.

The potential environmental contamination from the evolving situation on Florida is deeply troubling, said Richard E. Engler, director of chemistry at the Bergeson & Campbell PC law firm, which wrote a commentary on the petition. But "TSCA is not an efficient way to manage the issue," he said.

He cited the number of years it would take to get the wastes in the queue to be reviewed under TSCA and then regulated; their absence from the official list of chemicals that are or have been in U.S. commerce and subject to the chemicals law; and the possibility that the agency can't ban the road-use of the material using the particular

type of regulation that the petition seeks.

Sinkholes, Fish Kills
About five tons of phosphogypsum waste is produced for every ton of phosphoric acid that fertilizer manufacturers make to produce phosphate fertilizer, according to the EPA. The agency exempted the materials from RCRA regulation in a 1991 rule excluding other mining wastes.

Phosphogypsum can be used as a fertilizer if its radioactivity level is low enough, the EPA said. And last year, the agency approved a Fertilizer Institute request and allowed government road construction projects to use the material.

The Center...

EPA Issues Conclusions on 'Forever Chemical's' Health Effects

Pat Rizzuto, Bloomberg Law

https://news.bloomberglaw.com/environment-and-energy/epa-issues-conclusions-on-forever-chemicals-health-effects

The EPA released final conclusions Thursday on ways that one of the newer "forever chemicals" could affect people's health and how much of it is needed to cause problems.

Evidence from animal studies shows perfluorobutane sulfonic acid (PFBS) can harm the thyroid hormone's function, development, and the kidney, the Environmental Protection Agency concluded. It also concluded that the thyroid hormone, which is critical for human development and organs including the heart, is the most sensitive part of the body, meaning the smallest doses of PFBS could affect it.

The findings don't directly affect any regulation, but regulatory offices with the agency and states use them to decide whether people's exposures warrant some kind of action.
EPA released the findings in a document that replaces one that was removed from its website in February over concerns about scientific political interference.
PFBS is a replacement for perfluorooctane sulfonic acid (PFOS), one of the two most well-known and concerning members of the huge group of per- and polyfluoroalkyl substances, or PFAS, often dubbed "forever chemicals" due to the persistence of some. The 3M Co., the primary U.S. manufacturer, voluntarily phased out PFOS in 2002.

TSCA test orders expected for 11 remaining high-priority chemicals

Kelly Franklin, Chemical Watch

https://chemicalwatch.com/246364/tsca-test-orders-expected-for-11-remaining-high-priority-chemicals

The US EPA is expected to mandate testing for 11 high-priority substances undergoing TSCA risk evaluations that were excluded from an earlier batch of test orders, according to two former agency officials.

The move would represent another step forward in the agency's effort to use its expanded authority under the amended TSCA to require industry to fill data gaps for existing chemicals, a trend which is expected to increase in the coming months.

In January, the EPA issued TSCA section 4 test orders for nine of the next 20 high-priority substances subject to risk evaluation, requiring the submissions of data on potential environmental hazards and occupational exposures posed by the substances.

"I am assuming that test orders will be issued for the remaining 11 high-priority chemicals," said David Fischer, who recently joined Keller and Heckman from his previous role as the deputy assistant administrator for the EPA's Office of Chemical Safety and Pollution Prevention (OCSPP).

"They were under development last year, I assume they are still under development," he said during a 7 April webinar hosted by the law firm, adding that the orders have likely been delayed due to the transition to the new administration.

The EPA did not confirm the status of the test orders. A spokesperson said the agency is "taking a comprehensive look at all of the tools at our disposal to gather and require development of additional chemical information, including test orders".

But former OCSPP assistant administrator, Alexandra Dunn, told Chemical Watch she does not expect the exercise would be controversial. "I don't think it should be a political issue, because it's very much driven by the staff that are gathering the information".

"Developing test orders takes some time and resources", said Ms Dunn, who is now a partner at Baker Botts. EPA staff grouped orders for nine substances and released them under the previous administration, with orders for the remaining 11 "in development and trailing behind, but not by far".

'Clock is ticking'

The timeline for the potential orders remains uncertain, but both Mr Fischer and Ms Dunn said they would expect them to be issued sooner rather than later, given the three and a half year timeline for completing risk evaluations.

"You need that data to come in so it can be useful, and can be incorporated into the agency's analysis", said Ms Dunn.

"I would expect that those will be issued this year because the clock is ticking," agreed Mr Fischer. "Waiting any longer would severely impact the timing to complete the risk evaluations."

The next batch of orders will likely seek occupational exposure data and possibly other data – such as toxicological, physicochemical information – depending on the chemical, Mr Fischer told Chemical Watch.

Ms Dunn noted that the orders would likely allow recipients to provide available data that is already on hand, as an alternative to running a new test.

Uptick in information collection
There were many administrative steps the EPA needed to take to get the infrastructure in place to begin issuing test orders, said Ms Dunn. With that framework established, the agency's test order authority "is going to become more routinely used".

And the EPA's data collection efforts are likely to go beyond test orders.

The EPA last year signalled plans to pursue a section 8(d) rule to require reporting on 20 high priority substances and 30 organohalogen flame retardants, and it is working to publish a one-time reporting rule for PFASs made or imported since 2011. Section 8(a) Preliminary Assessment Information Rule (PAIR) reporting mandates are also a possibility in the future.

And a recent reorganisation at the EPA's Office of Pollution Prevention and Toxics (OPPT) – which houses TSCA – gave rise to an entire branch focused on information needs: the data gathering and analysis division (DGAD).

Together, these efforts could result in larger data-gathering exercises becoming...

US litigation round-up

N/A, Chemical Watch

https://chemicalwatch.com/246432/us-litigation-round-up

Parties near settlement in asbestos reporting case
Plaintiffs in a legal battle over asbestos reporting have told the court that they "have made significant progress toward settlement" with the US EPA.

The court ruled in favour of the Asbestos Disease Awareness Organization (ADAO) and other petitioners in December 2020, ordering the EPA to amend its chemical data reporting (CDR) rule to close "loopholes" in asbestos reporting. Last month, however, the EPA filed a motion asking the court to "delete" the order. A hearing on the EPA's motion was scheduled for 15 April.

Now, however, plaintiffs in the case have asked the court to convert the hearing to a status conference, where the parties will be able "to update the court on the settlement framework we are discussing and obtain the court's guidance on certain issues".

Court pauses lawsuits challenging EPA rules on decaBDE, PIP 3:1
Three cases challenging two EPA risk management rules have been put on hold while the agency reviews regulations issued under the Trump administration.

The US Court of Appeals for the Ninth Circuit has agreed to a three-month pause on two separate cases challenging the EPA's TSCA risk management rule for decaBDE, one of five rules issued in December to address a group of persistent, bioaccumulative and toxic (PBT) substances. The proceedings are stayed until 1 July.

A separate federal appeals court also agreed to a longer delay in an industry challenge to the EPA's rule for the PBT PIP 3:1. This case is stayed until 7 October.

EPA Says High Court Ruling Limits Review Of Safety Agencies' TSCA Input

Maria Hegstad, Inside TSCA

https://insideepa.com/tsca-news/epa-says-high-court-ruling-limits-review-safety-agencies-tsca-input

EPA is invoking a new Supreme Court decision that limits disclosures of "deliberative" communications between federal agencies in its bid to block federal judges hearing the suit over its TSCA evaluation of methylene chloride from considering comments from two work-safety agencies that environmentalists say show key flaws in the assessment.

In an April 5 brief, EPA argues that the high court's March 4 decision in U.S. Fish and Wildlife Service (FWS) v. Sierra Club, a Freedom of Information Act (FOIA) case, means interagency comments filed midway in a rulemaking process -- like those the Occupational Safety and Health Administration (OSHA) and National Institute for Occupational Safety and Health (NIOSH) filed on a draft version of the methylene chloride evaluation -- are "deliberative" and not part of the public record.

"The Court concluded that a draft [FWS] biological opinion reflected the Service's 'preliminary view,' rather than its final action, and was therefore deliberative," EPA writes. "Sierra Club confirms the OSHA and NIOSH comments are deliberative and properly excluded from the administrative record here."

In Neighbors for Environmental Justice (NEJ), et al., v. EPA, which is pending in the U.S. Court of Appeals for the 9th Circuit, EPA is fighting environmentalists' request to "complete the administrative record" with interagency comments OSHA and NIOSH sent to the agency regarding an early draft of the risk evaluation of the common solvent methylene chloride.

Since methylene chloride was the first evaluation of an existing chemical that EPA finalized under the revised Toxic Substances Control Act (TSCA), NEJ marks the first court challenge to the Trump administration's approach to those evaluations.

Thus, the 9th Circuit's decision could set a landmark precedent not only on sweeping questions of how the agency conducts its reviews and the law's reach but also which issues courts can consider in litigation over them, including interagency comments.

NEJ and its allies say the safety agencies' comments are vital because they include "factual statements about [personal protective equipment (PPE)] use and refutations of the risk evaluation that are not mentioned anywhere in the record."

And while EPA has argued that the petitioners' summaries of the documents should suffice for judicial review, they say the court must consider the original documents.

"The OSHA and NIOSH comments are needed so the Court can review material EPA referenced in its risk evaluation and determine whether EPA's description of those agencies' policies are consistent with their own

accounts. EPA claims that, because Petitioners' risk evaluation comments and other materials in the record describe the inconsistencies between EPA's risk evaluation and OSHA and NIOSH policy, including the OSHA and NIOSH comments in the record is unnecessary," the environmentalists argued in their motion to complete the record.

"But a third party's description of a federal agency's position is not the same as a direct statement from the agency itself," they added.

'Deliberative' Not 'Final'

However, EPA counters in its new brief that the OSHA and NIOSH comments on the draft evaluation "are also deliberative, not 'final' under Sierra Club's standard. They are internal, staff-level comments on what action EPA should take. They do not 'embody a final decision,' . . . by either EPA, OSHA, or NIOSH."

At issue in Sierra Club was whether FWS and the National Marine Fisheries Service were required by the Freedom of Information Act to turn over draft biological opinions they prepared for EPA's Clean Water Act (CWA) cooling water rule, with a 7-2 majority holding that the drafts fell into the FOIA's "deliberative process" exemption because they "reflect a preliminary view -- not a final decision" on the matter at hand.

EPA says in its new filing that the OSHA and NIOSH comments not only fall into the same category of an agency's "preliminary view," but are...

Fischer Says EPA TSCA Process 'Not Sustainable' As Workload Escalates

Maria Hegstad, Inside TSCA

https://insideepa.com/tsca-news/fischer-says-epa-tsca-process-not-sustainable-workload-escalates

The former deputy chief of the Trump EPA's chemicals office says the way it conducted the first 10 TSCA chemical evaluations is "not sustainable" in the long term, warning that staff constraints and the structure of the 2016 law meant officials had little opportunity to plan for its requirement last year to double the number of chemicals under review.

"One of the things I was working on was how do we create a new risk evaluation 2.0 [because] what we did for the first 10 [TSCA evaluations is] not sustainable for the next 25," David Fischer, who served as deputy assistant administrator in the Office of Chemical Safety and Pollution Prevention (OCSPP) from 2019-21 and is newly of counsel at the law firm Keller and Heckman, told Inside TSCA in a recent interview.

He said OCSPP had little chance to develop a "sustainable" approach from the outset, thanks to what he described as a key flaw in Congress' 2016 reform of the Toxic Substances Control Act (TSCA): it provided no phase-in period for the agency to develop its new program before implementation deadlines started to arrive -- a flaw EPA officials have previously cited as contributing to the backlog of new-chemicals reviews that formed in the wake of TSCA reform.

Following passage of the new law, there was "no real opportunity for a full pause, pens down, let's take six months to figure this out. There was no time for that. Unfortunately, TSCA didn't anticipate that," Fischer said.

Instead, EPA's toxics office "went from an office that really didn't [do risk analysis] to an office trying to learn as it was doing this."

And Fischer notes that the analyses the new statute requires are "massively layered with modeling and all sorts of data streams and a lot of new things for staff that might have just been hired" to learn, but with little opportunity for the office to develop expertise in those new arenas before setting out procedures for fulfilling them.

That meant a focus on how to better prepare for the second batch of existing chemical evaluations, which EPA began last fall. And he said that in order to meet TSCA's three-year deadline, officials sought to do as much work as possible on the chemicals before formally prioritizing them for review, which starts that clock.

Officials intended that structure to ensure that the agency began and completed its evaluations within a reasonable amount of time, since EPA's other risk assessment programs have been notorious for delays. But it also left the office with limited flexibility to adjust to any surprises that arose during the prioritization process.

As revised, TSCA directs the agency to conduct a prioritization process for existing chemicals it believes require evaluation, during which it requests public information as well as data from industry and begins to consider the scope of any evaluation it might conduct. The process is directed to take nine to 12 months, and if the agency deems a chemical high priority for evaluation at the end, it must begin conducting an evaluation immediately.

In response, Fischer said he and other officials sought "to front-load the system, do as much [work] in the front end, talking to other offices, [asking staff there] does this chemical make sense, do you guys have a chemical you'd recommend -- all those discussions should happen long before you pull the trigger on [TSCA] prioritization. Once you're on that tram you're not getting off," he said.

He added that the TSCA prioritization process especially struggled to deal with unexpected gaps in data on a chemical, or a sudden request from other EPA offices for aid from OCSPP.

"I find that's a flaw in TSCA. There's no ability to say, 'That's not working,' or 'Another office has a need.' You can't do that. That puts on additional constraints," Fischer says. "Once a trigger is pulled it just keeps on moving. You can't collect new data. If you want to fill data needs, it'd be ideal to fill those before prioritization. Issues that arise...

Corteva Sheds Dicamba Herbicides

Emily Unglesbee, DTN Progressive Farmer

https://www.dtnpf.com/agriculture/web/ag/crops/article/2021/04/08/corteva-drops-second-dicamba-product

ROCKVILLE, Md. (DTN) -- Corteva Agriscience has pulled the plug on a new developmental dicamba product, the last in a series of moves over the past year to divest itself of controversial pesticides.

The company opted to end the EPA registration process underway for a novel dicamba herbicide containing a dicamba choline salt -- a different form of dicamba salt from any past or currently marketed dicamba herbicides.

"Corteva Agriscience has made a business decision to withdraw its developmental dicamba product from EPA consideration for registration," company Media Relations Manager Kacey Birchmier told DTN in an email. "The EPA registration process has not yet been completed for this submission."

The dicamba-choline product was an attempt to create a less-volatile formulation of dicamba, which continues to be implicated in widespread reports of off-target injury that have resulted in three EPA label revisions and many lawsuits against dicamba manufacturers Bayer and BASF. Corteva was moving ahead with the product's development last year, which included submitting it to EPA for registration -- a process the company has now voluntarily ended, Birchmier said. This appears to be the end of the road for the dicamba choline herbicide, without a clear buyer on the horizon.

"While Corteva routinely collaborates with third parties to commercialize products for the benefit of farmers and the market in general, this product concept has not received regulatory approval, nor has Corteva identified an interested licensee or collaborator," Birchmier said.

This marks the second move by the company to distance itself from the dicamba-tolerant Xtend cropping system. In February, Corteva announced it would be voluntarily discontinuing its sales of FeXapan, another dicamba herbicide based on Bayer's XtendiMax product, but marketed by Corteva. The company first sold the product in 2017, and even attempted to defend it in court after the Ninth Circuit Court of Appeals vacated its registration, along with two other dicamba herbicides, in June 2020.

Rat poison found rampant in eagles

Valerie Yurk, E&E News

https://www.eenews.net/greenwire/2021/04/08/stories/1063729507?utm_campaign=edition&utm_medium=email&utm_source=eenews%3Agreenwire

Researchers found rat poison in 82% of studied eagles, sparking concern that another widespread toxin could be killing the iconic raptors.

A common rodenticide works its way up the food chain by embedding itself in the tissues of intoxicated animals, putting the raptors who feed on affected animals at risk, according to a study published yesterday in PLOS ONE.

Mark Ruder, co-author and wildlife disease researcher at the University of Georgia, said that out of 133 examined eagles, they detected rat poison in 96 bald eagle and 13 golden eagle carcasses.

The rat poison works by disrupting normal blood clotting factors in the liver. Some of the eagles had proof of hemorrhaging in the liver — another sign of anticoagulant rat poison.

The eagles were also more likely to be found with a second-generation form of the rat poison that more aggressively attacks and sticks to tissues and is persistent up the food chain than the first-generation form.

The second-generation anticoagulant is infamous in wildlife conservation for being highly toxic to species it

wasn't intended to target.

"Since the second generation is more persistent in tissues, it's typical that a single feeding could be lethal," Ruder said. "It's just in what eagles eat — it's putting them at risk based on compounds being present in their food sources."

Ruder added that it is also a threat to any predator or scavenger — any unlucky dinner can lead to intoxication.

A 2014 study published in the Bulletin of Environmental Contamination and Toxicology found the same anticoagulants in the livers of red-tailed hawks and great horned owls. Other research in Spain found the poison in livers of two reptile species, 18 mammal species and 42 bird species, according to a 2012 study published in Science of the Total Environment.

But researchers are still trying to figure out how anticoagulant rat poison affects behaviors of intoxicated animals, or sublethal effects.

Ruder said they still don't know just how deadly the poison is to top-tier predators. In the study, only 4% of the studied eagles were determined to have died due to rodenticide intoxication, but Ruder says that's a fairly conservative number.

"We passively collected these carcasses, some of them died from a vehicle collision or a building collision, so even though they are intoxicated with anticoagulant rodenticides, we can't say their death is due to intoxication," he said. "It's quite possible their injuries were made much worse by the poison; all of these problems could interact."

He added that he "doesn't hang his hat on" the low death rate. What matters to him is confirming intoxication, which he says is warning enough to ramp up conservation efforts.

EPA has some regulations on second-generation anticoagulant rat poison, like only allowing professionals to purchase in bulk and mandating that it is placed where nontarget species can't access it. But to Ruder, the agency could do more to limit its distribution.

"If you went to the hardware store to purchase rat poison to use in our environment, we're accessing compounds, and the study shows our wildlife is still exposed," he said. "It certainly suggests we need to reevaluate what's being done for protection and if those are adequate."

Ruder said he would not be surprised if other versions of rat poisons, like some that attack the nervous system or add lethal amounts of calcium in the blood, were found up the food chain too.

Despite recent reports of eagle populations soaring after decades of decline, Ruder warns of pervasive rat poison intoxication not just in raptors, but in all higher-tiered species.

"Not all problems are associated with a decline in this moment," he said. "But we live in a changing world, and that might be different in 10 to 20 years; wildlife is constantly being affected, and it's important to not get complacent with wildlife health and be proactive."

Will 'Politically Motivated' Dicamba Decision be Overturned?

Julia Gerlach, No-Till Farmer

https://www.no-tillfarmer.com/articles/10501-will-politically-motivated-dicamba-decision-be-overturned

If you use dicamba, you're no doubt aware of the cancellation of three dicamba registrations as a result of a Ninth Circuit Court decision in June 2020. Two of the products in question — Bayer's XtendiMax with VaporGrip Technology, and BASF's Engenia herbicide — were re-approved by the EPA in October 2020, as was Syngenta's Tavium Plus VaporGrip Technology herbicide. The third dicamba formulation that had been cancelled — Corteva's FeXapan herbicide — has since been discontinued by the company.

On March 10, 2021, Michal Freedhoff, acting head of EPA's Office of Chemical Safety and Pollution Prevention (OCSPP) indicated in an internal memo that she believes the former EPA leadership was politically-motivated and cherry-picked data when approving the 2018 dicamba registrations. In the memo, she says, "In 2018, OCSPP senior leadership directed career staff to: (1) rely on a limited data set of plant effects endpoints; (2) discount specific studies (some with more robust data) used in assessing potential risks and benefits; and (3) discount scientific information on negative impacts. This interference contributed to a court's vacating registrations based on these and other deficiencies, which in turn impacted growers' ability to use this product."

A recent editorial in The Counter explores the impacts of this memo and questions the longevity of the late-2020 dicamba registrations, which extended the approvals for the herbicides for 5 years. With new lawsuits against the dicamba products already back in court and considering the current leadership's perspective on the previous administration, it's quite possible we'll see another reversal in the near future. Should that happen, what remains to be seen is how the Biden administration will respond.

Watchdog group petitions EPA to ban Seresto pet collar after thousands report harm

Johnathan Hettinger, USA Today

https://www.usatoday.com/story/news/investigations/2021/04/08/seresto-pet-collar-linked-reports-harm-epa-asked-ban/7137972002/

The Center for Biological Diversity filed a legal petition Thursday morning asking the U.S. Environmental Protection Agency to ban a popular flea and tick collar that has been linked to thousands of incident reports about pet and human harm.

The Seresto collar, developed by Bayer and now sold by Elanco, has faced increased scrutiny, including a Congressional inquiry and class action lawsuits, following a March story by the Midwest Center for Investigative Reporting and USA TODAY. The story found more than 75,000 incident reports of harm linked to the collar, including at least 1,698 pet deaths and almost 1,000 people harmed.

The Center for Biological Diversity, a national nonprofit conservation organization that acts as a watchdog of the EPA as part of its mission to protect endangered species, obtained those documents showing the widespread harm and shared them with the news outlets.

The group's petition, to which the EPA is required to respond, argues that the agency needs to take action to protect pets and people. Seresto has been the subject of more adverse incident reports than any other product in EPA history, according to EPA documents, yet the agency has not taken any action to inform the public of risks associated with the pesticide-based collar. The petition outlines how the EPA's registration decisions regarding the pesticides failed to protect pets and humans.

"Every day this is on the market, someone else might get poisoned," said Lori Ann Burd, environmental health program director for the Center for Biological Diversity.

The U.S. Environmental Protection Agency, which under federal law must decide whether the use of pesticides causes unreasonable adverse effects, did not immediately respond to a request for comment about the petition.

Burd said petitions have been filed over controversial pesticides in the past, including chlorpyrifos, a pesticide linked to brain damage in children, and tetrachlorvinphos, another pesticide often used in pet collars. The National Resource Defence Council originally petitioned to ban it in 2009. Neither pesticide has been banned, despite years of legal action.

Burd said the agency frequently ignores petitions, but organizations have a six-year statute of limitations to sue the agency to get them to respond.

The Biden administration has pledged to follow science in its decision-making and has raised concerns about Trump administration decisions that valued politics over science.

"If this administration wants to show it's different, this is the chance," Burd said.

Elanco Animal Health spokeswoman Keri McGrath said in a statement that the company stands by the safety of Seresto collars, and there is no medical or scientific basis to cancel the registration of the collar.

The company is "disappointed this is causing confusion and unfounded fear for pet owners trying to protect their pets from fleas and ticks," she said.

McGrath said more than 80 countries have rigorously reviewed and approved the product, and that incident report numbers are "raw data" that cannot be used to draw conclusions on what caused adverse incident reports.

"Thorough investigation of available data has shown no established link between exposure to the active ingredients in Seresto and pet deaths," she said.

Elanco Animal Health, a former subsidiary of Eli Lilly and Co., did not immediately respond to a request for comment. Elanco purchased German pharmaceutical giant Bayer's animal health division in 2019 for $7.6 billion. In its 2019 annual report, German agribusiness and pharmaceutical company Bayer reported revenue of more than $300 million on Seresto alone. In previous interviews, Elanco has said that it has reviewed the 1,698 incident reports...

Undercutting EPA Approach, CDC Downplays Disinfection To Stem COVID

Diana DiGangi, Inside TSCA

https://insideepa.com/tsca-news/undercutting-epa-approach-cdc-downplays-disinfection-stem-covid

The Centers for Disease Control and Prevention (CDC) has issued new guidance that says intensive disinfection "is likely not needed" to prevent COVID-19 infections, changing course from prior guidance that put an emphasis on the practice -- an emphasis that helped drive EPA's recent focus on disinfectant reviews and enforcement.

"In most situations, cleaning alone removes most virus particles on surfaces," reads an April 5 CDC guidance on home cleaning, which goes on to say that "[d]isinfection to reduce transmission of COVID-19 at home is likely not needed unless someone in your home is sick or if someone who is positive for COVID-19 has been in your home within the last 24 hours."

Similarly, a separate guide for facilities says "cleaning once a day is usually enough to sufficiently remove virus that may be on surfaces and help maintain a healthy facility," and disinfection with EPA-approved chemicals is only necessary within 24 hours of exposure to a known or suspected COVID-19 carrier.

That marks a substantial shift from prior guidance that urged frequent surface disinfection using "List N" products that EPA had found to be specifically effective against the coronavirus.

Those guides emphasized "safe cleaning and disinfection practices to prevent SARS-CoV-2 transmission" and warned against off-label use of disinfectants after a CDC study showed a spike in calls to poison control centers due to increased use of the chemicals.

CDC's focus in turn drove the agency to devote new resources to its oversight of those products, both speeding approvals for those judged effective against COVID-19 and stepping up enforcement over allegedly false claims that a substance can kill the coronavirus.

EPA spent much of 2020 bolstering its List N program, researching new methods of disinfecting surfaces such as with ultraviolet light, and easing Federal Insecticide Fungicide and Rodenticide Act (FIFRA) rules in order to make sure that disinfectants effective against the coronavirus would continue to be available even as consumer demand spiked.

For instance, it set up an expedited review process for "durable" disinfectants, ultimately issuing a first-time nationwide approval for use of certain copper alloys to provide long-term protection against the virus that causes COVID-19.

And earlier in the pandemic, the agency announced that it would permanently allow makers of certain disinfectants to bypass some reporting requirements, alongside a temporary policy allowing manufacturers that use a certain set of active ingredients to source those substances from any supplier.

It has also issued a series of "stop sale" orders under FIFRA aimed at products it says are improperly claiming effectiveness against COVID-19, leading to a novel court challenge by a firm that says it has been targeted by one such order -- and which has called the strategy an act of "bureaucratic panic" in the face of a public-health emergency.

Chemical Exposures

But environmentalists urged EPA and other agencies to reconsider that approach, raising concerns that an emphasis on disinfection would increase the public's exposure to toxic chemicals like quaternary ammonium, but even after the transition to President Joe Biden's administration the agency was seen as maintaining or even

expanding the Trump-era approach.

"EPA's job is to review these materials, but the way they have pushed what they're doing has made the focus on using a toxic chemical on all these surfaces, as opposed to what I think is the more urgent problem of dealing with ventilation and airflow in buildings," Terry Shistar, a science advisor and board member of the environmental group Beyond Pesticides, told Inside TSCA in a November interview.

Shistar said that because the virus is airborne, inhalation rather than surface exposure is the most likely vector for infection, meaning "EPA's approach focuses on the wrong issue" -- a criticism the new CDC guidance appears to support.

He also argued...

The C.D.C. acknowledges what scientists have been saying: The risk of virus infection from surfaces is low.

Emily Anthes, New York Times

https://www.nytimes.com/live/2021/04/08/world/covid-vaccine-coronavirus-cases/the-cdc-acknowledges-what-scientists-have-been-saying-the-risk-of-virus-infection-from-surfaces-is-low

When the coronavirus began to spread in the United States last spring, many experts warned of the danger posed by surfaces. Researchers reported that the virus could survive for days on plastic or stainless steel, and the Centers for Disease Control and Prevention advised that if someone touched one of these contaminated surfaces — and then touched their eyes, nose or mouth — they could become infected.

Americans responded in kind, wiping down groceries, quarantining mail and clearing drugstore shelves of Clorox wipes. Facebook closed two of its offices for a "deep cleaning." New York's Metropolitan Transportation Authority began disinfecting subway cars every night.

But the era of "hygiene theater" may have come to an unofficial end this week, when the C.D.C. updated its surface cleaning guidelines and noted that the risk of contracting the virus from touching a contaminated surface was less than 1 in 10,000.

"People can be affected with the virus that causes Covid-19 through contact with contaminated surfaces and objects," Dr. Rochelle Walensky, the director of the C.D.C., said at a White House briefing on Monday. "However, evidence has demonstrated that the risk by this route of infection of transmission is actually low."

The admission is long overdue, scientists say.

"Finally," said Linsey Marr, an expert on airborne viruses at Virginia Tech. "We've known this for a long time and yet people are still focusing so much on surface cleaning." She added, "There's really no evidence that anyone has ever gotten Covid-19 by touching a contaminated surface."

During the early days of the pandemic, many experts believed that the virus spread primarily through large respiratory droplets. These droplets are too heavy to travel long distances through the air but can fall onto objects and surfaces.

In this context, a focus on scrubbing down every surface seemed to make sense. "Surface cleaning is more familiar," Dr. Marr said. "We know how to do it. You can see people doing it, you see the clean surface. And so I think it makes people feel safer."

But over the last year, it has become increasingly clear that the virus spreads primarily through the air — in both large and small droplets, which can remain aloft longer — and that scouring door handles and subway seats does little to keep people safe.

"The scientific basis for all this concern about surfaces is very slim — slim to none," said Emanuel Goldman, a microbiologist at Rutgers University, who wrote last summer that the risk of surface transmission had been overblown. "This is a virus you get by breathing. It's not a virus you get by touching."

The C.D.C. has previously acknowledged that surfaces are not the primary way that the virus spreads. But the agency's statements this week went farther.

"The most important part of this update is that they're clearly communicating to the public the correct, low risk from surfaces, which is not a message that has been clearly communicated for the past year," said Joseph Allen, a building safety expert at the Harvard T.H. Chan School of Public Health.

Catching the virus from surfaces remains theoretically possible, he noted. But it requires many things to go wrong: a lot of fresh, infectious viral particles to be deposited on a surface, and then for a relatively large quantity of them to be quickly transferred to someone's hand and then to their face. "Presence on a surface does not equal risk," Dr. Allen said.

In most cases, cleaning with simple soap and water — in addition to hand-washing and mask-wearing — is enough to keep the odds of surface transmission low, the C.D.C.'s updated cleaning guidelines say.

Invertebrates and Plants Face Increasing Threat from Pesticides Use, Despite Declining Chemical Use Patterns

N/A, Beyond Pesticides

https://beyondpesticides.org/dailynewsblog/2021/04/invertebrates-and-plants-face-increasing-threat-from-pesticides-use-despite-declining-chemical-use-patterns/

Pesticide use threatens aquatic and terrestrial invertebrates and plants more than ever, despite declining chemical use and implementation of genetically engineered (GE) crops in the U.S., according to a University Koblenz-Landau, Germany study. Since the publication of Rachel Carson's Silent Spring (1962), many environmental agencies have banned the use of pesticides like organochlorines, organophosphates, and carbamates for their devastating toxic—sometimes lethal—effects, particularly on vertebrates, including humans. However, this ban created a pathway for a new generation of pesticides (e.g., neonicotinoids, pyrethroids) to take hold. Although these pesticides are more target-specific, requiring lower chemical concentrations for effectiveness, they have over double the toxic effects on invertebrates, like pollinators.

Invertebrates and plants are vital for ecosystem function, offering various services, from decomposition to supporting the food web. Furthermore, invertebrates and plants can act as indicator species (bioindicators) that scientists can observe for the presence and impact of environmental changes and stressors. Therefore, reductions in invertebrate and plant life have implications for ecosystem health that can put human well-being at risk. Study lead author Ralf Schulz, PH.D., notes, "[This study] challenge[s] the claims of decreasing environmental impact of chemical pesticides in both conventional and GM [genetically modified or genetically engineered (GE)] crops and call for action to reduce the pesticide toxicity applied in agriculture worldwide."

Study researchers used data from the U.S. Geological Survey to determine national pesticides use by U.S. farmers over 25 years (1992 to 2016). To assess pesticide toxicity, researchers used U.S. Environmental Protection Agency (EPA) data on species-specific toxicology thresholds. Lastly, researchers compared the species-specific toxicology threshold data, a calculation for the point at which a substance might harm vegetation or wildlife, to the amount of real-world pesticide concentration on farms.

The study results find a decrease in total pesticide amounts by volume on U.S. farms by 40 percent over the last 25 years. Although bird and mammal toxicity decreases with a reduction in pesticide use (95 percent), invertebrates experience higher toxicity levels. Pyrethroid insecticides cause toxicity to double among aquatic invertebrates. Neonicotinoid insecticides present double the risk to terrestrial invertebrates. Overall, pesticide toxicity for terrestrial plants is highest regardless of whether fields are conventional, non-GE, or GE.

Pesticide residues readily contaminate all ecosystems and are prevalent in soils, water (solid and liquid), and the surrounding air. Scientific literature demonstrates pesticides' long history of adverse effects to the environment, including wildlife, biodiversity, and human health effects. However, many of these chemicals are older classifications that are more stable and promptly accumulate in the environment and animal tissue. Organophosphates and carbamates impact immune and metabolic function among vertebrates as their mode of action inhibits acetylcholinesterase enzyme activation. Organochlorines induce similar effects on vertebrates' immune and metabolic systems, but their mechanisms driving mode of action are poorly understood. These pesticides can bioaccumulate and produce severe toxicity outcomes among vertebrates. Therefore, many of these chemicals are phasing out from both commercial and industrial use. However, there is a misconception that the "newer generation" of chemicals, including pyrethroids, sulfoxaflor, fipronil, and neonicotinoids (neonics), are safer. These insecticides are fast-acting, with quick breakdown times, thus less likely to readily accumulate. However, studies find lower concentrations of these chemicals are more toxic than their older counterparts, requiring several kilograms less. These...

Legal Petition Calls On EPA to Cancel Seresto Flea Collar Linked to Deaths of Nearly 1,700 Pets

N/A, Center for Biological Diversity

https://biologicaldiversity.org/w/news/press-releases/legal-petition-calls-on-epa-to-cancel-seresto-flea-collar-linked-to-deaths-of-nearly-1700-pets-2021-04-08/

WASHINGTON— The Center for Biological Diversity filed a formal legal petition today urging the Environmental Protection Agency to cancel the registration of the Seresto flea and tick collar linked to the deaths of nearly 1,700 pets.

The EPA has received more than 75,000 complaints linking the flea collar to harms ranging from skin irritation

to death of pets. But the agency has taken no action to investigate the reports, recall the product or issue a nationwide warning to the public of its potential dangers.

The EPA has defended its track record on the Seresto collar by claiming that the reports, which also include complaints of harm to people, may not be valid. Yet the agency has made no effort to determine the validity of the reports or investigate them.

"It's disgusting that even after 75,000 reports of pets suffering and even dying the EPA chose to do nothing at all," said Lori Ann Burd, environmental health director at the Center. "Enough is enough. It's time for the EPA to own its failures and cancel this product before any more harm occurs."

Seresto collars are plastic bands impregnated with insecticides that are released over time and coat an animal's fur. The active ingredients of the flea collar are imidacloprid and flumethrin.

Imidacloprid is widely used in the United States and is among the neonicotinoid pesticides widely implicated in declines of pollinator populations. Flumethrin is a pyrethroid that has been shown to have troubling health impacts on dogs, cats and humans. When combined, imidacloprid and flumethrin are believed to have synergistic effects that make them even more toxic to fleas and ticks and, potentially, to pets and people.

Today's petition argues that Seresto must be cancelled because it poses an unreasonable risk to human health, pets and the environment. No other pesticide product has been the subject of this many incident reports, which include 1,698 complaints linking the product to pet deaths and nearly 700 involving harm to people.

"The massive scale of suffering the EPA has quietly ignored while allowing this product to be widely sold is astounding," said Burd. "If the EPA wants to show that it has really changed under the new administration and has recommitted to its mission of using the best available science to protect human health and the environment, then it must act to expeditiously cancel its approval of this troubling product."

URGENT – please see Rick's comment on the following Fact Sheets – which need to be revised NLT Monday 10 am.

- PFAS
- AEZ
- Glyphosate
- Chlorpyrifos
- Atrazine
- EtO
- Oxitec
- Seresto

Please provided revised FSs in both tack changes and clean versions as soon as completed so we can forward when ready.

Also referring to the note below about TSCA's FSs and Michal's comments, similar comments are made by Rick in some of OPP's FSs - "*On some of the TSCA fact sheets, Michal had a comment about how the outcomes of litigation would impact next steps. However we address her comment on that point in the TSCA fact sheets should also be included here.*" Please take particular attention to these where commented. Thanks

Subject: DAA Comments on OPP Fact Sheets

Good afternoon,

We received comments back from the first tranche of fact sheets sent to Michal, all of which were OPPT. In some cases, Michal requests a pivot in the presentation of some of our information. The first attachment for methylene chloride (OPPT) is provided as an example of those comments as well as the paragraph pasted further below. Please use this information to help inform your revisions.

The remaining 8 attachments include comments from Rick, some of which refer to Michal's early comments to OPPT/TSCA fact sheets.

We continue to be under a very tight timeline to clear fact sheets through Michal. Can you please provide revised fact sheets to Khanh, Brian and I by **10AM Monday, April 5**? We're happy to receive on a rolling basis.

Feedback from Michal re: OPPT Facts Sheets:

Some edits, more comments. Please pay specific attention to the fact sheets on REs/risk management on existing chemicals. **Ex. 5 Deliberative Process (DP)**

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP) *Rick has flagged some areas where budget etc decisions could change outcomes before the hearings – there could be litigation decisions or outcomes that do the same.*

Thanks,
Dan

AP Interview: EPA head removes Trump-era science advisers

Matthew Daly, Associated Press

https://apnews.com/article/climate-climate-change-health-coronavirus-pandemic-environment-362183da810c256088929560f71910fa?utm_campaign=Hot%20News&utm_medium=email&_hsmi=119078428&_hsenc=p2ANqtz--tNt8Bj_shl1wHSsv6sxsh2z-050u3KRWGyy3u4be38bsktU6GfZcJbt4KGx8ZkDCp8jsGECWPvvinhgXg1I7hNpM_lQ&utm_content=119078428&utm_source=hs_email

WASHINGTON (AP) — In a move he said would help restore "scientific integrity," the new head of the Environmental Protection Agency is removing dozens of scientists and other experts from key advisory boards named under President Donald Trump, saying they were overly friendly to industry.

EPA Administrator Michael Regan, in an Associated Press interview, said the "reset" of the Science Advisory Board and Clean Air Scientific Advisory Committee will return EPA to its time-honored practice of relying on advice from a balanced group of experts. He is clearing out the two important panels, although current members can apply for reinstatement.

"Scientific integrity is a foundational value for EPA, Regan said. "And I am committing to ensuring that every single decision we make meets rigorous scientific standards."

Restoring public confidence in the EPA is a top goal, Regan said. "And I think to do that, we have to identify and root out any decisions from the past that were not properly aligned with science, he said.

Regan has repeatedly said "science is back." He said that "is very true," but added that "underpinning that is the importance of scientific integrity and transparency here at the agency. The actions we're taking are indicative of how serious we are about repairing the scientific integrity at EPA.

Regan, 44, was North Carolina's top environmental regulator for four years. At the EPA, he is helping to lead President Joe Biden's efforts to address climate change and advocate for environmental justice. Regan is the first Black man to run the EPA.

The overhaul announced Wednesday ousts more than 40 members of the two science advisory boards, including some whose terms do not expire this year. Members can apply to keep serving, but must compete against other candidates. Regan will make final selections, expected within months.

The panels provide scientific expertise and recommendations for air quality standards and other policies intended to protect public health and the environment.

Democrats have said the decision by Donald Trump's first EPA administrator, Scott Pruitt, to remove many academic scientists from the advisory panels tilted them in favor of the chemical and fossil fuel industries. Pruitt barred scientists from serving on the advisory boards if they had received EPA research grants. Pruitt later resigned amid ethics scandals but his policies were largely continued under his successor and former deputy, Andrew Wheeler.

In a related development, Regan said the EPA will be part of a White House effort to investigate Trump-era political interference in science across the government. The White House Office of Science and Technology Policy announced a task force Monday aimed at identifying past tampering in scientific decisions.

"Science is a big part of our mission, and my expectation is that we will be a part of that exercise, Regan said, calling the emphasis on scientific integrity a return to past practice rather than a new initiative. "Science was not in question prior to the previous administration. There were some norms, some structures and transparency that we are actually returning back.

John Graham, a former George W. Bush administration official who had led the Science Advisory Board since last year, defended that panel's work, saying in an email it "exposed the scientific shortcomings of the Trump EPA's plans to weaken greenhouse gas standards for autos and remove numerous water bodies from federal pollution protection.

Graham said he was saddened by Regan's "radical action, which he said is "disrupting" every board member's service and hampering the panel's work.

Graham, a professor at Indiana University's School of Public and Environmental Affairs, said he will not reapply "because I respectfully protest the entire process that Administrator Regan has concocted.

Regan, in the AP interview, said his emphasis on scientific integrity also plays a major role in recruiting...

Study Links Formaldehyde To Asthma In Potential Preview Of EPA Findings

Maria Hegstad, Inside TSCA

https://insideepa.com/tsca-news/study-links-formaldehyde-asthma-potential-preview-epa-findings

Environmental systematic review experts have published a new study finding "sufficient evidence of toxicity" connecting formaldehyde exposure to asthma in children and adults -- a signal that EPA researchers could reach a similar conclusion when they update a long-pending assessment of formaldehyde that previously focused on cancer risks.

The new study was published online March 31 by the journal PLOS ONE, and authored by researchers affiliated with the University of California San Francisco's Program on Reproductive Health and the Environment (PRHE), including the program's Director Tracey Woodruff, a former EPA scientist.

It says recent human studies that the researchers compiled and analyzed show that higher formaldehyde exposures correlate with childhood asthma diagnoses and more severe symptoms, with the strength of that evidence rated as "moderate" -- a potentially dramatic shift from EPA's last risk analysis of the chemical, where its review of asthma was criticized as inadequate by peer reviewers.

The new information could inform either or both of the agency's analyses now underway of formaldehyde's toxic effects, including the long-pending Integrated Risk Information System (IRIS) assessment that the agency's research office plans to resume, and a Toxic Substances Control Act (TSCA) evaluation that will trigger new regulation of the chemical if it finds any "unreasonable risks" associated with its use.

Moreover, the PRHE study also revisits EPA's most recent regulation on formaldehyde, a 2016 TSCA rule

limiting emissions of the chemical from pressed wood products, to argue that adding asthma effects to its cost-benefit analysis would increase its monetized benefits by more than $200 million each year.

It concludes that a proposed version of the rule's cost-benefit analysis would have changed significantly had it included asthma, because the reduced emissions "would result in 2,805 fewer asthma cases and total economic benefit of $210 million annually."

And the authors note that EPA "initially included asthma in the benefit-cost analysis for the [Toxic Substances Control Act] proposed rule; however, asthma was removed from the analysis after interagency review."

The report says EPA's final cost-benefit analysis of the pressed-wood rule, with asthma effects excluded, "estimated annualized benefits . . . ranged from $64-186 million per year. Our results show that using assumptions consistent with EPA's proposed rule, the final rule excluded approximately $210 million annually in total economic benefits associated with 2,805 fewer asthma cases."

The authors also point out in the U.S. "asthma affects approximately 23 million people, including 6 million children, impacting approximately 8% of both children and adults. The omission of asthma from the benefit-cost analysis could significantly underestimate the true value of regulating formaldehyde in pressed wood products."

Should IRIS also conclude that formaldehyde exposure can cause or exacerbate asthma, it could tighten existing non-cancer risk estimates from EPA's existing IRIS assessment, published in 1990, in the same way that much-debated research linking formaldehyde exposure with leukemia could tighten cancer risk estimates currently based on rarer nasal cancers.

The Trump administration shelved IRIS' assessment of formaldehyde for years and refused to release its then-current draft despite numerous Congressional requests. But acting EPA research chief Jennifer Orme-Zavaleta told agency staff just weeks ago that her office will resume the project, lending new urgency to PRHE's findings.

EPA has also designated formaldehyde as one of the next 20 existing chemicals it will evaluate under TSCA, setting the state for IRIS' conclusions to potentially shape the toxics program's conclusions and ultimately its risk-management rules -- if the long-delayed assessment is completed in time to meet strict statutory deadlines for that process.

EPA's...

CPSC reaffirms support for NAMs despite environmentalists' concerns

Inside TSCA reporter, Inside TSCA

https://insideepa.com/tsca-takes/cpsc-reaffirms-support-nams-despite-environmentalists-concerns

The Consumer Product Safety Commission (CPSC) is renewing its policy favoring new approach methods (NAMs) instead of animal testing to gauge the safety of chemicals in household products, despite recent arguments from scientists, environmentalists, and EPA advisors that there is still no comprehensive substitute

for animal tests.

"The Commission reaffirms its policy to find alternatives to traditional animal testing that replace animals, reduce the number of animals tested, and decrease the pain and suffering in animals associated with testing household products," reads a March 31 Federal Register notice.

CPSC is specifically renewing a 2012 "Statement on animal testing policy" that says the body "strongly supports the use of scientifically sound alternatives to animal testing."

The Register notice says the commission not only stands behind the Obama-era policy, but believes computational toxicology test methods such as NAMs have become more accurate in the intervening nine years. "Since 2012, new advancements in toxicological testing, and, in particular, with NAMs, have occurred," it says.

"As such, the Commission strongly encourages all agency stakeholders to submit for evaluation by CPSC staff any scientifically validated alternative test methods that do not require animal testing for determining compliance with the labeling requirements under the" Federal Hazardous Substances Act, which is one of the laws CPSC administers.

But the Biden administration is under early pressure to back away from NAMs, as voices ranging from environmental organizations to EPA's own Children's Health Protection Advisory Committee (CHPAC) have recently warned the agency against using computational methods as the sole basis for any decisions on toxic chemicals.

For instance, in the early days of the new administration CHPAC sent a letter to EPA urging officials to avoid designating chemicals as high- or low-priority for evaluation under the Toxic Substances Control Act (TSCA) based only on NAMs, arguing that computational methods will not identify the full range of a chemical's health effects.

The panel argued that while NAMs can provide useful data on potential risks from a chemical, they should not be taken as proof of a lack of risk from any particular use.

Similarly, environmental groups like the Natural Resources Defense Council (NRDC), as well as scientists who study toxic chemicals like per- and polyfluoroalkyl substances (PFAS) have recently emphasized that despite advances in NAMs animal tests still play a crucial role in the study of toxic chemicals' adverse health effects.

"I am a firm believer that we still need to ask questions about how chemicals affect whole organisms," Jamie DeWitt, an associate professor of pharmacology and toxicology at East Carolina University, told Inside TSCA in a 2020 interview.

While the Trump EPA sought to accelerate the transition to NAMs in TSCA test programs, officials signaled in the early weeks of the Biden administration that they could walk back those plans. Most prominently, Jennifer Orme-Zavaleta, a career scientist who serves as the acting chief of EPA's Office of Research and Development, said on Feb. 2 that the agency planned to "explore" whether to continue that initiative.

But animal welfare groups are pressing the agency to maintain or even speed up those commitments, including in long-awaited revisions to its handbook for Integrated Risk Information System (IRIS) chemical risk analyses.

The Physicians Committee for Responsible Medicine (PCRM) argued in recent comments on the draft IRIS handbook that better integrating NAMs into IRIS' work will reduce reliance on toxicology data drawn from animal testing, and "increase the value of IRIS assessments by ensuring all relevant information is considered and, in many cases, providing information of more human relevance in the absence of information from human studies."

EPA Readying SACC Appointments Based On 2020 Nomination Cycle

David LaRoss, Inside TSCA

https://insideepa.com/tsca-news/epa-readying-sacc-appointments-based-2020-nomination-cycle

EPA is preparing to appoint new members to its Science Advisory Committee on Chemicals (SACC) "in the near future" based on nominations it received in 2020, continuing the Biden administration's effort to quickly rebalance agency advisory panels after EPA dismissed all members from two other key committees.

"EPA is evaluating the 2020 nominations for the Science Advisory Committee on Chemicals (SACC). We anticipate appointing new members in the near future. We are following the membership process -- which has benefitted from extended nomination and public comment periods -- that began with an initial round of nominations last March. We are not planning additional calls for SACC nominations for this membership cycle," an agency spokesperson tells Inside TSCA.

The statement follows Administrator Michael Regan's March 31 announcement that he would dissolve the current memberships of the Science Advisory Board (SAB) and Clean Air Scientific Advisory Committee (CASAC) and immediately open new calls for nominations to fill every seat on both panels -- a step he justified as necessary to undo Trump-era "process irregularities" and safeguard EPA's scientific integrity.

Environmentalists, Democrats and others had called on Regan to "reset" the advisory panels as a way to undo Trump-era moves they said improperly skewed SAB, CASAC and other committees toward industry and made it more likely the panels would reject calls for stricter environmental regulations.

Those included rejecting all nominees who receive EPA grant funding -- a policy a federal judge later struck down -- and eliminating CASAC subcommittees that had historically been key to reviews of science underlying national ambient air quality standards.

In response to an inquiry from Inside TSCA, the spokesperson said Regan's dismissal of current members "is focused solely on the SAB and CASAC," but that the agency is also planning to move quickly on naming new members to SACC.

And since EPA can name a new roster to SACC with each nomination cycle -- unlike SAB and CASAC, where members' terms are staggered -- the end result could be a completely new composition for the panel.

SACC advises officials on chemicals policy under the Toxic Substances Control Act (TSCA), and most prominently peer-reviewed drafts of EPA's first 10 evaluations of existing chemicals under the reformed law. But the Trump administration signaled that it planned for the panel's future work to focus on broader, overarching science issues, while peer review of individual drafts would generally be delegated elsewhere.

The panel's peer reviews produced several high-profile critiques of EPA's draft evaluations, including a scathing report on the asbestos study that called the draft "deficient" and urged the agency to rewrite it. While EPA ultimately finalized the evaluation without a rewrite, it promised to address many of SACC's concerns in a still-pending "supplemental" evaluation with a broader scope.

But the promised new direction for SACC has yet to emerge, in part because EPA never acted on a March 2020 request for nominations to the panel, leaving its membership in limbo.

That call produced 61 nominees although environmentalists protested in Oct. 29 comments that 19 of the experts on that list present either actual or potential conflicts of interest, or the "appearance of a loss of impartiality" and were thus unsuited to serve on the board.

Controversial Nominees

Those objections, filed jointly by Environmental Defense Fund (EDF), Earthjustice, Natural Resources Defense Council, Physicians for Social Responsibility and Union of Concerned Scientists, said they were based on EPA's then-recent plan to expand SACC's mandate, and thus considered both specific chemicals under TSCA review as well as "broader scientific issues (e.g., application of systematic review methodology or dose-response modeling)."

Systematic review could come before the panel soon, as EPA's toxics office has vowed to craft...

Trump's Team Helped Cover Up Records Of 270,000 Pounds Of Carcinogenic Pollution

Emily Brown, Unilad

https://www.unilad.co.uk/news/trumps-team-helped-cover-up-records-of-270000-pounds-of-carcinogenic-pollution/

An analysis of Environmental Protection Agency (EPA) records indicates almost 270,000 pounds of ethylene oxide pollution vanished from the public record under Donald Trump's administration.

Ethylene oxide is a colourless gas that has no odour unless it is present in very high concentrations. It has long been known to cause cancer with long-term exposure, and even tiny amounts of the gas can cause skin burns, twitching, convulsions, and comas.

It is used in the production in many consumer goods and as an agent in the sterilisation of medical equipment, but offers no obvious way to know when it is being released at unsafe levels.

In an effort to know whether they could be at risk of unsafe exposure, people have to rely on public records detailing its usage. However, some companies that release the chemical have been found to change their records to make their emissions appear smaller and less harmful, with a number appearing to have done so at the invitation of the EPA.

In a report for The Intercept, investigative reporter Sharon Lerner explained that, under the leadership of former chemical industry executives appointed by former president Donald Trump, the EPA aggressively rolled back air pollution safeguards.

According to an analysis of EPA records by The Intercept and Material Research, seven companies have retroactively revised their reports of ethylene oxide emissions for 12 facilities since 2018; the same year that news broke regarding additional dangers posed by the chemical.

In 2018, the EPA issued its National Air Toxics Assessment and showed that more than 100 census tracts around the US had cancer risk levels due to air pollution from the ethylene oxide pollution that were above the EPA's 100-in-1-million threshold of concern.

Two years earlier, another division of the environmental agency called IRIS had found ethylene oxide was 30 times more carcinogenic than previously thought.

Almost 270,000 pounds of ethylene oxide pollution vanished from the public record in total, with Keri Powell, an environmental attorney who specialises in air permitting, commenting: 'There's no doubt that these numbers are being reviewed and reduced because there's increased public concern.'

At least some of the companies appear to have changed their records under the instruction of the Trump administration's EPA.

Sarah Huoh, a spokesperson for Edwards Lifesciences, told The Intercept:

In 2018, the EPA requested that Edwards revise its 2016 and 2017 submissions because the company was over-reporting its EO emissions per guidance provided by EPA.

The request reportedly came from US EPA Region 2 in 2018, and Huoh said the agency 'inquired about the numbers for the 'fugitive or non-point air emissions' relative to the 'stack or point air emissions,' proposing that the wrong definitions might have been utilized and resulted in over-reporting'.

The EPA's Madeline Beal has stated, 'EPA's TRI (Toxics Release Inventory) Program did not ask any facility to revise ethylene oxide emissions reporting to TRI as a result of the IRIS assessment.'

It is possible that some of the companies previously overestimated their emissions, as the limits of the ability to measure the gas make it difficult to provide accurate accounts, however Beal did not confidently say whether anyone else in the agency had suggested or requested revisions.

She commented:

While we are not aware of any communications from EPA instructing companies to change their reporting to TRI outside of the data quality processes that we described in the previous response, I can affirm that, going forward, the Biden Administration is committed to letting science, data, and evidence drive EPA decision-making processes on environmental health risks.

The industry may face a shift as President Joe Biden's focus on environmental justice could make the legal and regulatory attention to ethylene oxide more intense.

Study: US pesticide use falls but harms pollinators more

Seth Borenstein, Associated Press

https://apnews.com/article/health-environment-insects-birds-5224773e0d6256fc6a64b64d43bc0d0f

American farmers are using smaller amounts of better targeted pesticides, but these are harming pollinators, aquatic insects and some plants far more than decades ago, a new study finds.

Toxicity levels have more than doubled since 2005 for important species, including honeybees, mayflies and buttercup flowers, as the country switched to a new generation of pesticides. But dangerous chemical levels in

birds and mammals have plummeted at the same time, according to a paper in Thursday's journal Science.

"The bottom line is that these pesticides, once believed to be relatively benign and so short-lived that they would not damage ecosystems, are anything but," said Dr. Lynn Goldman, a former U.S. Environmental Protection Agency assistant administrator for toxic substances who wasn't part of the study and is now dean of George Washington University's school of public health

German scientists examined 381 pesticides used in the United States between 1992 and 2016, combining EPA data that calculates toxic dosage effects for eight types of animals and plants with U.S. Geological Survey data on how much of the chemicals were used year by year for dozens of agricultural crops. The scientists calculated a new measurement they call total applied toxicity for the eight groupings of species and trends over time.

"Very often politicians, media, scientists just talk about amounts. They always argue 'OK, the amount pesticides we use is reduced so things are getting better' and this is not necessarily true," said lead author Ralf Schulz, a professor of environmental sciences at the University of Kolenz-Landau. "It's sometimes true, but not always,"

Industry keeps developing new pesticides and "very often these new compounds are more toxic," Schulz said. They include neonicotinoids, which have been connected to one of the many causes of dwindling honeybee numbers.

The newer pesticides are aimed more toward animals without backbones to spare birds and mammals, but this means insects such as pollinators get poisoned, Schulz said.

The same goes for some land plants and for aquatic invertebrates including dragonflies and mayflies, which birds and mammals eat, he said, adding that future studies should look at the harm higher up the food chain.

Chris Novak, president of the pesticide industry group CropLife America, said in an email that "it is critical to note that the study found great reductions in acute toxicity have been achieved for humans and mammals over the past few decades."

Novak noted pesticides go through extensive studies and "only one in 10,000 discoveries make the 11-year journey from the lab to the market."

It's not surprising that newer generations of pesticides generally are more harmful to insects, which are undergoing a massive decline for many reasons, said University of Connecticut entomologist David Wagner, who wasn't part of the study. But Wagner said this newest research doesn't provide data needed to show "that pesticides are the major driver of insect declines."

Farm chemicals turning more toxic for wildlife

Marc Heller, E&E News

https://www.eenews.net/eenewspm/stories/1063729071/search?keyword=chemicals

Pesticides are becoming more toxic for certain types of wildlife even as farmers use less overall, according to a new study.

The research published today in the journal Science found that two types of pesticides — neonicotinoids and pyrethroids — have driven an increase in the toxicity of pesticides to aquatic invertebrates and pollinators, even as effects have fallen for vertebrates.

They also found the increased toxicity applies to chemicals put on genetically modified corn, developed for tolerance to pesticides.

To reach their conclusions, the Germany-based team examined changes in the use of 381 pesticides over 25 years, and they looked at the effects on eight nontarget species.

"Our results challenge the claims of a decrease in the environmental impacts of pesticide use," they said.

Neonicotinoids in particular have a reputation for harming bees. EPA has allowed their continued use with label restrictions that aim to reduce exposure, but environmental groups said the only way to ensure safety is to end the chemicals' use.

The pesticide industry group Croplife America said neonicotinoids used on seeds have allowed farmers to cut the amount of pesticides they spread on fields and that the chemicals aren't to blame for honeybee declines.

"All neonicotinoids have been extensively tested to ensure that, when used properly, only target pests are impacted. Numerous field studies and real life examples show that bee health is not related to the use of seed treatments," the group said on its website.

Other studies have indicated that pyrethroids — manufactured versions of compounds found in chrysanthemums — make honeybees less active when exposed in sublethal doses.

Bill would effectively ban retail sale and unlicensed use of neonicotinoid pesticides in Nevada, a known killer of pollinator species

Brian Bahouth, Sierra Nevada Ally

https://sierranevadaally.org/2021/04/01/bill-would-effectively-ban-retail-sale-and-unlicensed-use-of-neonicotinoid-pesticides-in-nevada-a-known-killer-of-pollinator-species/

Neonicotinoid or “neonic” insecticides as they are known include several active ingredients dangerous to bees and other pollinator species.

Acetamiprid, Clothianidin, Dinotefuran, Imidacloprid, and Thiamethoxam.

Depending on the product, these chemicals can be combined in numerous ways from seed dressings to sprays. The various preparations are used to control pests in five major crops, household gardens, and lawns.

The U.S. Environmental Protection Agency must approve and register any pesticide sold or otherwise distributed in the United States. The EPA registered the first neonic in 1994 with Imidacloprid. The others listed above were subsequently registered, and they all remain legal under federal law. Registrations are reviewed on a 15-year cycle.

The Nevada Department of Agriculture (NDA) must also approve and register any pesticide before it can be used, distributed, or sold in the state. According to the NDA, "this includes agricultural, industrial, and homeowner products such as insecticides, herbicides, fungicides, disinfectant, rodenticides, and any other product intended to kill, repel, or mitigate a pest."

In Nevada, neonics are legally sold without restrictions in a wide variety of products from ant traps to flowering plant pesticides.

Assembly Bill 275 would, if made state law, designate neonicotinoid pesticides as restricted-use pesticides under the Nevada Pesticides Act. That means those products have been formally noted to have the potential to cause injury to humans or the environment unless applied by a certified and capable applicator. The NDA administers the training and certification program.

To designate neonics as restricted-use pesticides would take them off the shelves of Home Depot, Loews and all retail outlets. Only licensed individuals could use them, so open retail sales would be prohibited.

Between 1947 and 2008, the nation's honey bee population dropped 61 percent from nearly 6 million to 2.3 million bees. 2010 marked a 44 percent loss of bee populations, and in 2019, bee populations dropped nearly 36 percent.

In April of 2016, Ortho, one of the nation's leading brands of insect control products for lawn and garden use, announced that it would begin to transition away from the use of neonicotinoid-based pesticides for outdoor applications. Scotts Miracle-Gro owns Ortho and is the exclusive marketer of the herbicide Roundup. The company said it would eliminate the use of neonic active ingredients Imidacloprid, Clothianidin and Dinotefuran by 2017.

Since then, the company has expanded its selection of "non-neonic based garden solutions," and on the Ortho website there is the "Pollinator Promise," which includes a lengthy acknowledgement of the important role pollinators play in our food chain and their precipitous decline in numbers. The company does ultimately concede that neonics are one among many negative impacts on pollinators.

Reno-based beekeeper Jim Russell shows the inside of a hive in February of 2019 – photo: Brian Bahouth/the Ally
Despite the 2016 goal of eliminating neonics, Ortho has yet to fully remove neonics from its line of pesticides and still offers retail consumers "a choice" in selecting products, according to their website.

Many products from other manufacturers sold at Lowes, Home Depot and elsewhere currently contain neonics. This product has colorful fruit drawn large on the label, but the fine print shows the active ingredient to be Imidacloprid. There are many others.

For now, totally self-regulated consumers need to check the label to see if a neonic is in the preparation, but if AB275 becomes law, the decision would be easier because an unlicensed Nevada consumer would no longer have the choice.

EPA orders Philadelphia company to stop making inaccurate health claims about pesticide

Vipin Saini, Krishi Jagran

https://krishijagran.com/crop-care/epa-orders-philadelphia-company-to-stop-making-inaccurate-health-claims-about-pesticide/

The U.S. Environmental Protection Agency (EPA) has ordered ViaClean Technologies, operating in Philadelphia, to stop marketing the pesticide BioProtect RTU with claims that it is effective against surfaces from public health related pathogens such as the coronavirus.

Although the product is registered to inhibit the growth of "non-public health" microorganisms, it is not registered to address "public health" pathogens. EPA is concerned that customers may have used this product as protection from a virus – such as the coronavirus -- in lieu of other EPA-approved disinfection methods.

"Improperly marketed pesticides, especially during a pandemic, may cause injury to consumers," said Acting EPA Mid-Atlantic Region Administrator Diana Esher. "EPA remains vigilant and will continue to protect the health and safety of Americans from products that have false or misleading public health claims."

ViaClean provided two BioProtect RTU fact sheets containing public health claims to at least one customer, including the statement that the pesticide can be used to kill "germs."

Some online distributors, cleaning services, and end-recipients of BioProtect RTU were also making unsubstantiated claims that this product is effective against pathogens, germs, disease-causing bacteria, viruses, and/or the novel coronavirus for up to 90 days.

EPA issued a Stop Sale, Use or Removal Order to prevent BioProtectRTU from continuing to sell this product with public health claims that have not been substantiated through the pesticide registration process.

Under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), products that claim to kill or repel bacteria or germs, including disinfectants, are considered pesticides and must be registered with the EPA. Public health claims can only be made regarding products that have been properly tested and are registered with the EPA.

EPA has released an expanded list of EPA-registered disinfectant products that have qualified for use against SARS-CoV-2, the novel coronavirus that causes COVID-19. List-N contains over 460 additional products—including products that went through the expedited review process for emerging viral pathogens.

To view the most up-to-date list of EPA-registered disinfectant products, visit https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2

U.S. EPA Orders Nevada, California Companies to Stop Selling Illegal Disinfectants

N/A, KTVN

https://www.ktvn.com/story/43590332/us-epa-orders-nevada-california-companies-to-stop-selling-illegal-disinfectants

The U.S. Environmental Protection Agency (EPA) has ordered Macoma, LLC and FN Nano, Inc., located in Las Vegas and Reno, as well as JT Construction Group, Inc. and BZ Nano, located in Glendale, California, to stop selling the unregistered disinfectant FN Nano Photocatalytic coatings, aka FN Coatings, FN NANO2 Photocatalytic Film.

The EPA says the product is an unregistered disinfectant pesticide being sold in violation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). It says such practices are particularly problematic during the COVID-19 pandemic, and EPA will continue to take enforcement actions such as this 'Stop Sale' order to protect public health.

EPA has issued the 'Stop Sale' order to prevent the companies from continuing to distribute or offer for sale these unregistered disinfectants. The products have been available for sale on their websites and are marketed for use in medical facilities, schoo

The EPA says public health claims for pesticide products, including disinfectants, can only be made following proper testing and registration with the EPA. The agency will not register a pesticide until it has been determined the product will not pose an unreasonable risk to human health when used according to the label directions. The EPA says unregistered products can be harmful to human health, cause adverse effects, and may not be effective against the spread of germs.

EPA Extends Public Comment Period for Manufacturer-Requested Risk Evaluation of OTNE

Lynn Bergeson and Carla Hutton, Bergeson & Campbell Blogs

http://www.tscablog.com/entry/epa-extends-public-comment-period-for-manufacturer-requested-risk-evaluatio

The U.S. Environmental Protection Agency (EPA) announced on April 1, 2021, that it is extending the public comment period for a manufacturer-requested risk evaluation of octahydro-tetramethyl-naphthalenyl-ethanone (OTNE), a category of chemical substances consisting of four inseparable individual isomers. As reported in our February 18, 2021, blog item, EPA notes that two chemicals in the OTNE category are considered persistent, bioaccumulative, and toxic (PBT) chemicals under the Toxic Substances Control Act (TSCA), "meaning they are toxic, can remain in the environment for long periods of time, and can build up or accumulate in the body." EPA "welcomes all public comments," particularly on the following:

Any information not included in the manufacturer request that commenters believe EPA would need to conduct a risk evaluation;
Additional conditions of use EPA is proposing to include in the risk evaluation; and
Information on conditions of use not included in the manufacturer request or in the additional conditions of use EPA proposes to include in the risk evaluation, specifically the inclusion of any additional conditions of use and potentially exposed or susceptible subpopulations. EPA states that it "is in the process of broadly re-examining how it intends to implement these and other provisions of the amended [TSCA] including determining how new executive orders will be addressed. This process would benefit greatly from stakeholder feedback."
Comments were due April 5, 2021, but EPA is extending the comment period an additional 30 days. After the comment period closes, EPA will review the comments and either grant or deny the request to conduct a risk evaluation within 60 days. If EPA grants the request, the manufacturers would be responsible for half the cost of the risk evaluation. International Flavors and Fragrances, Inc., Privi Organics USA Corporation, and DRT America, Inc. formally requested the risk evaluation through the OTNE Consortium managed by B&C® Consortia Management, L.L.C. (BCCM).

Lawsuit Challenges EPA Allowance of Antibiotic Streptomycin in Citrus

Beyond Pesticides Staff, Beyond Pesticides

https://beyondpesticides.org/dailynewsblog/2021/04/lawsuit-challenges-epa-allowance-of-antibiotic-streptomycin-in-citrus/

Having raised the alarm for many years (and most recently in November 2020) on the dangers of the burgeoning antibiotic resistance crisis, Beyond Pesticides has joined a coalition of public interest groups in a lawsuit against the U.S. Environmental Protection Agency (EPA) for its approval of use of the medically important antibiotic streptomycin on citrus trees. Beyond Pesticides executive director Jay Feldman comments: "It is past time to take urgent action to transition away from practices in agriculture that are dependent on antibiotics, advance organic farm management, and avoid new deadly pandemics. This lawsuit is an important action to reverse the previous administration's decision to ignore the science and allow expanded use of an antibiotic in agriculture."

According to the National Resources Defense Council (NRDC), the suit charges that EPA "failed to ensure that the approved uses of streptomycin as a pesticide would not cause unreasonable harm to human health or the environment and failed to adequately assess impacts to endangered species." The coalition of plaintiffs includes Beyond Pesticides, NRDC, Center for Biological Diversity, Environmental Confederation of Southwest Florida, Farmworker Association of Florida, Farmworker Justice, Migrant Clinicians Network, and U.S. PIRG. The coalition is represented in the suit by Earthjustice and in-house counsel.

In a related action, Beyond Pesticides has also sued Sargento Foods, Inc. for its misleading claims of "no antibiotics" in its products. The lawsuit alleges that the company's cheese products are made with milk from cows administered antibiotics, and that those antibiotic compounds are detectable in some of the company's products.

Broadly speaking, all pesticides are "antibiotics" in the sense that they kill biological organisms. But some, such as the commonly used herbicides glyphosate, dicamba, and 2,4-D (as well as some of the "inert" ingredients in their formulations) are demonstrably driving antibiotic resistance in some human pathogenic bacteria, per research Beyond Pesticides covered in 2017. To wit: exposure to these herbicides generally negatively alters bacterial response to antibiotics such as tetracycline, ampicillin, and ciprofloxacin, all of which are used medically to treat a range of serious diseases.

The antibiotic resistance (also referred to as anti-microbial, or AMR resistance) crisis is one of human bacterial infections becoming increasingly resistant to the antibiotics most commonly prescribed by healthcare professionals to resolve such infections. This causes infections to be much harder to treat, to last longer, to require increased medical intervention (incurring the costs that go with that), and sometimes, a complete inability to treat life-threatening infections. This crisis is caused, inevitably, by antibiotics' very use (and too often, overuse) because they exert strong selection pressure for bacterial strains that exhibit antibiotic resistance. Bacteria can mutate quickly and take rapid advantage of mutations that make them more resistant to antibiotics; thus, resistance develops and spreads as these resistant bacteria reproduce and "thrive."

Two primary reasons for the rise of AMR — including multi-drug resistance — are the intensive use of antibiotics in agriculture, for both livestock and crops, and unnecessary medical uses. Research reported on by Beyond Pesticides in February 2021 showed that exposure of bacteria (in agricultural soils) to herbicides triggers evolutionary pressures on bacteria similar to those exposed to antibiotics. That Daily News article noted that, "Salmonella and E.coli exposed to the herbicides glyphosate, dicamba, and 2,4-D, triggered a non-specific defense mechanism which, while building resistance to the toxic effects of the herbicides, also resulted in resistance to commonly used antibiotics." (Learn more about the history of resistance and antibiotics by visiting Beyond Pesticides'...

Pesticides Are More Widespread in Both Conventional and Organic Agricultural Soils than Previously Thought

N/A, Beyond Pesticides

https://beyondpesticides.org/dailynewsblog/2021/04/pesticides-are-more-widespread-in-both-conventional-and-organic-agricultural-soils-than-previously-thought/

A legacy of toxic pesticide use in agriculture is showing up as residues on organic farms, emphasizing the threat of a history of weak regulatory standards that has left farmland poisoned and the urgent need to transition to organic. A study, published in Environmental Science & Technology, documents the findings of pesticide residues on organic farmland and shows a decrease in residues after transition, with lingering effects for decades. Some banned pesticides like organochlorines (e.g., DDT and chlordecone) are stable as research demonstrates these chemicals can bind to and linger in the dirt for years to decades. However, other current-use pesticides also pose a soil contamination risk due to drift, runoff, and leaching.

Widespread, increasing pesticide use in genetically engineered crops has implications for contamination of natural resources, including soils. Since pesticide residues can kill off beneficial soil life, impacting soil health and function, agricultural production may decline. Past studies examining pesticide residues rarely investigate residue's presence in the soil where the chemical has never been used, like organic systems. Therefore, studies like these highlight the need to examine the effect potential pesticide contamination has on soil health, especially in organic where reliance on biological soil processes is integral to the natural cycling of nutrients for crops. The researchers note, "…[T]he ubiquitous contamination of agricultural soils with a variety of pesticides can have long-term negative effects on soil life. We demonstrate that organically managed sites experience a legacy effect of past conventional management. Moreover, our data indicate that the persistence of both banned and currently used pesticides is underestimated. Even though low concentrations were detected in soils of organically managed fields, the potential effect of this long-term contamination is especially critical, as fields under organic management rely much more on biological soil processes and beneficial soil life such as [arbuscular mycorrhizal fungi] AMF."

Conventional pesticide use in agriculture and landscaping contaminates soil and their respective compartments. Using synthetic chemicals and fertilizers to sustain crop output and productivity has a detrimental effect on ecosystem health. Although organic agriculture strategies avoid synthetic chemical use, some organic farms manage land with a history of past pesticide use. Therefore, this study aims to compare pesticide quantities and their influence on soil health in conventional and organic farming practices, including land transitioned into organic.

Researchers gathered soil samples from 100 fields in 60 conventionally managed with chemical-intensive practices and 40 organically managed agricultural sites throughout Switzerland. Using the Swiss Soil Monitoring Network, researchers selected 46 modern pesticides to analyze (16 herbicides, eight herbicide transformation products, 17 fungicides, seven insecticides). Researchers measured soil physicochemical properties including, organic carbon, texture, pH, and soil nutrients (nitrogen, potassium, and phosphorus) using the Swiss Federal Agricultural Research Station.

The study finds pesticide residues are present in soils on both conventional and organic agricultural sites. Traditional, chemical-intensive sites have twice as many pesticide residues, and pesticide concentrations are nine times as high as organic sites. Although the amount of synthetic chemical residues decreases significantly

with the duration of organic management practices, residues remain in organic soils for decades after the last application. In fields with high levels of pesticides, researchers witness a reduction in microbial abundance and beneficial microorganism concentrations that can have implications for soil health.

Pesticides are pervasive in the environment, affecting all ecosystems, including air, water, soil. Just as clean...

Despite Declining U.S. Pesticide Use, Toxicity to Bees Doubled in a Decade: Study

Andrea Germanos, Common Dreams

https://www.commondreams.org/news/2021/04/02/despite-declining-us-pesticide-use-toxicity-bees-doubled-decade-study

Despite lower applied amounts of pesticides in U.S. agriculture, their toxicity to non-target species including honeybees more than doubled in a decade, according to a new study.

The findings by a team of researchers from Germany's University Koblenz-Landau were published Friday in the journal Science.

"We have taken a large body of pesticide use data from the U.S. and have expressed changes of amounts applied in agriculture over time as changes in total applied pesticide toxicity," explained lead author Ralf Schulz, professor for environmental sciences in Landau, in a statement.

"This provides a new view on the potential consequences that pesticide use in agriculture has on biodiversity and ecosystems," he said.

The researchers looked at changes in the use of 381 pesticides from 1992 to 2016 and analyzed toxicity impacts on eight non-target species groups, drawing data from the U.S. Geological Survey and Environmental Protection Agency. They used the EPA's threshold values to determine "total applied pesticide toxicity."

Lower amounts of pesticides have been applied, which brought decreased impacts on vertebrates, the scientists noted. But the same can't be said for for non-target species including aquatic invertebrates like crustaceans and pollinators like bees, who faced a doubling in toxicity between 2005 and 2015—a shift the authors put on increases in the use of pesticides called pyrethroids and neonicotinoids.

Also troubling is that an increase in herbicide toxicity has been on the rise as well, the scientists said, with the biggest impact seen on terrestrial plants. The study pointed to increased toxicity in the widely cultivated genetically modified crops in the U.S. of corn and soybean.

Schulz said the findings "challenge the claims of decreasing environmental impact of chemical pesticides in both conventional and GM crops and call for action to reduce the pesticide toxicity applied in agriculture worldwide."

The study was released amid continued concerns, both nationally and international, about wide-ranging adverse ecological impacts of neonicotinoids, or neonics, as they're sometimes called, especially amid a global decline in insect numbers that threatens humanity's future.

As Philip Donkersley, a senior research associate in entomology at Lancaster University, wrote this month at

The Conversation:

Since their introduction in the late 1980s, robust scientific evidence has emerged to suggest these chemicals impair learning and memory, foraging behavior, and pollination in bees. The E.U. banned neonicotinoids in 2019, and while the U.K. government pledged to follow suit, it granted a special exemption for sugar beet farmers to use the neonicotinoid thiamethoxam in January 2021. Thankfully, it wasn't used.

Because honeybees don't spend much time on the ground, environmental risk assessments for neonicotinoids often neglect to consider how exposure to these chemicals in the soil affects all pollinators. But in a landmark study published in Nature, researchers have shown how neonicotinoids affect bees not just by accumulating in the plants pollinators visit, but in the ground where most wild bees build their nests.

Evidence suggests neonics' impacts go well beyond bees, including possibly to mammals like deer who inadvertently consume them.

As Civil Eats reported last month, the concerns are prompting continued demands for U.S. regulators to take action to curb or ban use of neonics.

Daniel Raichel, a staff attorney at the Natural Resources Defense Council, told the outlet: "It's a bee issue for sure, but really, it's an ecosystem issue. It's an everything issue."

Elanco Animal Health Hit with Class-Action Lawsuit Over Seresto Flea and Tick Collars

Brianna Smith, Legal Reader

https://www.legalreader.com/elanco-animal-health-hit-with-class-action-lawsuit-over-seresto-flea-and-tick-collars/

Elanco Animal Health is under fire in a lawsuit after two dogs developed health problems after using its Seresto flea and tick collars.

Two pet owners recently decided to sue Elanco Animal Health after their dogs developed health problems after using Seresto flea and tick collars. Unfortunately, one of the dogs even died. The class-action suit was filed earlier this week in the U.S. District Court of California in Los Angeles and alleges the company "misrepresented the safety of the product."

It's important to note that the lawsuit was filed mere days after a "congressional subcommittee asked Elanco to voluntarily recall the flea and tick collars in the wake of" reports conducted by the Midwest Center for Investigative Reporting that discovered "thousands of incident reports about pet and human harm linked to the collar." Despite the report, Elanco declined to recall the collars.

This latest class-action lawsuit is likely to be the first of many, according to Spencer Sheehan, a consumer liability attorney in New York. Sheehan has a history of filing class-action lawsuits and is part of the team representing the plaintiffs.

What's causing the illnesses in the dogs, though? Is there something wrong with the collar? Well, according to the lawsuit, the Seresto in the collars "has two active pesticide ingredients: imidacloprid and flumethrin." One of the plaintiffs in the latest suit is Faye Hemsley of Pennsylvania. According to her, she purchased a Seresto

pet collar back in January 2020 for Tigger Shadow, her 13-year-old terrier mix. While he was fine during his annual checkup at the vet on February 19, he died suddenly five days later.

Faye Hemsley of Huntingdon, Pennsylvania, claims in the suit that she purchased a Seresto pet collar in January 2020 for her 13-year-old terrier mix named Tigger Shadow. Tigger was fine at an annual veterinary check-up on Feb. 19 but suddenly died five days later. The other plaintiff, Aitana Vargas of Los Angeles, picked up one of the Seresto collars for her Siberian Husky, Lolita, in March 2020 and another in November 2020. Two months later, Lolita began to develop lumps on her neck near the site of the collar. After a trip to the vet, the 10-year-old dog was diagnosed with cancer and had to undergo emergency surgery earlier this year to have the lumps removed.

The suit states:

"Had Plaintiffs known the Seresto collar Products would cause, or increase the likelihood of causing, serious injury and/or death, they would not have purchased them."

According to the U.S. Environmental Protection Agency (EPA), there have been more than 75,000 reports of "pet and human harm linked to use of the collar" since 2012, when the collar first hit the retail market. Of those reports, 1,698 involved pet deaths, and 907 humans were harmed. The EPA is a federal agency responsible for regulating products that contain pesticides.

When responding to the lawsuit, Colleen Dekker, a spokeswoman for Elanco, said the company "has investigated reports of incidents and deaths in which the pet collar was present and there's nothing that suggests it's the active ingredients in the collar that's at fault."

Parents must protect kids from harmful 'forever' chemicals | READER COMMENTARY

Michael J. Ichniowski, M.D., The Baltimore Sun

https://www.baltimoresun.com/opinion/readers-respond/bs-ed-rr-pfas-pesticides-letter-20210402-2kfz47z4szhc3hsfm7plc2zfdq-story.html

The finding of PFAS "forever chemicals" in pesticides used for mosquito control is indeed disturbing ("Researchers find harmful 'forever chemicals' in pesticide used against mosquitoes in Maryland," March 25). This article and a subsequent letter to the editor ("Communities should opt out of mosquito spraying," March 29) raised many concerns for human health, but the particular risks to children also deserve mention.

The U.S. Environmental Protection Agency considers any level of PFAS (per- and poly-fluoroalkyl substances) to be toxicologically significant and describes one (PFOA) as "likely to be carcinogenic to humans." A child playing on a lawn or yard treated with a PFAS-contaminated pesticide has a much greater risk of exposure by virtue of greater direct contact with these areas and a high level of hand-to-mouth activity. Because PFAS don't degrade, there is persistent risk to kids throughout the months when spraying is conducted and when they are most active outdoors. In addition, runoff from treated areas can enter drinking water sources (one of the more common routes of ingestion), and an 8-ounce glass of water would expose a child to a much larger amount of PFAS, relative to body weight, than an average adult.

These chemicals are poorly excreted in humans, and the half-lives of some of these chemicals have been measured in years. A child's potential lifetime exposure is a cause for great concern.

A PFAS Protection Act was submitted in both chambers of the Maryland General Assembly this year that would have prohibited PFAS chemicals in fire-fighting foam, food containers and carpets, as well as assuring proper disposal to prevent environmental contamination. Unfortunately, these bills never made it to a vote this session, allowing continued exposures from these sources.

Our children deserve to be protected from harmful chemicals. As responsible adults, we must assure that measures used to control mosquitoes do not create additional health risks for children.

Subject: Petition to Cancel Registration of PNR1427 (Brand Name Seresto) under the Federal Insecticide, Fungicide, and Rodenticide Act; Reg. No. 11556-155

Dear Administrator Regan, Acting Assistant Administrator Freedhoff, and Acting Director Messina,

On behalf of the Center for Biological Diversity and its 1.7 million members and supporters and their beloved companion animals, we are submitting the attached petition to cancel its registration of insecticide product PNR1427, more commonly known by its brand name Seresto; Registration No. 11556-155.

This product, which is registered under the Federal Insecticide, Fungicide, and Rodenticide Act for use on adult dogs and puppies and on adult cats and kittens for the purpose of flea and tick treatment, poses a severe risk to the animals on which it is used and to human health. According to a recent aggregate incident summary report, since this product was introduced in 2012, EPA has received over 75,000 adverse incident reports, including at least 1,698 reports linking the use of this product to pet deaths and at least 700 involving human harm.

Because these harms amount to significant unreasonable adverse effects under FIFRA, cancellation of this product is not only warranted but essential for protecting public health, consumers, imperiled wildlife, and companion animals. In the interim pending complete cancellation of the product, EPA should take additional steps to suspend Seresto's registration.

Electronic access to the enclosures filed in support of this petition can be found here: Seresto Cancellation Petition

Copies of the petition and these enclosures are also being sent to you via Certified Mail.

Please do not hesitate to contact me to discuss this matter further.

Sincerely,

Hannah Connor
Senior Attorney, Environmental Health
Center for Biological Diversity

Subject: OCSPP HFS Return: OCSPP-25 (Seresto).

Hi Dan and Khanh:

Thanks so much for the HFS! So far, we're going well and most have minor edits that do not require any further NPM action.

That said, for Seresto, we do have a return vis-à-vis the Talking Points (see attached). The Background and Key Points are great, but given the high visibility nature of Seresto, like many others with EJ issues or high Congressional scrutiny coming up in these Hearings, we think the Talking Points need some re-wording to both highlight the value of OPP, while acknowledging citizen and professional action and reporting on the issue. Also, to the extent that the Talking Points can give a timeline, clearer explanation of the current status and how the EU is doing on this (as a comparison), that would be useful.

Guidance in comments in the attached. I would be glad to discuss further by phone or e-mail.

Thanks!

Cheers,

Mike,

Here's the latest tracking list. I was told for some of the more high-profile chemicals, it's ok if we go over one page a little. I tried to cut down PFAS, but this topic, but it still goes over a little. Let me know if you think it still needs to be cut to 1-page.

Sent to the Budget Team
Biotech
Biostimulants
Oxitec
Chlorpyrifos
AEZ
EtO

With Mike and Ed for clearance
Animal Testing - Waiting till Anna's meeting at end of day
PFAS – attached version with suggested edits to cut it down
Glyphosate – Sent back to PRD to address Rick's comment
Atrazine – Cutting down to 1-page. Made edits and sent to PRD clear.
ESA- Revised version with Mike (See attached email)
Seresto - Revised version with Mike (See attached email)
Dicamba - Revised version with Mike (See attached email)
Formaldehyde – Revised version with Mike (See attached email)

Waiting for DDs to send - None

Hi Sonam,

I hope this email finds you well! I was wondering if there was any information or background you could send me about the EPA's past actions and future plans for the regulation of the Seresto flea and tick collar.

My boss wanted a brief update since we have a group of constituents asking about it (mostly concerned regarding the reports of negative effects on pets), and just wanted him to be informed on how the agency is dealing with it since I know the EPA has taken some oversight actions.

Thank you in advance for your consideration!

Subject: Re: Questions about Seresto pet collars story

Hi Ken,

I appreciate the information. We also emailed Bayer, who forwarded our email to Elanco. Elanco provided detailed answers.

Based on what they told us, we have some more questions.

1. Can the EPA provide year-over-year data that shows the numbers of submitted reports about Seresto collars?

2. Are there any known established links between death and exposure to the active ingredients contained in Seresto?

3. The Elanco spokesperson told us that if a pet was wearing a Seresto collar and experienced any sort of adverse event, the collar would be mentioned in the EPA's reporting (the documents linked by USA Today). The EPA's documents showed that 1,698 pets had died. Did 1,698 pets die because of the Seresto pet collars, or is that number misleading? Can you shed more light on what that number means?

4. How would you advise concerned pet owners trying to decide if it's safe to use Seresto products?

Thank you,
Jordan Liles
Operations Editor, Snopes.com

On Wed, Mar 3, 2021 at 9:21 AM Labbe, Ken <Labbe.Ken@epa.gov> wrote:

> Good afternoon, Jordan:
>
> **Statement:**
>
> Under the Biden-Harris Administration EPA has returned to its core mission, which includes protecting our pets' health. We take every incident reported seriously and review these data to see whether action is necessary. EPA encourages pet owners to read the entire label before using the pesticide product and follow all directions carefully, including monitoring your pet after application to see if side effects occur. If side effects develop, the label tells the consumer to consult the pet's veterinarian immediately. **– EPA Spokesperson**

Background

Under FIFRA, EPA must make a determination that the product will not cause "unreasonable adverse effects on the environment," defined in FIFRA 2(bb) as (in part) "any unreasonable risk to man or the environment, taking into account the economic, social, and environmental costs and benefits of the use of any pesticide." To reach a registration decision and inform the label language, the data that EPA requires includes data on pesticide residues, toxicology, companion animal safety, and efficacy. EPA then independently reviews those data to inform the registration decision. EPA uses this information to determine if and how a product may be used. Evaluations for pet products like shampoos, collars and spot-ons rely upon data on companion animal safety, efficacy and safety for humans who may be exposed as a result of product use.

The product label is the law, and applicators must follow label directions. Some pets, however, like some humans, are more sensitive than others and may experience adverse symptoms after treatment. Manufacturers are required under law to report adverse incident information to EPA. Individuals may report incidents potentially associated with use of an EPA-registered product by contacting the product manufacturer, their state lead pesticide agency, the National Pesticide Information Center, or by contacting EPA directly through its Incident Data System.

Hello,

I am a reporter with Snopes.com. We are looking to verify some information about a story pertaining to Seresto pet collars. We would like to ask some questions about this article from USA Today and Midwest Center for Investigative Reporting: https://www.usatoday.com/story/news/investigations/2021/03/02/seresto-dog-cat-collars-found-harm-pets-humans-epa-records-show/4574753001/.

1. Did the EPA make efforts to investigate the matter of there being 1,698 reported deaths from Seresto pet collars? The deaths are numbered here in EPA documents: https://beta.documentcloud.org/documents/20473296-aggregate-incident-summary-report-for-epa-reg-no-11556-155-1-1-2012-to-6-16-2020.

2. What criteria are sought after by the EPA when deciding whether or not to issue a warning about a product like a pet collar?

3. Does the EPA have a statement on the matter?

Thank you,
Jordan Liles
Operations Editor, Snopes.com

Subject: Question from VIN News Service

Hello,

I'm a reporter for the VIN (Veterinary Information Network) News Service. I'm writing a follow-up to the USA Today report on Seresto collars. We believe the story failed to put the EPA reports in the proper context, and aim to do so. My questions are:

-Can you describe what incident reports are? Can anyone file them? Is there any process for verifying the information in reports?
-What happens after incident reports are filed?
-Can you confirm or refute the claim that these collars have the highest or unusually high number of incident reports for a pesticide pet product?
-There has been some discussion that the collars in question are counterfeit collars, does the EPA know if the collars associated with incident reports are legitimate?

My deadline is today. If you are not able to get back to me today but could tomorrow, please let me know, we may hold the story for your input.

Thank you,
Lisa

Hello,

For your review, please find attached and linked, our response to NBC Boston's investigative reporter regarding the Seresto pet collars. The reporter's deadline is 2:30. Can you please provide any comments/edits ASAP? Thank you!

INCOMING:

- Is the Seresto flea and tick collar safe? How does it compare with similar products on the market, in terms of safety for pets and humans?
- Records released by the EPA show the incident data system maintained by its pesticide office contains some 75,000 recorded incidents involving Seresto products. Has the EPA documented a similar number of incidents regarding other flea and tick collars on the market?
- Has the EPA investigated incidents involving Seresto collars? Has it established that Seresto collars caused adverse effects in pets or humans?
- Has the EPA done enough to inform the public about any potential risk associated with Seresto products?

To: Labbe, Ken <Labbe.Ken@epa.gov>
Cc: Press <Press@epa.gov>
Subject: Reaching out from NBC10 Boston

Good morning: My name is Jim Haddadin, and I'm a producer at the NBC10 Boston television station. I hope you're all well.

We're reporting this week on recent concerns raised in a story by USA Today and the Midwest Center for Investigative Reporting regarding the number of incidents documented by the EPA involving Seresto flea and tick collars.

As you're likely aware, a congressional subcommittee recently requested a variety of documents from the company that sells Seresto products. Its chairman also called on the company that sells these collars to voluntarily recall them from the market pending further investigation.

We're preparing a report on the subject, and we'd appreciate an opportunity to speak with an EPA representative on camera for the piece. We're available to meet someone in the Boston area today or tomorrow for an in-person interview (preferably outdoors). We can also schedule a brief video call, if that's more convenient. I ask that you please let me know by **Wednesday morning, April 7**, if there's an opportunity to schedule an interview.

Alternatively, we request that you please send a written response to the questions below by **2:30 p.m. on Wednesday, April 7** at the latest.

Is the Seresto flea and tick collar safe? How does it compare with similar products on the market, in terms of safety for pets and humans?

Records released by the EPA show the incident data system maintained by its pesticide office contains some 75,000 recorded incidents involving Seresto products. Has the EPA documented a similar number of incidents regarding other flea and tick collars on the market?

Has the EPA investigated incidents involving Seresto collars? Has it established that Seresto collars caused adverse effects in pets or humans?

Has the EPA done enough to inform the public about any potential risk associated with Seresto products?

Thanks,

Subject: DAA Comments on OPP Fact Sheets

Good afternoon,

We received comments back from the first tranche of fact sheets sent to Michal, all of which were OPPT. In some cases, Michal requests a pivot in the presentation of some of our information. The first attachment for methylene chloride (OPPT) is provided as an example of those comments as well as the paragraph pasted further below. Please use this information to help inform your revisions.

The remaining 8 attachments include comments from Rick, some of which refer to Michal's early comments to OPPT/TSCA fact sheets.

We continue to be under a very tight timeline to clear fact sheets through Michal. Can you please provide revised fact sheets to Khanh, Brian and I by **10AM Monday, April 5**? We're happy to receive on a rolling basis.

Feedback from Michal re: OPPT Facts Sheets:
Some edits, more comments. Please pay specific attention to the fact sheets on REs/risk management on existing chemicals. Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP) *Rick has flagged some areas where budget etc decisions could change outcomes before the hearings – there could be litigation decisions or outcomes that do the same.*

Thanks,
Dan

Beth,

Region 9 is starting to get calls and are directing public inquiries to Mary Rust in OPP, and press inquiries to Greg Siedschlag in OPS. Did you receive updated guidance on where calls should be routed? I am thinking we want to be consistent with our directions. Mary manages the pesticidequestions mailbox, however sending an inquirer to a generic mailbox seems to communicate "take a number."

Just my two cents.

Donald:

Thanks for sharing, this came up on the Regional Public Affairs directors call on Tuesday and OCSPP is aware of it. Please let your public affairs folks know if you get any questions.

Sincerely,
Beth

Subject: US Today Article Critical of EPA on Flea Collars Related to Pet Deaths

The below linked article came to my attention a couple days ago, when found by a colleague here in R5. Sharing with you as FYI. If picked up by the media even more, this has a potential to get big.

Perhaps worth an addition to the next OPP/OECA call, with a rep from OPP addressing???

https://www.usatoday.com/story/news/investigations/2021/03/02/seresto-dog-cat-collars-found-harm-pets-humans-epa-records-show/4574753001/

"…Seresto, one of the most popular flea and tick collars in the country, has been linked to hundreds of pet deaths, tens of thousands of injured animals and hundreds of harmed humans, U.S. Environmental Protection Agency documents show. Yet the EPA has done nothing to inform the public of the risks…." [USA Today]

Hi Mary,

This is the first of a few Seresto incidents found in junk mail folder. This woman should likely take the collar of and bath her dog quickly.

I've a been out of the office for a few days and experienced computer problems, so I'm sorry being slow to get back to you.

Take care,

Bob

Subject: Write- up for the weekly email - Congressional Request

On March 16, 20221, the Agency received a request from the Congressional Subcommittee on Economic and Consumer Policy's, investigating Seresto flea and tick collars as well as other similar products. ISB (Bob Miller and Joyce Ji Yeon/MERP Contractor) team members queried the Incident Data System (IDS) and was able to provide incident aggregate and/or summary reports for 132 pet products. This information will be utilized to support the response to the oversight committee and provides the requested information for both pet and human incidents.

Subject: Press Inquiry from VIN

Hi Royan and Liz,

We received the following press inquiry this afternoon about Seresto flea and tick collars. As you probably know, this has been a hot topic after the USA Today article yesterday.

I'm a reporter for the VIN (Veterinary Information Network) News Service. I'm sending this at the same time I have contacted the press office, in the hopes it will expedite a response. I'm writing a follow-up to the USA Today report on Seresto collars. (https://www.usatoday.com/story/news/investigations/2021/03/02/seresto-dog-cat-collars-found-harm-pets-humans-epa-records-show/4574753001/) We believe the story failed to put the EPA reports in the proper context, and aim to do so. My questions are:

-Can you describe what incident reports are? Can anyone file them? Is there any process for verifying the information in reports?
-What happens after incident reports are filed?
-Can you confirm or refute the claim that these collars have the highest or unusually high number of incident reports for a pesticide pet product?
-There has been some discussion that the collars in question are counterfeit collars, does the EPA know if the collars associated with incident reports are legitimate?

I'd like some help from OECA on that last question, highlighted in yellow. How should we respond?

The responses are due by COB tomorrow (Friday, Mar.5)

Thanks in advance for any help you can provide!

Good Afternoon,

OCFO has coordinated closely with OCIR in the formulation of the attached memorandum which provides direction to regions and program offices on developing hearing fact sheets to prepare the Administrator for the upcoming Congressional hearings on the FY 2022 President's Budget. To facilitate the preparation of the fact sheets, the memorandum includes two attachments, the Fact Sheet Template and a List of Fact Sheet Titles.

If you have any questions regarding this memorandum or require additional information, please contact Wyatt Boyd at Boyd.Wyatt@epa.gov, your Office of Budget media analyst, or Christina Moody at Moody.Christina@epa.gov.

Subject: DAA Comments on OPP Fact Sheets

Good afternoon,

We received comments back from the first tranche of fact sheets sent to Michal, all of which were OPPT. In some cases, Michal requests a pivot in the presentation of some of our information. The first attachment for methylene chloride (OPPT) is provided as an example of those comments as well as the paragraph pasted further below. Please use this information to help inform your revisions.

The remaining 8 attachments include comments from Rick, some of which refer to Michal's early comments to OPPT/TSCA fact sheets.

We continue to be under a very tight timeline to clear fact sheets through Michal. Can you please provide revised fact sheets to Khanh, Brian and I by **10AM Monday, April 5**? We're happy to receive on a rolling basis.

Feedback from Michal re: OPPT Facts Sheets:
Some edits, more comments. Please pay specific attention to the fact sheets on REs/risk management on existing chemicals. Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP) *Rick has flagged some areas where budget etc decisions could change outcomes before the hearings – there could be litigation decisions or outcomes that do the same.*

Thanks,
Dan

Good afternoon,

We received comments back from the first tranche of fact sheets sent to Michal, all of which were OPPT. In some cases, Michal requests a pivot in the presentation of some of our information. The first attachment for methylene chloride (OPPT) is provided as an example of those comments as well as the paragraph pasted further below. Please use this information to help inform your revisions.

The remaining 8 attachments include comments from Rick, some of which refer to Michal's early comments to OPPT/TSCA fact sheets.

We continue to be under a very tight timeline to clear fact sheets through Michal. Can you please provide revised fact sheets to Khanh, Brian and I by **10AM Monday, April 5**? We're happy to receive on a rolling basis.

Feedback from Michal re: OPPT Facts Sheets:
Some edits, more comments. Please pay specific attention to the fact sheets on REs/risk management on existing chemicals. **Ex. 5 Deliberative Process (DP)**

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP) *Rick has flagged some areas where budget etc decisions could change outcomes before the hearings – there could be litigation decisions or outcomes that do the same.*

Thanks,
Dan

Attachments: MEMORANDUM__FY 2022 Hearing Fact Sheets Final.pdf; Attachment A FY 2022 Hearing Fact Sheet Template.docx; Attachment B Consolidated Budget Hearing Table of Contents_OCSPP_v3.docx; OCSPP FY21 Fact Sheets.zip

Good morning,

Following are a couple points of clarification for this fact sheet exercise and a brief budget update for the FY 2022 President's Budget.

OCSPP Fact Sheet Internal Timeline:

- **Monday COB, 3/29** – As Rick mentioned yesterday, input from Offices on any +/- changes to the list of fact sheet topics are due to OPS. Minor updates are included in the attached Table of Contents v3 based on OPPT and OPS feedback received yesterday.
- **Wednesday COB, 3/31** – Office Director approved fact sheets due to OPS;
- Thursday, 4/1 – on a rolling basis, OPS begins clearance through Rick;
- Friday, 4/2 – on a rolling basis, OPS begins clearance through Michal;
- Monday, 4/5 – OPS to provide OCSPP final fact sheets to OCFO.

For the fact sheet template resource table, OPS can take the lead in populating FY 2022 President's Budget data, where applicable, once it becomes available.

Multi-Office Fact Sheets: to avoid confusion, we propose that the following Offices take the lead, in consultation with other contribution Offices:

1) OPP – PFAS and Pesticide Containers;
2) OPP – Biotech/PIP;
3) OPP - Animal Testing;
4) Scientific Integrity – delete, ORD to take lead.

Budget Update:

- FY 2022 President's Budget Blue Print is planned to be released in April.
- Associated Congressional Justification final guidance and preparation timeframe are not yet known, but it is anticipated to be transmitted to Congress by mid-May, after the Hearings take place.
- Fact Sheets will be used by OCIR and OCFO in preparing the Administrator for the Committee Appropriation Hearings scheduled for late April through early May, as shown below.
    - HAC – April 21, time TBD
    - SEPW – April 28, 10AM
    - HEC – April 29, time TBD
    - SAC – May 12, time TBD

Again, If you have any questions, please let Brian, Khanh or me know.

Thanks,

Dan

Subject: FW: FY 2022 Appropriations Hearings – New or Updated Fact Sheets due to OPS COB 3/31

Good afternoon,

In order for the Administrator to prepare for the approaching FY 2022 Congressional budget hearings, OCFO has asked for us to update OCSPP fact sheets. We've annotated responsible Offices in the attached Table of Contents. Please consider any areas of considerable public or Congressional interest that may warrant a new fact sheet to be developed. The attached zip file includes the most recent versions of fact sheets from last year.

In order to meet OCFO's very tight timeline, we're asking for you to provide your OD approved fact sheets by **COB Wednesday, March 31**. That will allow us time to clear through Michal and revise as necessary. As outlined in the Table of Contents, we'll propose to OCFO that some of these topics be deleted. Note that OCIR and/or our leadership have asked for new sheets on the following topics:

1) Scientific Integrity;
2) Recent Actions on PBT Rules;
3) Seresto Pet Collars;
4) PFAS and Pesticide Containers; and
5) Pollution Prevention.

We'll keep you apprised of any additional new topics that are requested. If you have any questions, please let Brian, Khanh or me know.

Thanks,
Dan

Subject: FY 2022 Appropriations Hearings – Call for New or Updated Fact Sheets

Good Afternoon,

OCFO has coordinated closely with OCIR in the formulation of the attached memorandum which provides direction to regions and program offices on developing hearing fact sheets to prepare the Administrator for the upcoming Congressional hearings on the FY 2022 President's Budget. To facilitate the preparation of the fact sheets, the memorandum includes two attachments, the Fact Sheet Template and a List of Fact Sheet Titles.

If you have any questions regarding this memorandum or require additional information, please contact Wyatt Boyd at Boyd.Wyatt@epa.gov, your Office of Budget media analyst, or Christina Moody at Moody.Christina@epa.gov.

Hi RD IO,

Attached is the Seresto 6a2 letter for your review and comments. Jenn and I have left OGC comments in, as resolved, for your reference. I've also forwarded the letter to OECA for their simultaneous review. Please let us know if you have any questions.

Many thanks,
Jackie

Document Set #4

Hi all,

The Elanco Seresto representative, Jennifer Schofield, has sent us the documents that were submitted in response to the Inquiry by the Subcommittee on Economic and Consumer Policy. There are quite a few documents and some are password protected, so please bear with me, as I will have to send over a few emails to get them all distributed.

Please note, Elanco has requested extra time for tomorrow's discussion so Jenn has extended the meeting until 4:30pm.

Please let us know if you have any questions.

Many thanks,
Jackie

Hi Darlene:
You are correct that there is not a version saying why we denied the NC 24(c). The initial comment from Rick that HB saw yesterday on 24(c)s was "We may also need a bullet about the 24(c) requests." I interpreted this to mean that mentioning the 24(c)s as an ongoing topic would be sufficient but will think now how to add disapproval language to the 1:21pm draft you just sent.

Re. the comment at the end of the memo about adding more scientific integrity content, do you have more detail on what Rick might be looking for? It looks like Mike Goodis requested that we trim down the scientific integrity bullet I drafted this morning to remove the memo citation, but I'm unsure what which of the other content to insert. For now I will work to recycle from these bullets in Pre. Biden's memo:

- Reviewing and evaluating the agency's scientific Federal Advisory Committees to ensure they include top-tier experts to provide independent scientific and technological advice and have instituted proper safeguards against conflicts of interest.
- Reviewing and updating any agency policies, processes, and practices that impede the development of critical scientific assessments and prevent the best available science and data from informing the equitable delivery of programs. As we undertake this review, I will be providing additional direction and guidance to the agency's senior leaders.
- Building on the agency's existing commitment to evidence-based policymaking by fostering a culture of evaluation and continuous learning.

NBC10 Press Inquiry on Seresto Part 2.docx

<!--[endif]-->

Hi All,

I need your help with this press inquiry from NBC10 that is due today at 2:30. Jenn and Jackie have looked at it, and Forrest and Erin from OGC too. Not everything has been resolved, but this has to move fast!

Could you please review the attached as soon as you can, so we can move forward?

A big thanks!

Dian

Good morning all,

Just wanted to share this inquiry. Are you amenable to an interview? If so, reporter needs to know by tomorrow morning. If written responses are the way to go here, the deadline is 2:30 pm tomorrow.

Thanks,

Ken

Cc: Press <Press@epa.gov>
Subject: Reaching out from NBC10 Boston

Good morning: My name is Jim Haddadin, and I'm a producer at the NBC10 Boston television station. I hope you're all well.

We're reporting this week on recent concerns raised in a story by USA Today and the Midwest Center for Investigative Reporting regarding the number of incidents documented by the EPA involving Seresto flea and tick collars.

As you're likely aware, a congressional subcommittee recently requested a variety of documents from the company that sells Seresto products. Its chairman also called on the company that sells these collars to voluntarily recall them from the market pending further investigation.

We're preparing a report on the subject, and we'd appreciate an opportunity to speak with an EPA representative on camera for the piece. We're available to meet someone in the Boston area today or tomorrow for an in-person interview (preferably outdoors). We can also schedule a brief video call, if that's more convenient. I ask that you please let me know by **Wednesday morning, April 7**, if there's an opportunity to schedule an interview.

Alternatively, we request that you please send a written response to the questions below by **2:30 p.m. on Wednesday, April 7** at the latest.

Is the Seresto flea and tick collar safe? How does it compare with similar products on the market, in terms of safety for pets and humans?

Records released by the EPA show the incident data system maintained by its pesticide office contains some 75,000 recorded incidents involving Seresto products. Has the EPA documented a similar number of incidents regarding other flea and tick collars on the market?

Has the EPA investigated incidents involving Seresto collars? Has it established that Seresto collars caused adverse effects in pets or humans?

Has the EPA done enough to inform the public about any potential risk associated with Seresto products?

Thanks,

Jim Haddadin

Hi Marietta:
Here is the progression of edits on this deliverable:

- The first attachment was my initial effort at addressing Rick's comments.
- The second attachment is Dan R's additions to my response to Rick's comments, plus my responses to Dan R's comments.
- The third attachment is Marietta's edits on the Dan/Meg version.
- And the fourth attachment is my revised draft from 8:31am this morning, incorporating Marietta's edits.

Meg

I did not see this prior to 2:30PM but I think it generally looks okay. If there is time, I would simplify the last paragraph to focus on what we "do" do. I also don't think we should release the Congressional data to a press representative. If we are going to release it, we should make it available to everyone on our website with appropriate context.

Best,
Catherine

Cc: Press <Press@epa.gov>
Subject: Reaching out from NBC10 Boston

Good morning: My name is Jim Haddadin, and I'm a producer at the NBC10 Boston television station. I hope you're all well.

We're reporting this week on recent concerns raised in a story by USA Today and the Midwest Center for Investigative Reporting regarding the number of incidents documented by the EPA involving Seresto flea and tick collars.

As you're likely aware, a congressional subcommittee recently requested a variety of documents from the company that sells Seresto products. Its chairman also called on the company that sells these collars to voluntarily recall them from the market pending further investigation.

We're preparing a report on the subject, and we'd appreciate an opportunity to speak with an EPA representative on camera for the piece. We're available to meet someone in the Boston area today or tomorrow for an in-person interview (preferably outdoors). We can also schedule a brief video call, if that's more convenient. I ask that you please let me know by **Wednesday morning, April 7**, if there's an opportunity to schedule an interview.

Alternatively, we request that you please send a written response to the questions below by **2:30 p.m. on Wednesday, April 7** at the latest.

Is the Seresto flea and tick collar safe? How does it compare with similar products on the market, in terms of safety for pets and humans?

Records released by the EPA show the incident data system maintained by its pesticide office contains some 75,000 recorded incidents involving Seresto products. Has the EPA documented a similar number of incidents regarding other flea and tick collars on the market?

Has the EPA investigated incidents involving Seresto collars? Has it established that Seresto collars caused adverse effects in pets or humans?

Has the EPA done enough to inform the public about any potential risk associated with Seresto products?

Thanks,

Jim Haddadin

Document Set #3

Hi all,

The Elanco Seresto representative, Jennifer Schofield, has sent us the documents that were submitted in response to the Inquiry by the Subcommittee on Economic and Consumer Policy. There are quite a few documents and some are password protected, so please bear with me, as I will have to send over a few emails to get them all distributed.

Please note, Elanco has requested extra time for tomorrow's discussion so Jenn has extended the meeting until 4:30pm.

Please let us know if you have any questions.

Many thanks,
Jackie

Subject: OCSPP HFS Return: OCSPP-25 (Seresto).

Hi Dan and Khanh:

Thanks so much for the HFS! So far, we're going well and most have minor edits that do not require any further NPM action.

That said, for Seresto, we do have a return vis-à-vis the Talking Points (see attached). The Background and Key Points are great, but given the high visibility nature of Seresto, like many others with EJ issues or high Congressional scrutiny coming up in these Hearings, we think the Talking Points need some re-wording to both highlight the value of OPP, while acknowledging citizen and professional action and reporting on the issue. Also, to the extent that the Talking Points can give a timeline, clearer explanation of the current status and how the EU is doing on this (as a comparison), that would be useful.

Guidance in comments in the attached. I would be glad to discuss further by phone or e-mail.

Thanks!

Cheers,

Then I would leave it vague and just say specific timeframe without an example. The registrant shouldn't be learning about the expectations from a budget hearing.

As to recommended timing for the letter itself, I suggest requiring them to submit a plan within 10 days, with the actual, full data submission within 30 days. They can always request an extension.

On Apr 12, 2021, at 3:47 PM, Saunders, Jennifer <Saunders.Jennifer@epa.gov> wrote:

Hi Catherine, one quick follow up:

Re: the language about the 6a2 letter timing for when the company will have to submit the data, do you have any thoughts? The letter that is currently going through review has a 10 day due date, after talking to David he thinks a month or two is more reasonable, and

currently in this one pager it says 8 weeks (which seems long to me). Do we want to commit to a time frame for submission now, as the 6a2 letter hasn't gone all the way up the chain yet? If not, should we change the one pager language to something more vague like "One we issue the directive to the company, they will have to submit the requested information within a specific timeframe (e.g., 8 weeks)."?

Thanks, just want to be sure that nuance wasn't missed!

Subject: OCSPP HFS Return: OCSPP-25 (Seresto).

Hi Dan and Khanh:

Thanks so much for the HFS! So far, we're going well and most have minor edits that do not require any further NPM action.

That said, for Seresto, we do have a return vis-à-vis the Talking Points (see attached). The Background and Key Points are great, but given the high visibility nature of Seresto, like many others with EJ issues or high Congressional scrutiny coming up in these Hearings, we think the Talking Points need some re-wording to both highlight the value of OPP, while acknowledging citizen

and professional action and reporting on the issue. Also, to the extent that the Talking Points can give a timeline, clearer explanation of the current status and how the EU is doing on this (as a comparison), that would be useful.

Guidance in comments in the attached. I would be glad to discuss further by phone or e-mail.

Thanks!

Then I would leave it vague and just say specific timeframe without an example. The registrant shouldn't be learning about the expectations from a budget hearing.

As to recommended timing for the letter itself, I suggest requiring them to submit a plan within 10 days, with the actual, full data submission within 30 days. They can always request an extension.

On Apr 12, 2021, at 3:47 PM, Saunders, Jennifer <Saunders.Jennifer@epa.gov> wrote:

Hi Catherine, one quick follow up:

Re: the language about the 6a2 letter timing for when the company will have to submit the data, do you have any thoughts? The letter that is currently going through review has a 10 day due date, after talking to David he thinks a month or two is more reasonable, and currently in this one pager it says 8 weeks (which seems long to me). Do we want to commit to a time frame for submission now, as the 6a2 letter hasn't gone all the way up the chain yet? If not, should we change the one pager language to something more vague like "One we issue the directive to the company, they will have to submit the requested information within a specific timeframe (e.g., 8 weeks)."?

Thanks, just want to be sure that nuance wasn't missed!

Subject: OCSPP HFS Return: OCSPP-25 (Seresto).

Hi Dan and Khanh:

Thanks so much for the HFS! So far, we're going well and most have minor edits that do not require any further NPM action.

That said, for Seresto, we do have a return vis-à-vis the Talking Points (see attached). The Background and Key Points are great, but given the high visibility nature of Seresto, like many others with EJ issues or high Congressional scrutiny coming up in these Hearings, we think the Talking Points need some re-wording to both highlight the value of OPP, while acknowledging citizen and professional action and reporting on the issue. Also, to the extent that the Talking Points can give a timeline, clearer explanation of the current status and how the EU is doing on this (as a comparison), that would be useful.

Guidance in comments in the attached. I would be glad to discuss further by phone or e-mail.

Thanks!

Cheers,

Hi all,

I agree with Jenn. Regarding Dan's note at the end, I agree that we could add a few words in there about submitting the incident. Added a sentence at the very end.

Subject: FW: DAA Comments on OPP Fact Sheets

URGENT – please see Rick's comment on the following Fact Sheets – which need to be revised NLT Monday 10 am.

- PFAS
- AEZ
- Glyphosate
- Chlorpyrifos
- Atrazine
- EtO
- Oxitec
- Seresto

Please provided revised FSs in both tack changes and clean versions as soon as completed so we can forward when ready.

Also referring to the note below about TSCA's FSs and Michal's comments, similar comments are made by Rick in some of OPP's FSs - "*On some of the TSCA fact sheets, Michal had a comment about how the outcomes of litigation would*

impact next steps. However we address her comment on that point in the TSCA fact sheets should also be included here." Please take particular attention to these where commented. Thanks

Subject: DAA Comments on OPP Fact Sheets

Good afternoon,

We received comments back from the first tranche of fact sheets sent to Michal, all of which were OPPT. In some cases, Michal requests a pivot in the presentation of some of our information. The first attachment for methylene chloride (OPPT) is provided as an example of those comments as well as the paragraph pasted further below. Please use this information to help inform your revisions.

The remaining 8 attachments include comments from Rick, some of which refer to Michal's early comments to OPPT/TSCA fact sheets.

We continue to be under a very tight timeline to clear fact sheets through Michal. Can you please provide revised fact sheets to Khanh, Brian and I by **10AM Monday, April 5**? We're happy to receive on a rolling basis.

Feedback from Michal re: OPPT Facts Sheets:
Some edits, more comments. Please pay specific attention to the fact sheets on REs/risk management on existing chemicals. Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP) *Rick has flagged some areas where budget etc decisions could change outcomes before the hearings – there could be litigation decisions or outcomes that do the same.*

Thanks,
Dan

Good morning, Marietta:
Here is a revised draft. The scientific integrity bullet has been expanded as you requested. It now says:

- "As noted in President Biden's January 27, 2021 *Presidential Memorandum on Restoring Trust in Government Through Scientific Integrity and Evidence-Based Policymaking*, EPA is committed to making evidence-based decisions guided by the best available science and data. EPA is committed to upholding the highest standards of scientific integrity."

Importance: High

Mike,

I'm pushing this up in your emails and copied Dian, who drafted the response. OCIR would like to get it cleared, signed (by the Deputy Associate Administrator) and sent out by Tuesday, based on their timeline below:

Here's where we are in the review process:
~~--Kristien to review current draft language and send a "For OPP Review" draft letter to you all later today or early tomorrow.~~
~~--Kimberly Smith to send enclosures through her OPP management for their approval, today.~~
--OPP to review draft response and the enclosures and send to OCSPP IO for their review by Friday COB.
--OCSPP IO to review/approve and send forward to OCIR for further review on Monday by COB.
--On Tuesday, April 6, OCIR will obtain additional approvals (senior leadership/OGC IO) necessary and produce letter with enclosure(s) to Committee.

Hi All,

Please see attached file for the Krishnamoorthi response. As Kristien says, it's "clean-ish," with the comments left in, as they may be useful for future review, and some of my editing included.

I have two comments in the document that require resolution.

Unfortunately, track changes was not on when I started editing, but I did turn it on before doing anything major. Previous corrections were minor, involving punctuation and typos (e.g., "and administrative hearing" changed to "an administrative hearing"; what should have been "pets" in one instance was "pests.")

When you've finished reviewing the letter you can send back to me, and I will get a clean copy to Jonah. Or you can send directly to Jonah – just let me know that you have.

Thanks! And have a great weekend.

Hi Michael—Attached is the response and production. We finally got it out the door on Friday evening. Please let me know if you have any questions. I'll keep you posted if/when we hear back from the Committee.

NOTE: As you'll see, we ended up only producing the PDF summary reports from registrants. We can offer the Excel file individual incident reports if they're interested in them. It would be an easy lift of a second production.

Thanks for everyone's help! –Kristien

Hi Mike,

Evidently, the decision was made to not respond point-by-point at the OCIR level. Kristien or Sven-Erik may be able to tell you the reason for that.

I believe every request has a response. Forrest can confirm that.

The version I sent to you this afternoon at 1:39 is the latest version, and the one in which there are unanswered questions. The previous comments that were addressed in the response were left in for informational purposes for reviewers. I'll make a clean copy to send on when OPP is finished.

I've reattached the latest version.

Dian

Thanks – I think the letter looks fine overall. A couple of questions –

Has someone verified that each of the incoming information requests have been addressed/responded to? Are there any that we are not responding to at this time?

Also, I was expecting the letter to be more of a one-to-one response – similar to an audit response. Is there a reason we did not take this approach? Seems to me it would be better and would help the recipient with the same question.

Also there are a number of comments remaining in this draft – some seem addressed but maybe some others are not. Are there any that still need to be resolved?

Hi again all—Attached please find a mostly-clean version of the draft response letter for OPP/OCSPP review. The comment bubbles look like they may be helpful for further review so I left them in place, please feel free to take them out if moving forward a clean draft works better for your offices. If you would please keep track changes on so that I can follow additional editing.

Here's where we are in the review process:
~~--Kristien to review current draft language and send a "For OPP Review" draft letter to you all later today or early tomorrow.~~
~~--Kimberly Smith to send enclosures through her OPP management for their approval, today.~~
--OPP to review draft response and the enclosures and send to OCSPP IO for their review by Friday COB.
--OCSPP IO to review/approve and send forward to OCIR for further review on Monday by COB.
--On Tuesday, April 6, OCIR will obtain additional approvals (senior leadership/OGC IO) necessary and produce letter with enclosure(s) to Committee.

I appreciate everyone's help—thank you! I hope you all have a nice weekend. –Kristien

2021-04-02 EPA-Krishnamoorthi (Seresto Pet Collar) DRAFT RESPONSE_clean-ish for OPP Review ddo.docx

<!--[endif]-->

Hi All,

Please see attached file for the Krishnamoorthi response. As Kristien says, it's "clean-ish," with the comments left in, as they may be useful for future review, and some of my editing included.

I have two comments in the document that require resolution.

Unfortunately, track changes was not on when I started editing, but I did turn it on before doing anything major. Previous corrections were minor, involving punctuation and typos (e.g., "and administrative hearing" changed to "an administrative hearing"; what should have been "pets" in one instance was "pests.")

When you've finished reviewing the letter you can send back to me, and I will get a clean copy to Jonah. Or you can send directly to Jonah – just let me know that you have.

Thanks! And have a great weekend.

Subject: Need to Reschedule the Briefing: FDA/EPA Jurisdictional Realignment Efforts for Genetically Engineered Animals

Importance: High

Mike,

We have the FDA/EPA Jurisdiction briefing on Monday, but Michal now has a conflict and needs to reschedule it. The next open slot for her is 3 weeks out and the team asked for it to be scheduled immediately following the Seresto briefing. One option is to replace it with another briefing next week and move that briefing out. These are the briefings next week. In terms of urgency, do you know if any of them can move out three weeks?

- Formaldehyde (AD - Kim Wilson) - 4/5
- FDA/EPA jurisdiction (BPPD, RD) - 4/5
- Sulfuryl Fluoride (PRD) - 4/6
- ESA consultation process improvement options – 4/7
- Oxitec – 4/8

Subject: RE: Follow-up on Krishnamoorthi letter on IDS

Hi again all—Attached please find a mostly-clean version of the draft response letter for OPP/OCSPP review. The comment bubbles look like they may be helpful for further review so I left them in place, please feel free to take them out if moving forward a clean draft works better for your offices. If you would please keep track changes on so that I can follow additional editing.

Here's where we are in the review process:
~~--Kristien to review current draft language and send a "For OPP Review" draft letter to you all later today or early tomorrow.~~
~~--Kimberly Smith to send enclosures through her OPP management for their approval, today.~~
--OPP to review draft response and the enclosures and send to OCSPP IO for their review by Friday COB.
--OCSPP IO to review/approve and send forward to OCIR for further review on Monday by COB.
--On Tuesday, April 6, OCIR will obtain additional approvals (senior leadership/OGC IO) necessary and produce letter with enclosure(s) to Committee.

I appreciate everyone's help—thank you! I hope you all have a nice weekend. –Kristien

Subject: RE: Follow-up on Krishnamoorthi letter on IDS

Just a quick update—since there are a handful of OPP folks and Forrest/OGC still working on the shared letter draft and making good progress, I am going to give them until the end of the day. At that point, I'll pull that draft and clean it up and send it to this group sometime this evening for your review.

Thanks,
Kristien

Subject: Follow-up on Krishnamoorthi letter on IDS

Hi everyone—I'm hoping this smaller distribution list can streamline getting our response reviewed appropriately through OPP and OCSPP. Please pass along to whoever you need to include on your end. The next steps on this request include:

--Kristien to review current draft language and send a "For OPP Review" draft letter to you all later today or early tomorrow.
--Kimberly Smith to send enclosures through her OPP management for their approval, today.
--OPP to review draft response and the enclosures and send to OCSPP IO for their review by Friday COB.
--OCSPP IO to review/approve and send forward to OCIR for further review on Monday by COB.
--On Tuesday, April 6, OCIR will obtain additional approvals necessary and produce letter with enclosure(s) to Committee.

Thanks again for all you help and please reach out with any questions. –Kristien

Thanks Kimberly. For Rick's comment about the public health message from Cheryl Dunton, she sent me the two bullets below. If' you're ok with it, I can add this in.

- Mosquito control provides important public health benefits like controlling the spread of Zika and other mosquito-borne diseases.
- While these types of products should not be a source of PFAS, the data EPA has collected so far indicates that the amount of PFAS that has entered the environment from the contamination in the containers the agency tested is extremely small.

Subject: FW: DAA Comments on OPP Fact Sheets

URGENT – please see Rick's comment on the following Fact Sheets – which need to be revised NLT Monday 10 am.

- PFAS
- AEZ
- Glyphosate
- Chlorpyrifos
- Atrazine
- EtO
- Oxitec
- Seresto

Please provided revised FSs in both tack changes and clean versions as soon as completed so we can forward when ready.

Also referring to the note below about TSCA's FSs and Michal's comments, similar comments are made by Rick in some of OPP's FSs - "*On some of the TSCA fact sheets, Michal had a comment about how the outcomes of litigation would impact next steps. However we address her comment on that point in the TSCA fact sheets should also be included here.*" Please take particular attention to these where commented. Thanks

Subject: DAA Comments on OPP Fact Sheets

Good afternoon,

We received comments back from the first tranche of fact sheets sent to Michal, all of which were OPPT. In some cases, Michal requests a pivot in the presentation of some of our information. The first attachment for methylene chloride (OPPT) is provided as an example of those comments as well as the paragraph pasted further below. Please use this information to help inform your revisions.

The remaining 8 attachments include comments from Rick, some of which refer to Michal's early comments to OPPT/TSCA fact sheets.

We continue to be under a very tight timeline to clear fact sheets through Michal. Can you please provide revised fact sheets to Khanh, Brian and I by **10AM Monday, April 5**? We're happy to receive on a rolling basis.

Feedback from Michal re: OPPT Facts Sheets:
Some edits, more comments. Please pay specific attention to the fact sheets on REs/risk management on existing chemicals. Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP) *Rick has flagged some areas where budget etc decisions could change outcomes before the hearings – there could be litigation decisions or outcomes that do the same.*

Thanks,
Dan

Ed and Mike,

Putting this draft response on your radar since this letter has to go to OCSPP as early as possible today. See the follow-up responses to Mike's comments below.

Hi Mike,

Evidently, the decision was made to not respond point-by-point at the OCIR level. Kristien or Sven-Erik may be able to tell you the reason for that.

I believe every request has a response. Forrest can confirm that.

The version I sent to you this afternoon at 1:39 is the latest version, and the one in which there are unanswered questions. The previous comments that were addressed in the response were left in for informational purposes for reviewers. I'll make a clean copy to send on when OPP is finished.

I've reattached the latest version.

Dian

Thanks – I think the letter looks fine overall. A couple of questions –

Has someone verified that each of the incoming information requests have been addressed/responded to? Are there any that we are not responding to at this time?

Also, I was expecting the letter to be more of a one-to-one response – similar to an audit response. Is there a reason we did not take this approach? Seems to me it would be better and would help the recipient with the same question.

Also there are a number of comments remaining in this draft – some seem addressed but maybe some others are not. Are there any that still need to be resolved?

Hi again all—Attached please find a mostly-clean version of the draft response letter for OPP/OCSPP review. The comment bubbles look like they may be helpful for further review so I left them in place, please feel free to take them out if moving forward a clean draft works better for your offices. If you would please keep track changes on so that I can follow additional editing.

Here's where we are in the review process:
~~--Kristien to review current draft language and send a "For OPP Review" draft letter to you all later today or early tomorrow.~~
~~--Kimberly Smith to send enclosures through her OPP management for their approval, today.~~
--OPP to review draft response and the enclosures and send to OCSPP IO for their review by Friday COB.
--OCSPP IO to review/approve and send forward to OCIR for further review on Monday by COB.
--On Tuesday, April 6, OCIR will obtain additional approvals (senior leadership/OGC IO) necessary and produce letter with enclosure(s) to Committee.

I appreciate everyone's help—thank you! I hope you all have a nice weekend. –Kristien

Subject: RE: Follow-up on Krishnamoorthi letter on IDS

Just a quick update—since there are a handful of OPP folks and Forrest/OGC still working on the shared letter draft and making good progress, I am going to give them until the end of the day. At that point, I'll pull that draft and clean it up and send it to this group sometime this evening for your review.

Thanks,
Kristien

Darlene,

I noticed two unresolved comments by Dian Overby on the first page. I double checked with Forrest Pitman in OGC, and then resolved them myself, but wanted to run them by OPP to make sure OPP is okay with the changes.

Thanks,
Jonah

Hi Darlene – We wanted to make sure that our list is consistent with yours. We're still waiting on the following OPP (these are the ones with DAA comments and still need to go to AA today):

PFAS - Pesticide Containers, New	OCSPP-14
Rule - Application Exclusion Zone	OCSPP-18
Existing Chemicals Registration Review - Glyphosate	OCSPP-19
Existing Chemicals Registration Review - Atrazine	OCSPP-21
Ex. 5 Deliberative Process (DP) Seresto Pet Collars, New	OCSPP-25
Animal Testing	OCSPP-26

Subject: Outstanding FS revisions from OPP: DAA Comments on OPP Fact Sheets

Hi Darlene – We wanted to make sure that our list is consistent with yours. We're still waiting on the following OPP (these are the ones with DAA comments and still need to go to AA today):

PFAS - Pesticide Containers, New	OCSPP-14
Rule - Application Exclusion Zone	OCSPP-18
Existing Chemicals Registration Review - Glyphosate	OCSPP-19
Existing Chemicals Registration Review - Atrazine	OCSPP-21
Ex. 5 Deliberative Process (DP) Seresto Pet Collars, New	OCSPP-25
Animal Testing	OCSPP-26

Thanks

Subject: DAA Comments on OPP Fact Sheets

Good afternoon,

We received comments back from the first tranche of fact sheets sent to Michal, all of which were OPPT. In some cases, Michal requests a pivot in the presentation of some of our information. The first attachment for methylene chloride (OPPT) is provided as an example of those comments as well as the paragraph pasted further below. Please use this information to help inform your revisions.

The remaining 8 attachments include comments from Rick, some of which refer to Michal's early comments to OPPT/TSCA fact sheets.

We continue to be under a very tight timeline to clear fact sheets through Michal. Can you please provide revised fact sheets to Khanh, Brian and I by **10AM Monday, April 5**? We're happy to receive on a rolling basis.

Feedback from Michal re: OPPT Facts Sheets:
Some edits, more comments. Please pay specific attention to the fact sheets on REs/risk management on existing chemicals. Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP) *Rick has flagged some areas where budget etc decisions could change outcomes before the hearings – there could be litigation decisions or outcomes that do the same.*

Thanks,
Dan

Here's atrazine. PRD cut it down to 1 page. I'll send the others now. Once you clear atrazine, this will only leave Animal Testing. We're waiting to hear from Anna regarding the meeting this afternoon.

Subject: Tracker for Fact Sheets

Mike,

Here's the latest tracking list. I was told for some of the more high-profile chemicals, it's ok if we go over one page a little. I tried to cut down PFAS, but this topic, but it still goes over a little. Let me know if you think it still needs to be cut to 1-page.

Sent to the Budget Team
Biotech
Biostimulants
Oxitec
Chlorpyrifos
AEZ
EtO

With Mike and Ed for clearance
Animal Testing - Waiting till Anna's meeting at end of day
PFAS – attached version with suggested edits to cut it down
Glyphosate – Sent back to PRD to address Rick's comment
Atrazine – Cutting down to 1-page. Made edits and sent to PRD clear.
ESA- Revised version with Mike (See attached email)
Seresto - Revised version with Mike (See attached email)
Dicamba - Revised version with Mike (See attached email)
Formaldehyde – Revised version with Mike (See attached email)

Waiting for DDs to send - None

Subject: DAA Comments on OPP Fact Sheets

Good afternoon,

We received comments back from the first tranche of fact sheets sent to Michal, all of which were OPPT. In some cases, Michal requests a pivot in the presentation of some of our information. The first attachment for methylene chloride

(OPPT) is provided as an example of those comments as well as the paragraph pasted further below. Please use this information to help inform your revisions.

The remaining 8 attachments include comments from Rick, some of which refer to Michal's early comments to OPPT/TSCA fact sheets.

We continue to be under a very tight timeline to clear fact sheets through Michal. Can you please provide revised fact sheets to Khanh, Brian and I by **10AM Monday, April 5**? We're happy to receive on a rolling basis.

Feedback from Michal re: OPPT Facts Sheets:
Some edits, more comments. Please pay specific attention to the fact sheets on REs/risk management on existing chemicals. Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP) *Rick has flagged some areas where budget etc decisions could change outcomes before the hearings – there could be litigation decisions or outcomes that do the same.*

Hi Mike,

Evidently, the decision was made to not respond point-by-point at the OCIR level. Kristien or Sven-Erik may be able to tell you the reason for that.

I believe every request has a response. Forrest can confirm that.

The version I sent to you this afternoon at 1:39 is the latest version, and the one in which there are unanswered questions. The previous comments that were addressed in the response were left in for informational purposes for reviewers. I'll make a clean copy to send on when OPP is finished.

I've reattached the latest version.

Dian

Thanks – I think the letter looks fine overall. A couple of questions –

Has someone verified that each of the incoming information requests have been addressed/responded to? Are there any that we are not responding to at this time?

Also, I was expecting the letter to be more of a one-to-one response – similar to an audit response. Is there a reason we did not take this approach? Seems to me it would be better and would help the recipient with the same question.

Also there are a number of comments remaining in this draft – some seem addressed but maybe some others are not. Are there any that still need to be resolved?

Hi again all—Attached please find a mostly-clean version of the draft response letter for OPP/OCSPP review. The comment bubbles look like they may be helpful for further review so I left them in place, please feel free to take them out if moving forward a clean draft works better for your offices. If you would please keep track changes on so that I can follow additional editing.

Here's where we are in the review process:
~~--Kristien to review current draft language and send a "For OPP Review" draft letter to you all later today or early tomorrow.~~
~~--Kimberly Smith to send enclosures through her OPP management for their approval, today.~~
--OPP to review draft response and the enclosures and send to OCSPP IO for their review by Friday COB.
--OCSPP IO to review/approve and send forward to OCIR for further review on Monday by COB.
--On Tuesday, April 6, OCIR will obtain additional approvals (senior leadership/OGC IO) necessary and produce letter with enclosure(s) to Committee.

I appreciate everyone's help—thank you! I hope you all have a nice weekend. –Kristien

Subject: RE: Follow-up on Krishnamoorthi letter on IDS

Just a quick update—since there are a handful of OPP folks and Forrest/OGC still working on the shared letter draft and making good progress, I am going to give them until the end of the day. At that point, I'll pull that draft and clean it up and send it to this group sometime this evening for your review.

Thanks,
Kristien

Hi everyone—I'm hoping this smaller distribution list can streamline getting our response reviewed appropriately through OPP and OCSPP. Please pass along to whoever you need to include on your end. The next steps on this request include:

--Kristien to review current draft language and send a "For OPP Review" draft letter to you all later today or early tomorrow.
--Kimberly Smith to send enclosures through her OPP management for their approval, today.
--OPP to review draft response and the enclosures and send to OCSPP IO for their review by Friday COB.
--OCSPP IO to review/approve and send forward to OCIR for further review on Monday by COB.
--On Tuesday, April 6, OCIR will obtain additional approvals necessary and produce letter with enclosure(s) to Committee.

Thanks again for all you help and please reach out with any questions. –Kristien

Subject: DAA Comments on OPP Fact Sheets

Good afternoon,

We received comments back from the first tranche of fact sheets sent to Michal, all of which were OPPT. In some cases, Michal requests a pivot in the presentation of some of our information. The first attachment for methylene chloride (OPPT) is provided as an example of those comments as well as the paragraph pasted further below. Please use this information to help inform your revisions.

The remaining 8 attachments include comments from Rick, some of which refer to Michal's early comments to OPPT/TSCA fact sheets.

We continue to be under a very tight timeline to clear fact sheets through Michal. Can you please provide revised fact sheets to Khanh, Brian and I by **10AM Monday, April 5**? We're happy to receive on a rolling basis.

Feedback from Michal re: OPPT Facts Sheets:
Some edits, more comments. Please pay specific attention to the fact sheets on REs/risk management on existing chemicals. **Ex. 5 Deliberative Process (DP)**

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP) *Rick has flagged some areas where budget etc decisions could change outcomes before the hearings – there could be litigation decisions or outcomes that do the same.*

Thanks,
Dan

Subject: For OPP revision Batch #5 with AA comments - FY22 Appropriations Hearing Fact Sheets

Hi Darlene –

Michal has additional comments on #14 PFAS and containers and #20 Chlorpyrifos from the revision this morning. #20 is already very long. So when you revise, please also help reduce/streamline the bullet points to keep to 1 page.

#23 Dicamba also has comments, and like #20, please help reduce to 1 page.

Thanks so much
Khanh

Dear Michal,

In this last batch, we include the last fact sheet (PFAS in Pesticide Containers) for your review and clearance. The next 4 attached fact sheets have been revised by offices to incorporate your substantial comments from last evening. We request your second look before sending to OCFO.

Included in batch #5 are:

Dicamba	OCSPP-23
TSCA Existing Chemicals Risk Evaluation - Formaldehyde IRIS	OCSPP-6
PFAS - Pesticide Containers, New	OCSPP-14
Rule - Application Exclusion Zone	OCSPP-18
Existing Chemicals Registration Review - Chlorpyrifos	OCSPP-20

Thank you.

Subject: FOR AA REVIEW AND CLEARANCE: Batch #4 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

Please see additional 6 fact sheets for your review and clearance.
In a separate email, we will send the revised fact sheets incorporating your substantial comments from last evening for your second look before sending to OCFO.

Included in batch #4 are:

TSCA Existing Chemicals Risk Evaluation - Systematic Review	OCSPP-4
Existing Chemicals Registration Review - Ethylene Oxide	OCSPP-22
Animal Testing	OCSPP-26
Biostimulants	OCSPP-28
FIFRA & Endangered Species Act	OCSPP-29
COVID-19 Disinfectants	OCSPP-31

Subject: OPP revision? on Batches #4 & 5 with AA comments - FY22 Appropriations Hearing Fact Sheets
Importance: High

Hi Darlene –

We're still waiting from OPP revisions for the following FS with Michal's comments from yesterday: #14 PFAS Pesticide Containers, #20, Chlorpyrifos, #22 EtO, #26 Animal Testing. OCIR/OCFO is pinging us for these last fact sheets.

On #23 Dicamba, will you be able to get Rick's question resolved soon?.

- In October 2020, after considering data received from academia, state partners, and the manufacturers, EPA worked with a broad group of parties to strengthen the pesticide label application directions for the 2021 season to address the deficiencies identified by the Court.

Ex. 5 Deliberative Process (DP)

Author
Maybe describe what this means in plain English?

Author
FLAG: Aren't we completing the TN review this week? What is the timing on GA? Given that the budget hearings are later this month, should we be adding that information now OR flagging that an update will be needed prior to the hearings?

Thanks for your help.

Subject: For OPP revision Batch #5 with AA comments - FY22 Appropriations Hearing Fact Sheets

Hi Darlene –

Michal has additional comments on #14 PFAS and containers and #20 Chlorpyrifos from the revision this morning. #20 is already very long. So when you revise, please also help reduce/streamline the bullet points to keep to 1 page.

#23 Dicamba also has comments, and like #20, please help reduce to 1 page.

Thanks so much
Khanh

Dear Michal,

In this last batch, we include the last fact sheet (PFAS in Pesticide Containers) for your review and clearance. The next 4 attached fact sheets have been revised by offices to incorporate your substantial comments from last evening. We request your second look before sending to OCFO.

Included in batch #5 are:

Dicamba	OCSPP-23
TSCA Existing Chemicals Risk Evaluation - Formaldehyde IRIS	OCSPP-6
PFAS - Pesticide Containers, New	OCSPP-14
Rule - Application Exclusion Zone	OCSPP-18
Existing Chemicals Registration Review - Chlorpyrifos	OCSPP-20

Thank you.

Subject: FOR AA REVIEW AND CLEARANCE: Batch #4 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

Please see additional 6 fact sheets for your review and clearance.
In a separate email, we will send the revised fact sheets incorporating your substantial comments from last evening for your second look before sending to OCFO.

Included in batch #4 are:

TSCA Existing Chemicals Risk Evaluation - Systematic Review	OCSPP-4
Existing Chemicals Registration Review - Ethylene Oxide	OCSPP-22
Animal Testing	OCSPP-26
Biostimulants	OCSPP-28
FIFRA & Endangered Species Act	OCSPP-29
COVID-19 Disinfectants	OCSPP-31

Subject: FOR AA REVIEW AND CLEARANCE: Batch #3 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

Please see additional 6 fact sheets for your review and clearance **by noon Tuesday, 4/6**. These have been cleared by Rick and ODs. Please return the files with your edits and comments in track changes.
For those you reviewed last week and over the weekend (thank you!), we've worked with respective offices to incorporated your edits and comments. Rick has reviewed and deemed the revised version do not require your second review. They have been submitted to OCFO.

Included in batch 3 are:

TSCA Existing Chemicals Risk Evaluation - Formaldehyde IRIS Assessment	OCSPP-6
Rule - Application Exclusion Zone	OCSPP-18
Existing Chemicals Registration Review - Glyphosate	OCSPP-19
Existing Chemicals Registration Review - Chlorpyrifos	OCSPP-20
Ex. 5 Deliberative Process (DP) Oxitec	OCSPP-24
Seresto Pet Collars, New	OCSPP-25

Thanks

Subject: FOR AA REVIEW AND CLEARANCE: Batch #1 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

The attached fact sheets are to prepare the Administrator for FY2022 Appropriations Hearings, scheduled as shown below. Once OCSPP submit these to OCFO, they will go through further reviews by OCIR, OCFO and OGC. The prep sessions with the Administrator and AAs are being by OCIR and OCFO.
These fact sheets are the first of several batches that we request your review and clearance **by 3pm, Monday, April 5**. Please return the files with your edits and your comments in track changes.
They have been reviewed and cleared by respective Office Directors and Rick.

Committee	Date
HAC	April 21, 2021 Time TBD
SEPW	April 28, 2021 at 10 AM
HEC	April 29, 2021 Time TBD
SAC	May 12, 2021 Time TBD

The first attachment is a list of fact sheets that you can expect before COB tomorrow. In Batch #1, the following fact sheets are included:

TSCA New Chemicals	OCSPP-1
TSCA Existing Chemicals Risk Evaluation	OCSPP-2
TSCA Existing Chemicals Risk Evaluation - Asbestos	OCSPP-3
TSCA Existing Chemicals Risk Evaluation - Systematic Review	OCSPP-4
TSCA Existing Chemicals Risk Evaluation - Data Gathering, New	OCSPP-5
TSCA Existing Chemicals Risk Management	OCSPP-7
TSCA Existing Chemicals Risk Management - PCBs	OCSPP-8
TSCA Existing Chemicals Risk Management - Methylene Chloride	OCSPP-9
TSCA Existing Chemicals Risk Management - Recent PBT Rules, New	OCSPP-10
TSCA - GAO Audit on Chemicals	OCSPP-12
PFAS - TRI and TSCA	OCSPP-13
Lead Based Paint	OCSPP-15
Pollution Prevention, New	OCSPP-16

Thank you,

Subject: RE: OPP revision? on Batches #4 & 5 with AA comments - FY22 Appropriations Hearing Fact Sheets
Attachments: OCSPP-23 - Dicamba_04.06.2021_for AArev. (005) RPK.docx

We're hoping the revised bullet below and edits shown in the attached Dicamba fact sheet address Rick's comments.

- FIFRA section 24(c) allows states to register an additional use of a pesticide to meet special local needs. North Carolina, Tennesse and Georgia had submitted requests to expand the OTT uses of dicamba in their states. EPA recently disapproved these 24(c) labels, due to concerns of unreasonable adverse effects from the extend use.

FLAG: EPA is currently reviewing recently submitted data from GA and plans to send the NOID by 4/16 and the disapproval later in the month. An update will be needed prior to the hearing.

Subject: OPP revision? on Batches #4 & 5 with AA comments - FY22 Appropriations Hearing Fact Sheets
Importance: High

Hi Darlene –

We're still waiting from OPP revisions for the following FS with Michal's comments from yesterday: #14 PFAS Pesticide Containers, #20, Chlorpyrifos, #22 EtO, #26 Animal Testing. OCIR/OCFO is pinging us for these last fact sheets.

On #23 Dicamba, will you be able to get Rick's question resolved soon?.

- In October 2020, after considering data received from academia, state partners, and the manufacturers, EPA worked with a broad group of parties to strengthen the pesticide label application directions for the 2021 season to address the deficiencies identified by the Court.

Hi Darlene –

Michal has additional comments on #14 PFAS and containers and #20 Chlorpyrifos from the revision this morning. #20 is already very long. So when you revise, please also help reduce/streamline the bullet points to keep to 1 page.

#23 Dicamba also has comments, and like #20, please help reduce to 1 page.

Thanks so much
Khanh

Dear Michal,

Please see additional 6 fact sheets for your review and clearance.
In a separate email, we will send the revised fact sheets incorporating your substantial comments from last evening for your second look before sending to OCFO.

Included in batch #4 are:

TSCA Existing Chemicals Risk Evaluation - Systematic Review	OCSPP-4
Existing Chemicals Registration Review - Ethylene Oxide	OCSPP-22
Animal Testing	OCSPP-26
Biostimulants	OCSPP-28

FIFRA & Endangered Species Act	OCSPP-29
COVID-19 Disinfectants	OCSPP-31

Thanks

Subject: FOR AA REVIEW AND CLEARANCE: Batch #3 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

Please see additional 6 fact sheets for your review and clearance **by noon Tuesday, 4/6**. These have been cleared by Rick and ODs. Please return the files with your edits and comments in track changes.
For those you reviewed last week and over the weekend (thank you!), we've worked with respective offices to incorporated your edits and comments. Rick has reviewed and deemed the revised version do not require your second review. They have been submitted to OCFO.

Included in batch 3 are:

TSCA Existing Chemicals Risk Evaluation - Formaldehyde IRIS Assessment	OCSPP-6
Rule - Application Exclusion Zone	OCSPP-18
Existing Chemicals Registration Review - Glyphosate	OCSPP-19
Existing Chemicals Registration Review - Chlorpyrifos	OCSPP-20
Use Restriction - Oxitec	OCSPP-24
Use Restriction - Seresto Pet Collars, New	OCSPP-25

Thanks

Subject: RE: OPP revision? on Batches #4 & 5 with AA comments - FY22 Appropriations Hearing Fact Sheets

We're hoping the revised bullet below and edits shown in the attached Dicamba fact sheet address Rick's comments.

- FIFRA section 24(c) allows states to register an additional use of a pesticide to meet special local needs. North Carolina, Tennesse and Georgia had submitted requests to expand the OTT uses of dicamba in their states. EPA recently disapproved these 24(c) labels, due to concerns of unreasonable adverse effects from the extend use.

FLAG: EPA is currently reviewing recently submitted data from GA and plans to send the NOID by 4/16 and the disapproval later in the month. An update will be needed prior to the hearing.

Subject: OPP revision? on Batches #4 & 5 with AA comments - FY22 Appropriations Hearing Fact Sheets
Importance: High

Hi Darlene –

We're still waiting from OPP revisions for the following FS with Michal's comments from yesterday: #14 PFAS Pesticide Containers, #20, Chlorpyrifos, #22 EtO, #26 Animal Testing. OCIR/OCFO is pinging us for these last fact sheets.

On #23 Dicamba, will you be able to get Rick's question resolved soon?.

- In October 2020, after considering data received from academia, state partners, and the manufacturers, EPA worked with a broad group of parties to strengthen the pesticide label application directions for the 2021 season to address the deficiencies identified by the Court.

Hi Darlene –

Michal has additional comments on #14 PFAS and containers and #20 Chlorpyrifos from the revision this morning. #20 is already very long. So when you revise, please also help reduce/streamline the bullet points to keep to 1 page.

#23 Dicamba also has comments, and like #20, please help reduce to 1 page.

Thanks so much

Hello,

For your review, please find attached and linked, our response to NBC Boston's investigative reporter regarding the Seresto pet collars. The reporter's deadline is 2:30. Can you please provide any comments/edits ASAP? Thank you!

INCOMING:

- Is the Seresto flea and tick collar safe? How does it compare with similar products on the market, in terms of safety for pets and humans?
- Records released by the EPA show the incident data system maintained by its pesticide office contains some 75,000 recorded incidents involving Seresto products. Has the EPA documented a similar number of incidents regarding other flea and tick collars on the market?
- Has the EPA investigated incidents involving Seresto collars? Has it established that Seresto collars caused adverse effects in pets or humans?
- Has the EPA done enough to inform the public about any potential risk associated with Seresto products?

Cc: Press <Press@epa.gov>
Subject: Reaching out from NBC10 Boston

Good morning: My name is Jim Haddadin, and I'm a producer at the NBC10 Boston television station. I hope you're all well.

We're reporting this week on recent concerns raised in a story by USA Today and the Midwest Center for Investigative Reporting regarding the number of incidents documented by the EPA involving Seresto flea and tick collars.

As you're likely aware, a congressional subcommittee recently requested a variety of documents from the company that sells Seresto products. Its chairman also called on the company that sells these collars to voluntarily recall them from the market pending further investigation.

We're preparing a report on the subject, and we'd appreciate an opportunity to speak with an EPA representative on camera for the piece. We're available to meet someone in the Boston area today or tomorrow for an in-person interview (preferably outdoors). We can also schedule a brief video call, if that's more convenient. I ask that you please let me know by **Wednesday morning, April 7**, if there's an opportunity to schedule an interview.

Alternatively, we request that you please send a written response to the questions below by **2:30 p.m. on Wednesday, April 7** at the latest.

Is the Seresto flea and tick collar safe? How does it compare with similar products on the market, in terms of safety for pets and humans?

Records released by the EPA show the incident data system maintained by its pesticide office contains some 75,000 recorded incidents involving Seresto products. Has the EPA documented a similar number of incidents regarding other flea and tick collars on the market?

Has the EPA investigated incidents involving Seresto collars? Has it established that Seresto collars caused adverse effects in pets or humans?

Has the EPA done enough to inform the public about any potential risk associated with Seresto products?

Thanks,

Jim Haddadin

Subject: FOR OPP IO REVIEW: Press Inquiry - NBC10 Boston re: Seresto Pet Collars DDL: ASAP

Hello,

For your review, please find attached and linked, our response to NBC Boston's investigative reporter regarding the Seresto pet collars. The reporter's deadline is 2:30. Can you please provide any comments/edits ASAP? Thank you!

INCOMING:

- Is the Seresto flea and tick collar safe? How does it compare with similar products on the market, in terms of safety for pets and humans?
- Records released by the EPA show the incident data system maintained by its pesticide office contains some 75,000 recorded incidents involving Seresto products. Has the EPA documented a similar number of incidents regarding other flea and tick collars on the market?
- Has the EPA investigated incidents involving Seresto collars? Has it established that Seresto collars caused adverse effects in pets or humans?
- Has the EPA done enough to inform the public about any potential risk associated with Seresto products?

Cc: Press <Press@epa.gov>
Subject: Reaching out from NBC10 Boston

Good morning: My name is Jim Haddadin, and I'm a producer at the NBC10 Boston television station. I hope you're all well.

We're reporting this week on recent concerns raised in a story by USA Today and the Midwest Center for Investigative Reporting regarding the number of incidents documented by the EPA involving Seresto flea and tick collars.

As you're likely aware, a congressional subcommittee recently requested a variety of documents from the company that sells Seresto products. Its chairman also called on the company that sells these collars to voluntarily recall them from the market pending further investigation.

We're preparing a report on the subject, and we'd appreciate an opportunity to speak with an EPA representative on camera for the piece. We're available to meet someone in the Boston area today or tomorrow for an in-person interview (preferably outdoors). We can also schedule a brief video call, if that's more convenient. I ask that you please let me know by **Wednesday morning, April 7**, if there's an opportunity to schedule an interview.

Alternatively, we request that you please send a written response to the questions below by **2:30 p.m. on Wednesday, April 7** at the latest.

Is the Seresto flea and tick collar safe? How does it compare with similar products on the market, in terms of safety for pets and humans?

Records released by the EPA show the incident data system maintained by its pesticide office contains some 75,000 recorded incidents involving Seresto products. Has the EPA documented a similar number of incidents regarding other flea and tick collars on the market?

Has the EPA investigated incidents involving Seresto collars? Has it established that Seresto collars caused adverse effects in pets or humans?

Has the EPA done enough to inform the public about any potential risk associated with Seresto products?

Thanks,

Jim Haddadin

Hi Darlene –

Michal has additional comments on #14 PFAS and containers and #20 Chlorpyrifos from the revision this morning. #20 is already very long. So when you revise, please also help reduce/streamline the bullet points to keep to 1 page.

#23 Dicamba also has comments, and like #20, please help reduce to 1 page.

Thanks so much

Dear Michal,

In this last batch, we include the last fact sheet (PFAS in Pesticide Containers) for your review and clearance. The next 4 attached fact sheets have been revised by offices to incorporate your substantial comments from last evening. We request your second look before sending to OCFO.

Included in batch #5 are:

Dicamba	OCSPP-23
TSCA Existing Chemicals Risk Evaluation - Formaldehyde IRIS	OCSPP-6
PFAS - Pesticide Containers, New	OCSPP-14
Rule - Application Exclusion Zone	OCSPP-18
Existing Chemicals Registration Review - Chlorpyrifos	OCSPP-20

Thank you.

Subject: FOR AA REVIEW AND CLEARANCE: Batch #4 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

Please see additional 6 fact sheets for your review and clearance.
In a separate email, we will send the revised fact sheets incorporating your substantial comments from last evening for your second look before sending to OCFO.

Included in batch #4 are:

TSCA Existing Chemicals Risk Evaluation - Systematic Review	OCSPP-4
Existing Chemicals Registration Review - Ethylene Oxide	OCSPP-22
Animal Testing	OCSPP-26
Biostimulants	OCSPP-28
FIFRA & Endangered Species Act	OCSPP-29
COVID-19 Disinfectants	OCSPP-31

Subject: FOR AA REVIEW AND CLEARANCE: Batch #3 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

Please see additional 6 fact sheets for your review and clearance **by noon Tuesday, 4/6**. These have been cleared by Rick and ODs. Please return the files with your edits and comments in track changes.
For those you reviewed last week and over the weekend (thank you!), we've worked with respective offices to incorporated your edits and comments. Rick has reviewed and deemed the revised version do not require your second review. They have been submitted to OCFO.

Included in batch 3 are:

TSCA Existing Chemicals Risk Evaluation - Formaldehyde IRIS Assessment	OCSPP-6
Rule - Application Exclusion Zone	OCSPP-18
Existing Chemicals Registration Review - Glyphosate	OCSPP-19
Existing Chemicals Registration Review - Chlorpyrifos	OCSPP-20
Use Restriction - Oxitec	OCSPP-24
Use Restriction - Seresto Pet Collars, New	OCSPP-25

Thanks

Subject: For OPP revision Batch #5 with AA comments - FY22 Appropriations Hearing Fact Sheets

Hi Darlene –

Michal has additional comments on #14 PFAS and containers and #20 Chlorpyrifos from the revision this morning. #20 is already very long. So when you revise, please also help reduce/streamline the bullet points to keep to 1 page.

#23 Dicamba also has comments, and like #20, please help reduce to 1 page.

Thanks so much

Dear Michal,

In this last batch, we include the last fact sheet (PFAS in Pesticide Containers) for your review and clearance. The next 4 attached fact sheets have been revised by offices to incorporate your substantial comments from last evening. We request your second look before sending to OCFO.

Included in batch #5 are:

Dicamba	OCSPP-23
TSCA Existing Chemicals Risk Evaluation - Formaldehyde IRIS	OCSPP-6
PFAS - Pesticide Containers, New	OCSPP-14
Rule - Application Exclusion Zone	OCSPP-18
Existing Chemicals Registration Review - Chlorpyrifos	OCSPP-20

Thank you.

Subject: FOR AA REVIEW AND CLEARANCE: Batch #1 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

The attached fact sheets are to prepare the Administrator for FY2022 Appropriations Hearings, scheduled as shown below. Once OCSPP submit these to OCFO, they will go through further reviews by OCIR, OCFO and OGC. The prep sessions with the Administrator and AAs are being by OCIR and OCFO.
These fact sheets are the first of several batches that we request your review and clearance **by 3pm, Monday, April 5**. Please return the files with your edits and your comments in track changes.
They have been reviewed and cleared by respective Office Directors and Rick.

Committee	Date
HAC	April 21, 2021 Time TBD
SEPW	April 28, 2021 at 10 AM
HEC	April 29, 2021 Time TBD
SAC	May 12, 2021 Time TBD

The first attachment is a list of fact sheets that you can expect before COB tomorrow. In Batch #1, the following fact sheets are included:

TSCA New Chemicals	OCSPP-1
TSCA Existing Chemicals Risk Evaluation	OCSPP-2
TSCA Existing Chemicals Risk Evaluation - Asbestos	OCSPP-3
TSCA Existing Chemicals Risk Evaluation - Systematic Review	OCSPP-4
TSCA Existing Chemicals Risk Evaluation - Data Gathering, New	OCSPP-5
TSCA Existing Chemicals Risk Management	OCSPP-7
TSCA Existing Chemicals Risk Management - PCBs	OCSPP-8
TSCA Existing Chemicals Risk Management - Methylene Chloride	OCSPP-9
TSCA Existing Chemicals Risk Management - Recent PBT Rules, New	OCSPP-10
TSCA - GAO Audit on Chemicals	OCSPP-12
PFAS - TRI and TSCA	OCSPP-13
Lead Based Paint	OCSPP-15
Pollution Prevention, New	OCSPP-16

Subject: FOR OPP IO REVIEW: Press Inquiry - NBC10 Boston re: Seresto Pet Collars DDL: ASAP

Hello,

For your review, please find attached and linked, our response to NBC Boston's investigative reporter regarding the Seresto pet collars. The reporter's deadline is 2:30. Can you please provide any comments/edits ASAP? Thank you!

INCOMING:

- Is the Seresto flea and tick collar safe? How does it compare with similar products on the market, in terms of safety for pets and humans?
- Records released by the EPA show the incident data system maintained by its pesticide office contains some 75,000 recorded incidents involving Seresto products. Has the EPA documented a similar number of incidents regarding other flea and tick collars on the market?
- Has the EPA investigated incidents involving Seresto collars? Has it established that Seresto collars caused adverse effects in pets or humans?
- Has the EPA done enough to inform the public about any potential risk associated with Seresto products?

Cc: Press <Press@epa.gov>
Subject: Reaching out from NBC10 Boston

Good morning: My name is Jim Haddadin, and I'm a producer at the NBC10 Boston television station. I hope you're all well.

We're reporting this week on recent concerns raised in a story by USA Today and the Midwest Center for Investigative Reporting regarding the number of incidents documented by the EPA involving Seresto flea and tick collars.

As you're likely aware, a congressional subcommittee recently requested a variety of documents from the company that sells Seresto products. Its chairman also called on the company that sells these collars to voluntarily recall them from the market pending further investigation.

We're preparing a report on the subject, and we'd appreciate an opportunity to speak with an EPA representative on camera for the piece. We're available to meet someone in the Boston area today or tomorrow for an in-person interview (preferably outdoors). We can also schedule a brief video call, if that's more convenient. I ask that you please let me know by **Wednesday morning, April 7**, if there's an opportunity to schedule an interview.

Alternatively, we request that you please send a written response to the questions below by **2:30 p.m. on Wednesday, April 7** at the latest.

Is the Seresto flea and tick collar safe? How does it compare with similar products on the market, in terms of safety for pets and humans?

Records released by the EPA show the incident data system maintained by its pesticide office contains some 75,000 recorded incidents involving Seresto products. Has the EPA documented a similar number of incidents regarding other flea and tick collars on the market?

Has the EPA investigated incidents involving Seresto collars? Has it established that Seresto collars caused adverse effects in pets or humans?

Has the EPA done enough to inform the public about any potential risk associated with Seresto products?

Thanks,

Jim Haddadin

Subject: FOR AA REVIEW AND CLEARANCE: Batch #1 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

The attached fact sheets are to prepare the Administrator for FY2022 Appropriations Hearings, scheduled as shown below. Once OCSPP submit these to OCFO, they will go through further reviews by OCIR, OCFO and OGC. The prep sessions with the Administrator and AAs are being by OCIR and OCFO.
These fact sheets are the first of several batches that we request your review and clearance **by 3pm, Monday, April 5**. Please return the files with your edits and your comments in track changes.
They have been reviewed and cleared by respective Office Directors and Rick.

Committee	Date
HAC	April 21, 2021 Time TBD
SEPW	April 28, 2021 at 10 AM
HEC	April 29, 2021 Time TBD
SAC	May 12, 2021 Time TBD

The first attachment is a list of fact sheets that you can expect before COB tomorrow. In Batch #1, the following fact sheets are included:

TSCA New Chemicals	OCSPP-1
TSCA Existing Chemicals Risk Evaluation	OCSPP-2
TSCA Existing Chemicals Risk Evaluation - Asbestos	OCSPP-3
TSCA Existing Chemicals Risk Evaluation - Systematic Review	OCSPP-4
TSCA Existing Chemicals Risk Evaluation - Data Gathering, New	OCSPP-5
TSCA Existing Chemicals Risk Management	OCSPP-7
TSCA Existing Chemicals Risk Management - PCBs	OCSPP-8
TSCA Existing Chemicals Risk Management - Methylene Chloride	OCSPP-9
TSCA Existing Chemicals Risk Management - Recent PBT Rules, New	OCSPP-10
TSCA - GAO Audit on Chemicals	OCSPP-12
PFAS - TRI and TSCA	OCSPP-13
Lead Based Paint	OCSPP-15
Pollution Prevention, New	OCSPP-16

Thank you,
Khanh

Ed and Mike,

Hello. Please see the attached for revised the chlorpyrifos fact sheet (clean and tracked revisions changes). Apparently, Michal was reviewing a shared version earlier and saw some of the revisions. Thank you.

Tim

Good morning Trish/Melissa/Dana,

Michal had some additional comments for chlorpyrifos. Sorry about the multiple rounds of review. Hopefully this will the last round. They also would like this to stay at 1-page. Let me know if you need help on what is being asked. Seems like merging the beginning bullet, etc.

Hi Darlene –

Michal has additional comments on #14 PFAS and containers and #20 Chlorpyrifos from the revision this morning. #20 is already very long. So when you revise, please also help reduce/streamline the bullet points to keep to 1 page.

#23 Dicamba also has comments, and like #20, please help reduce to 1 page.

Thanks so much

Subject: FOR AA REVIEW AND CLEARANCE: Batch #2 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

Please see additional 4 fact sheets for your review and clearance by 3pm, Monday, April 5.
Please return these files with your edits and comments in track changes.
We're taking your feedback from yesterday and applying to the remaining 15 fact sheets. They will not be ready for your review until Monday.

Included in batch 2 are:

TSCA Fee Rule	OCSPP-11
TRI Program	OCSPP-17
Biotech/Plant Incorporated Protectants	OCSPP-27
Pollinators	OCSPP-30

Thank you and hope you'll have a nice weekend.

Subject: FOR AA REVIEW AND CLEARANCE: Batch #1 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

The attached fact sheets are to prepare the Administrator for FY2022 Appropriations Hearings, scheduled as shown below. Once OCSPP submit these to OCFO, they will go through further reviews by OCIR, OCFO and OGC. The prep sessions with the Administrator and AAs are being by OCIR and OCFO.
These fact sheets are the first of several batches that we request your review and clearance **by 3pm, Monday, April 5**. Please return the files with your edits and your comments in track changes.
They have been reviewed and cleared by respective Office Directors and Rick.

<image001.png>

The first attachment is a list of fact sheets that you can expect before COB tomorrow. In Batch #1, the following fact sheets are included:

TSCA New Chemicals	OCSPP-1
TSCA Existing Chemicals Risk Evaluation	OCSPP-2
TSCA Existing Chemicals Risk Evaluation - Asbestos	OCSPP-3
TSCA Existing Chemicals Risk Evaluation - Systematic Review	OCSPP-4
TSCA Existing Chemicals Risk Evaluation - Data Gathering, New	OCSPP-5
TSCA Existing Chemicals Risk Management	OCSPP-7
TSCA Existing Chemicals Risk Management - PCBs	OCSPP-8
TSCA Existing Chemicals Risk Management - Methylene Chloride	OCSPP-9
TSCA Existing Chemicals Risk Management - Recent PBT Rules, New	OCSPP-10
TSCA - GAO Audit on Chemicals	OCSPP-12
PFAS - TRI and TSCA	OCSPP-13
Lead Based Paint	OCSPP-15
Pollution Prevention, New	OCSPP-16

Thank you,
Khanh

Subject: Petition to Cancel Registration of PNR1427 (Brand Name Seresto) under the Federal Insecticide, Fungicide, and Rodenticide Act; Reg. No. 11556-155

Dear Administrator Regan, Acting Assistant Administrator Freedhoff, and Acting Director Messina,

On behalf of the Center for Biological Diversity and its 1.7 million members and supporters and their beloved companion animals, we are submitting the attached petition to cancel its registration of insecticide product PNR1427, more commonly known by its brand name Seresto; Registration No. 11556-155.

This product, which is registered under the Federal Insecticide, Fungicide, and Rodenticide Act for use on adult dogs and puppies and on adult cats and kittens for the purpose of flea and tick treatment, poses a severe risk to the animals on which it is used and to human health. According to a recent aggregate incident summary report, since this product was introduced in 2012, EPA has received over 75,000 adverse incident reports, including at least 1,698 reports linking the use of this product to pet deaths and at least 700 involving human harm.

Because these harms amount to significant unreasonable adverse effects under FIFRA, cancellation of this product is not only warranted but essential for protecting public health, consumers, imperiled wildlife, and companion animals. In the interim pending complete cancellation of the product, EPA should take additional steps to suspend Seresto's registration.

Electronic access to the enclosures filed in support of this petition can be found here: Seresto Cancellation Petition

Copies of the petition and these enclosures are also being sent to you via Certified Mail.

Please do not hesitate to contact me to discuss this matter further.

Sincerely,

Hannah Connor
Senior Attorney, Environmental Health
Center for Biological Diversity
(202) 681-1676

Subject: OCSPP HFS Return: OCSPP-25 (Seresto).

Hi Dan and Khanh:

Thanks so much for the HFS! So far, we're going well and most have minor edits that do not require any further NPM action.

That said, for Seresto, we do have a return vis-à-vis the Talking Points (see attached). The Background and Key Points are great, but given the high visibility nature of Seresto, like many others with EJ issues or high Congressional scrutiny coming up in these Hearings, we think the Talking Points need some re-wording to both highlight the value of OPP, while acknowledging citizen and professional action and reporting on the issue. Also, to the extent that the Talking Points can give a timeline, clearer explanation of the current status and how the EU is doing on this (as a comparison), that would be useful.

Guidance in comments in the attached. I would be glad to discuss further by phone or e-mail.

Thanks!

Cheers,

Hi Michael—Attached is the response and production. We finally got it out the door on Friday evening. Please let me know if you have any questions. I'll keep you posted if/when we hear back from the Committee.

NOTE: As you'll see, we ended up only producing the PDF summary reports from registrants. We can offer the Excel file individual incident reports if they're interested in them. It would be an easy lift of a second production.

Thanks for everyone's help! –Kristien

> I know we are under a very short deadline to get these done. It looks like Michal didn't have any comments on the glyphosate and Oxitec fact sheets, so those can go to OCFO.
>
> For formaldehyde, we will need help primarily from OPPT, so I've cc: Yvette and Mark.

For AEZ and Chlorpyrifos, I've offered some suggestions to try to address Michal's feedback, but these will need input from OPP.

For Seresto, I've offered a minor change that I think will address Michal's comment.

Subject: RE: FOR AA REVIEW AND CLEARANCE: Batch #3 - FY22 Appropriations Hearing Fact Sheets

Hi Tim,

We accepted Rick's edits and revised the Congressional bullet as advised. Please find attached the tracked and clean versions:

- 4/5/21: Rick's and PRD's edits
- 4/6/21_tracked: Accepted Rick's edits and deleted comments, PRD's edits tracked
- 4/6/21_clean: All edits accepted and comments deleted

If anything else is needed, please let me know.

Thank you,
Trish

> I know we are under a very short deadline to get these done. It looks like Michal didn't have any comments on the glyphosate and Oxitec fact sheets, so those can go to OCFO.
>
> For formaldehyde, we will need help primarily from OPPT, so I've cc: Yvette and Mark.

For AEZ and Chlorpyrifos, I've offered some suggestions to try to address Michal's feedback, but these will need input from OPP.

For Seresto, I've offered a minor change that I think will address Michal's comment.

Dear Michal,

Please see additional 6 fact sheets for your review and clearance **by noon Tuesday, 4/6**. These have been cleared by Rick and ODs. Please return the files with your edits and comments in track changes.
For those you reviewed last week and over the weekend (thank you!), we've worked with respective offices to incorporated your edits and comments. Rick has reviewed and deemed the revised version do not require your second review. They have been submitted to OCFO.

Included in batch 3 are:

TSCA Existing Chemicals Risk Evaluation - Formaldehyde IRIS Assessment	OCSPP-6
Rule - Application Exclusion Zone	OCSPP-18
Existing Chemicals Registration Review - Glyphosate	OCSPP-19
Existing Chemicals Registration Review - Chlorpyrifos	OCSPP-20
Use Restriction - Oxitec	OCSPP-24
Use Restriction - Seresto Pet Collars, New	OCSPP-25

Thanks
Khanh

Subject: FOR AA REVIEW AND CLEARANCE: Batch #2 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

Please see additional 4 fact sheets for your review and clearance by 3pm, Monday, April 5.
Please return these files with your edits and comments in track changes.
We're taking your feedback from yesterday and applying to the remaining 15 fact sheets. They will not be ready for your review until Monday.

Included in batch 2 are:

TSCA Fee Rule	OCSPP-11
TRI Program	OCSPP-17
Biotech/Plant Incorporated Protectants	OCSPP-27
Pollinators	OCSPP-30

Thank you and hope you'll have a nice weekend.

Subject: FOR AA REVIEW AND CLEARANCE: Batch #1 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

The attached fact sheets are to prepare the Administrator for FY2022 Appropriations Hearings, scheduled as shown below. Once OCSPP submit these to OCFO, they will go through further reviews by OCIR, OCFO and OGC. The prep sessions with the Administrator and AAs are being by OCIR and OCFO.
These fact sheets are the first of several batches that we request your review and clearance **by 3pm, Monday, April 5**. Please return the files with your edits and your comments in track changes.
They have been reviewed and cleared by respective Office Directors and Rick.

The first attachment is a list of fact sheets that you can expect before COB tomorrow. In Batch #1, the following fact sheets are included:

TSCA New Chemicals	OCSPP-1
TSCA Existing Chemicals Risk Evaluation	OCSPP-2
TSCA Existing Chemicals Risk Evaluation - Asbestos	OCSPP-3
TSCA Existing Chemicals Risk Evaluation - Systematic Review	OCSPP-4
TSCA Existing Chemicals Risk Evaluation - Data Gathering, New	OCSPP-5
TSCA Existing Chemicals Risk Management	OCSPP-7
TSCA Existing Chemicals Risk Management - PCBs	OCSPP-8
TSCA Existing Chemicals Risk Management - Methylene Chloride	OCSPP-9
TSCA Existing Chemicals Risk Management - Recent PBT Rules, New	OCSPP-10
TSCA - GAO Audit on Chemicals	OCSPP-12
PFAS - TRI and TSCA	OCSPP-13
Lead Based Paint	OCSPP-15
Pollution Prevention, New	OCSPP-16

Thank you,
Khanh

Subject: DAA Comments on OPP Fact Sheets

Good afternoon,

We received comments back from the first tranche of fact sheets sent to Michal, all of which were OPPT. In some cases, Michal requests a pivot in the presentation of some of our information. The first attachment for methylene chloride (OPPT) is provided as an example of those comments as well as the paragraph pasted further below. Please use this information to help inform your revisions.

The remaining 8 attachments include comments from Rick, some of which refer to Michal's early comments to OPPT/TSCA fact sheets.

We continue to be under a very tight timeline to clear fact sheets through Michal. Can you please provide revised fact sheets to Khanh, Brian and I by **10AM Monday, April 5**? We're happy to receive on a rolling basis.

Feedback from Michal re: OPPT Facts Sheets:
Some edits, more comments. Please pay specific attention to the fact sheets on REs/risk management on existing chemicals. Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP) *Rick has flagged some areas where budget etc decisions could change outcomes before the hearings – there could be litigation decisions or outcomes that do the same.*

Thanks,
Dan

Mike,

Here's the latest tracking list. I was told for some of the more high-profile chemicals, it's ok if we go over one page a little. I tried to cut down PFAS, but this topic, but it still goes over a little. Let me know if you think it still needs to be cut to 1-page.

Sent to the Budget Team
Biotech
Biostimulants
Oxitec
Chlorpyrifos
AEZ
EtO

With Mike and Ed for clearance
Animal Testing - Waiting till Anna's meeting at end of day
PFAS – attached version with suggested edits to cut it down
Glyphosate – Sent back to PRD to address Rick's comment
Atrazine – Cutting down to 1-page. Made edits and sent to PRD clear.
ESA- Revised version with Mike (See attached email)
Seresto - Revised version with Mike (See attached email)
Dicamba - Revised version with Mike (See attached email)
Formaldehyde – Revised version with Mike (See attached email)

Waiting for DDs to send - None

Darlene

There may have been a bit of a mix up of versions.
I attached the version Kim edited to address Rick's comments.
I think you made some edits too – can you merry them up. thanks

Hi Darlene – Could you please help address additional comments from Rick on #14 and #23. The #14 version you sent this afternoon did not address his comments at all. Maybe the wrong version was attached?
These have not gone to Michal yet. So more comments still can come from her.

One by one, we're getting closer! Thanks for your help

Hi Darlene – We wanted to make sure that our list is consistent with yours. We're still waiting on the following OPP (these are the ones with DAA comments and still need to go to AA today):

PFAS - Pesticide Containers, New	OCSPP-14
Rule - Application Exclusion Zone	OCSPP-18
Existing Chemicals Registration Review - Glyphosate	OCSPP-19
Existing Chemicals Registration Review - Atrazine	OCSPP-21
Use Restriction - Seresto Pet Collars, New	OCSPP-25
Animal Testing	OCSPP-26

Thanks

Subject: DAA Comments on OPP Fact Sheets

Good afternoon,

We received comments back from the first tranche of fact sheets sent to Michal, all of which were OPPT. In some cases, Michal requests a pivot in the presentation of some of our information. The first attachment for methylene chloride (OPPT) is provided as an example of those comments as well as the paragraph pasted further below. Please use this information to help inform your revisions.

The remaining 8 attachments include comments from Rick, some of which refer to Michal's early comments to OPPT/TSCA fact sheets.

We continue to be under a very tight timeline to clear fact sheets through Michal. Can you please provide revised fact sheets to Khanh, Brian and I by **10AM Monday, April 5**? We're happy to receive on a rolling basis.

Feedback from Michal re: OPPT Facts Sheets:
Some edits, more comments. Please pay specific attention to the fact sheets on REs/risk management on existing chemicals. Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP) *Rick has flagged some areas where budget etc decisions could change outcomes before the hearings – there could be litigation decisions or outcomes that do the same.*

Thanks,
Dan

URGENT – please see Rick's comment on the following Fact Sheets – which need to be revised NLT Monday 10 am.

- PFAS
- AEZ
- Glyphosate
- Chlorpyrifos
- Atrazine
- EtO
- Oxitec
- Seresto

Please provided revised FSs in both tack changes and clean versions as soon as completed so we can forward when ready.

Also referring to the note below about TSCA's FSs and Michal's comments, similar comments are made by Rick in some of OPP's FSs - "*On some of the TSCA fact sheets, Michal had a comment about how the outcomes of litigation would impact next steps. However we address her comment on that point in the TSCA fact sheets should also be included here.*" Please take particular attention to these where commented. Thanks

Dear Michal,

Please see additional 6 fact sheets for your review and clearance **by noon Tuesday, 4/6**. These have been cleared by Rick and ODs. Please return the files with your edits and comments in track changes.
For those you reviewed last week and over the weekend (thank you!), we've worked with respective offices to incorporated your edits and comments. Rick has reviewed and deemed the revised version do not require your second review. They have been submitted to OCFO.

Included in batch 3 are:

TSCA Existing Chemicals Risk Evaluation - Formaldehyde IRIS Assessment	OCSPP-6
Rule - Application Exclusion Zone	OCSPP-18
Existing Chemicals Registration Review - Glyphosate	OCSPP-19
Existing Chemicals Registration Review - Chlorpyrifos	OCSPP-20
Use Restriction - Oxitec	OCSPP-24
Use Restriction - Seresto Pet Collars, New	OCSPP-25

Thanks

Subject: FOR AA REVIEW AND CLEARANCE: Batch #2 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

Please see additional 4 fact sheets for your review and clearance by 3pm, Monday, April 5.
Please return these files with your edits and comments in track changes.
We're taking your feedback from yesterday and applying to the remaining 15 fact sheets. They will not be ready for your review until Monday.

Included in batch 2 are:

TSCA Fee Rule	OCSPP-11
TRI Program	OCSPP-17
Biotech/Plant Incorporated Protectants	OCSPP-27
Pollinators	OCSPP-30

Thank you and hope you'll have a nice weekend.

Subject: FOR AA REVIEW AND CLEARANCE: Batch #1 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

The attached fact sheets are to prepare the Administrator for FY2022 Appropriations Hearings, scheduled as shown below. Once OCSPP submit these to OCFO, they will go through further reviews by OCIR, OCFO and OGC. The prep sessions with the Administrator and AAs are being by OCIR and OCFO.
These fact sheets are the first of several batches that we request your review and clearance **by 3pm, Monday, April 5**. Please return the files with your edits and your comments in track changes.

They have been reviewed and cleared by respective Office Directors and Rick.

The first attachment is a list of fact sheets that you can expect before COB tomorrow. In Batch #1, the following fact sheets are included:

TSCA New Chemicals	OCSPP-1
TSCA Existing Chemicals Risk Evaluation	OCSPP-2
TSCA Existing Chemicals Risk Evaluation - Asbestos	OCSPP-3
TSCA Existing Chemicals Risk Evaluation - Systematic Review	OCSPP-4
TSCA Existing Chemicals Risk Evaluation - Data Gathering, New	OCSPP-5
TSCA Existing Chemicals Risk Management	OCSPP-7
TSCA Existing Chemicals Risk Management - PCBs	OCSPP-8
TSCA Existing Chemicals Risk Management - Methylene Chloride	OCSPP-9
TSCA Existing Chemicals Risk Management - Recent PBT Rules, New	OCSPP-10
TSCA - GAO Audit on Chemicals	OCSPP-12
PFAS - TRI and TSCA	OCSPP-13
Lead Based Paint	OCSPP-15
Pollution Prevention, New	OCSPP-16

Thank you,
Khanh

Subject: FW: FOR AA REVIEW AND CLEARANCE: Batch #3 - FY22 Appropriations Hearing Fact Sheets

I know we are under a very short deadline to get these done. It looks like Michal didn't have any comments on the glyphosate and Oxitec fact sheets, so those can go to OCFO.

For formaldehyde, we will need help primarily from OPPT, so I've cc: Yvette and Mark.

For AEZ and Chlorpyrifos, I've offered some suggestions to try to address Michal's feedback, but these will need input from OPP.

For Seresto, I've offered a minor change that I think will address Michal's comment.

Subject: FOR AA REVIEW AND CLEARANCE: Batch #3 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

Please see additional 6 fact sheets for your review and clearance **by noon Tuesday, 4/6**. These have been cleared by Rick and ODs. Please return the files with your edits and comments in track changes.
For those you reviewed last week and over the weekend (thank you!), we've worked with respective offices to incorporated your edits and comments. Rick has reviewed and deemed the revised version do not require your second review. They have been submitted to OCFO.

Included in batch 3 are:

TSCA Existing Chemicals Risk Evaluation - Formaldehyde IRIS Assessment	OCSPP-6
Rule - Application Exclusion Zone	OCSPP-18
Existing Chemicals Registration Review - Glyphosate	OCSPP-19
Existing Chemicals Registration Review - Chlorpyrifos	OCSPP-20
Use Restriction - Oxitec	OCSPP-24
Use Restriction - Seresto Pet Collars, New	OCSPP-25

Thanks
Khanh

Subject: FOR AA REVIEW AND CLEARANCE: Batch #1 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

The attached fact sheets are to prepare the Administrator for FY2022 Appropriations Hearings, scheduled as shown below. Once OCSPP submit these to OCFO, they will go through further reviews by OCIR, OCFO and OGC. The prep sessions with the Administrator and AAs are being by OCIR and OCFO.
These fact sheets are the first of several batches that we request your review and clearance **by 3pm, Monday, April 5**. Please return the files with your edits and your comments in track changes.
They have been reviewed and cleared by respective Office Directors and Rick.

The first attachment is a list of fact sheets that you can expect before COB tomorrow. In Batch #1, the following fact sheets are included:

TSCA New Chemicals	OCSPP-1
TSCA Existing Chemicals Risk Evaluation	OCSPP-2
TSCA Existing Chemicals Risk Evaluation - Asbestos	OCSPP-3

TSCA Existing Chemicals Risk Evaluation - Systematic Review	OCSPP-4
TSCA Existing Chemicals Risk Evaluation - Data Gathering, New	OCSPP-5
TSCA Existing Chemicals Risk Management	OCSPP-7
TSCA Existing Chemicals Risk Management - PCBs	OCSPP-8
TSCA Existing Chemicals Risk Management - Methylene Chloride	OCSPP-9
TSCA Existing Chemicals Risk Management - Recent PBT Rules, New	OCSPP-10
TSCA - GAO Audit on Chemicals	OCSPP-12
PFAS - TRI and TSCA	OCSPP-13
Lead Based Paint	OCSPP-15
Pollution Prevention, New	OCSPP-16

Thank you,
Khanh

Importance: High

Hi Darlene –

We're still waiting from OPP revisions for the following FS with Michal's comments from yesterday: #14 PFAS Pesticide Containers, #20, Chlorpyrifos, #22 EtO, #26 Animal Testing. OCIR/OCFO is pinging us for these last fact sheets.

On #23 Dicamba, will you be able to get Rick's question resolved soon?.

- In October 2020, after considering data received from academia, state partners, and the manufacturers, EPA worked with a broad group of parties to strengthen the pesticide label application directions for the 2021 season to address the deficiencies identified by the Court.

Ex. 5 Deliberative Process (DP)

- The Office of the Inspector General is conducting an investigation regarding EPA's 2016 and 2018 registration decisions for dicamba.

Author
Maybe describe what this means in plain English?

Author

Subject: FOR AA REVIEW AND CLEARANCE: Batch #3 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

Please see additional 6 fact sheets for your review and clearance **by noon Tuesday, 4/6**. These have been cleared by Rick and ODs. Please return the files with your edits and comments in track changes.
For those you reviewed last week and over the weekend (thank you!), we've worked with respective offices to incorporated your edits and comments. Rick has reviewed and deemed the revised version do not require your second review. They have been submitted to OCFO.

Included in batch 3 are:

TSCA Existing Chemicals Risk Evaluation - Formaldehyde IRIS Assessment	OCSPP-6
Rule - Application Exclusion Zone	OCSPP-18
Existing Chemicals Registration Review - Glyphosate	OCSPP-19
Existing Chemicals Registration Review - Chlorpyrifos	OCSPP-20
Use Restriction - Oxitec	OCSPP-24
Use Restriction - Seresto Pet Collars, New	OCSPP-25

Thanks

Subject: FOR AA REVIEW AND CLEARANCE: Batch #1 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

The attached fact sheets are to prepare the Administrator for FY2022 Appropriations Hearings, scheduled as shown below. Once OCSPP submit these to OCFO, they will go through further reviews by OCIR, OCFO and OGC. The prep sessions with the Administrator and AAs are being by OCIR and OCFO.
These fact sheets are the first of several batches that we request your review and clearance **by 3pm, Monday, April 5**. Please return the files with your edits and your comments in track changes.
They have been reviewed and cleared by respective Office Directors and Rick.

Committee	Date
HAC	April 21, 2021 Time TBD
SEPW	April 28, 2021 at 10 AM
HEC	April 29, 2021 Time TBD
SAC	May 12, 2021 Time TBD

The first attachment is a list of fact sheets that you can expect before COB tomorrow. In Batch #1, the following fact sheets are included:

TSCA New Chemicals	OCSPP-1
TSCA Existing Chemicals Risk Evaluation	OCSPP-2
TSCA Existing Chemicals Risk Evaluation - Asbestos	OCSPP-3
TSCA Existing Chemicals Risk Evaluation - Systematic Review	OCSPP-4
TSCA Existing Chemicals Risk Evaluation - Data Gathering, New	OCSPP-5
TSCA Existing Chemicals Risk Management	OCSPP-7
TSCA Existing Chemicals Risk Management - PCBs	OCSPP-8
TSCA Existing Chemicals Risk Management - Methylene Chloride	OCSPP-9
TSCA Existing Chemicals Risk Management - Recent PBT Rules, New	OCSPP-10
TSCA - GAO Audit on Chemicals	OCSPP-12
PFAS - TRI and TSCA	OCSPP-13
Lead Based Paint	OCSPP-15
Pollution Prevention, New	OCSPP-16

Thank you,
Khanh

Subject: FW: OPP revision? on Batches #4 & 5 with AA comments - FY22 Appropriations Hearing Fact Sheets

Mike,

Since the hearing is at the end of the month and GA is still pending due to the recent new data,

Ex. 5 Deliberative Process (DP)

- FIFRA section 24(c) allows states to register an additional use of a pesticide to meet special local needs. North Carolina, Tennesse and Georgia had submitted requests to expand the OTT uses of dicamba in their states. EPA recently disapproved the 24(c)

Ex. 5 Deliberative Process (DP)

Subject: RE: OPP revision? on Batches #4 & 5 with AA comments - FY22 Appropriations Hearing Fact Sheets

Good point.
I revised the text in the attached under the assumption that **Ex. 5 Deliberative Process (DP)** **Ex. 5 Deliberative Process (DP)** so would very much suggest that section be flagged for any updates before the hearing.

Importance: High

Hi Darlene –

We're still waiting from OPP revisions for the following FS with Michal's comments from yesterday: #14 PFAS Pesticide Containers, #20, Chlorpyrifos, #22 EtO, #26 Animal Testing. OCIR/OCFO is pinging us for these last fact sheets.

On #23 Dicamba, will you be able to get Rick's question resolved soon?.

- In October 2020, after considering data received from academia, state partners, and the manufacturers, EPA worked with a broad group of parties to strengthen the pesticide label application directions for the 2021 season to address the deficiencies identified by the Court.

Ex. 5 Deliberative Process (DP)

- The Office of the Inspector General is conducting an investigation regarding EPA's 2016 and 2018 registration decisions for dicamba.

Author
Maybe describe what this means in plain English?

Author
FLAG: Aren't we completing the TN review this week? What is the timing on GA? Given that the budget hearings are later this month, should we be adding that information now OR flagging that an update will be needed prior to the hearings?

Thanks for your help.

Hi Darlene –

Michal has additional comments on #14 PFAS and containers and #20 Chlorpyrifos from the revision this morning. #20 is already very long. So when you revise, please also help reduce/streamline the bullet points to keep to 1 page.

#23 Dicamba also has comments, and like #20, please help reduce to 1 page.

Thanks so much
Khanh

Subject: FOR OPP IO REVIEW: Press Inquiry - NBC10 Boston re: Seresto Pet Collars DDL: ASAP

Hello,

For your review, please find attached and linked, our response to NBC Boston's investigative reporter regarding the Seresto pet collars. The reporter's deadline is 2:30. Can you please provide any comments/edits ASAP? Thank you!

INCOMING:

- Is the Seresto flea and tick collar safe? How does it compare with similar products on the market, in terms of safety for pets and humans?
- Records released by the EPA show the incident data system maintained by its pesticide office contains some 75,000 recorded incidents involving Seresto products. Has the EPA documented a similar number of incidents regarding other flea and tick collars on the market?
- Has the EPA investigated incidents involving Seresto collars? Has it established that Seresto collars caused adverse effects in pets or humans?
- Has the EPA done enough to inform the public about any potential risk associated with Seresto products?

Good morning all,

Just wanted to share this inquiry. Are you amenable to an interview? If so, reporter needs to know by tomorrow morning. If written responses are the way to go here, the deadline is 2:30 pm tomorrow.

Thanks,

Ken

Subject: Reaching out from NBC10 Boston

Good morning: My name is Jim Haddadin, and I'm a producer at the NBC10 Boston television station. I hope you're all well.

We're reporting this week on recent concerns raised in a story by USA Today and the Midwest Center for Investigative Reporting regarding the number of incidents documented by the EPA involving Seresto flea and tick collars.

As you're likely aware, a congressional subcommittee recently requested a variety of documents from the company that sells Seresto products. Its chairman also called on the company that sells these collars to voluntarily recall them from the market pending further investigation.

We're preparing a report on the subject, and we'd appreciate an opportunity to speak with an EPA representative on camera for the piece. We're available to meet someone in the Boston area today or tomorrow for an in-person interview (preferably outdoors). We can also schedule a brief video call, if that's more convenient. I ask that you please let me know by **Wednesday morning, April 7**, if there's an opportunity to schedule an interview.

Alternatively, we request that you please send a written response to the questions below by **2:30 p.m. on Wednesday, April 7** at the latest.

Is the Seresto flea and tick collar safe? How does it compare with similar products on the market, in terms of safety for pets and humans?

Records released by the EPA show the incident data system maintained by its pesticide office contains some 75,000 recorded incidents involving Seresto products. Has the EPA documented a similar number of incidents regarding other flea and tick collars on the market?

Has the EPA investigated incidents involving Seresto collars? Has it established that Seresto collars caused adverse effects in pets or humans?

Has the EPA done enough to inform the public about any potential risk associated with Seresto products?

Thanks,

Jim Haddadin

I checked with RD about the if there's anything we can add to the comment about when the directive will happen and Catherine said they advise against sharing the details publicly until the registrant has received the letter. The team is working with OGC and OECA. I suggesting flagging it for updates closer to the hearing and they agreed. I added that in the comment section on the marked up version. Khanh is pinging me, so I'll send it on now.

Within FIFRA authority, this month we will be issuing a directive to the company to provide additional information to better characterize the nature and scale of the incident reports.

Subject: OCSPP HFS Return: OCSPP-25 (Seresto).

Hi Dan and Khanh:

Thanks so much for the HFS! So far, we're going well and most have minor edits that do not require any further NPM action.

That said, for Seresto, we do have a return vis-à-vis the Talking Points (see attached). The Background and Key Points are great, but given the high visibility nature of Seresto, like many others with EJ issues or high Congressional scrutiny coming up in these Hearings, we think the Talking Points need some re-wording to both highlight the value of OPP, while acknowledging citizen and professional action and reporting on the issue. Also, to the extent that the Talking Points can give a timeline, clearer explanation of the current status and how the EU is doing on this (as a comparison), that would be useful.

Guidance in comments in the attached. I would be glad to discuss further by phone or e-mail.

Thanks!

I know we are under a very short deadline to get these done. It looks like Michal didn't have any comments on the glyphosate and Oxitec fact sheets, so those can go to OCFO.

For formaldehyde, we will need help primarily from OPPT, so I've cc: Yvette and Mark.

For AEZ and Chlorpyrifos, I've offered some suggestions to try to address Michal's feedback, but these will need input from OPP.

For Seresto, I've offered a minor change that I think will address Michal's comment.

Dear Michal,

The attached fact sheets are to prepare the Administrator for FY2022 Appropriations Hearings, scheduled as shown below. Once OCSPP submit these

to OCFO, they will go through further reviews by OCIR, OCFO and OGC. The prep sessions with the Administrator and AAs are being by OCIR and OCFO.
These fact sheets are the first of several batches that we request your review and clearance **by 3pm, Monday, April 5**. Please return the files with your edits and your comments in track changes.
They have been reviewed and cleared by respective Office Directors and Rick.

The first attachment is a list of fact sheets that you can expect before COB tomorrow. In Batch #1, the following fact sheets are included:

TSCA New Chemicals	OCSPP-1
TSCA Existing Chemicals Risk Evaluation	OCSPP-2
TSCA Existing Chemicals Risk Evaluation - Asbestos	OCSPP-3
TSCA Existing Chemicals Risk Evaluation - Systematic Review	OCSPP-4
TSCA Existing Chemicals Risk Evaluation - Data Gathering, New	OCSPP-5
TSCA Existing Chemicals Risk Management	OCSPP-7
TSCA Existing Chemicals Risk Management - PCBs	OCSPP-8
TSCA Existing Chemicals Risk Management - Methylene Chloride	OCSPP-9
TSCA Existing Chemicals Risk Management - Recent PBT Rules, New	OCSPP-10
TSCA - GAO Audit on Chemicals	OCSPP-12
PFAS - TRI and TSCA	OCSPP-13
Lead Based Paint	OCSPP-15
Pollution Prevention, New	OCSPP-16

Thank you,
Khanh

Request 1:
Proposed Response: Narrative paragraph(s) describing IDS.
Assignment: OPP lead
Status: Awaiting OPP input

Request 2:
Proposed Response: Enclose the requested list.
Assignment: OPP (Kimberly Smith) and OCIR (Kristien to let Committee know we'll be at least a week delayed)
Status: Awaiting list from OPP

Request 3:
Proposed Response: Narrative paragraph(s) to address IDS policies and procedures
Assignment: First draft language from OGC (Erin Koch) and review for potential additional text from OCSPP/OPP (reference or text can be used from https://www.epa.gov/pesticide-incidents/incident-reporting-pesticide-manufacturers-registrants, as suggested by Aaron Niman).
Status: Forrest Pittman (OGC) provided draft language with placeholders for OPP—need input from OPP

To: Keigwin, Richard [Keigwin.Richard@epa.gov]
Subject: Re: FOR AA FINAL REVIEW AND CLEARANCE: Batch #7 - FY22 Appropriations Hearing Fact Sheets

Those both work for me. Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

Sent from my iPhone

On Apr 8, 2021, at 12:49 PM, Keigwin, Richard <Keigwin.Richard@epa.gov> wrote:

Looking at your comments, are you okay with something along the lines of the following?

Atrazine
OGC (and apparently DOJ) are concerned about Ex. 5 AC/DP
Ex. 5 AC/DP Perhaps rather than saying

- "EPA issued its registration review Interim Decision for atrazine in September 2020, and EPA is Ex. 5 Deliberative Process (DP) in accordance with President Biden's Executive Orders and other direction to reexamine decisions made in the last Administration." (emphasis added)

To read (Ex. 5 Attorney Client (AC) / DPP):

- "EPA issued its registration review Interim Decision for atrazine in September 2020, and EPA is **determining our next steps in the registration review** in accordance with President Biden's Executive Orders and other direction to reexamine decisions made in the last Administration."

ETO
Regarding the bullets Ex. 5 Deliberative Process (DP), I think what the team was trying to say was what we did then, not where we are landing. What if we replaced the cullet that currently says:

- Ex. 5 Deliberative Process (DP)

With the following:

- In moving to risk mitigation, the Agency will rely on the best scientific data coupled with a consideration of the benefits of sterilizing medical devices and the availability of alternatives, consistent with the requirements under FIFRA.

Dear Michal,

In this last batch, we include the last fact sheet (PFAS in Pesticide Containers) for your review and clearance.
The next 4 attached fact sheets have been revised by offices to incorporate your substantial comments from last evening. We request your second look before sending to OCFO.

Included in batch #5 are:

Dicamba	OCSPP-23
TSCA Existing Chemicals Risk Evaluation - Formaldehyde IRIS	OCSPP-6
PFAS - Pesticide Containers, New	OCSPP-14
Rule - Application Exclusion Zone	OCSPP-18
Existing Chemicals Registration Review - Chlorpyrifos	OCSPP-20

Thank you.

Subject: FOR AA REVIEW AND CLEARANCE: Batch #4 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

Please see additional 6 fact sheets for your review and clearance.
In a separate email, we will send the revised fact sheets incorporating your substantial comments from last evening for your second look before sending to OCFO.

Included in batch #4 are:

TSCA Existing Chemicals Risk Evaluation - Systematic Review	OCSPP-4
Existing Chemicals Registration Review - Ethylene Oxide	OCSPP-22
Animal Testing	OCSPP-26
Biostimulants	OCSPP-28
FIFRA & Endangered Species Act	OCSPP-29
COVID-19 Disinfectants	OCSPP-31

Subject: FOR AA REVIEW AND CLEARANCE: Batch #3 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

Please see additional 6 fact sheets for your review and clearance **by noon Tuesday, 4/6**. These have been cleared by Rick and ODs. Please return the files with your edits and comments in track changes.
For those you reviewed last week and over the weekend (thank you!), we've worked with respective offices to incorporated your edits and comments. Rick has reviewed and deemed the revised version do not require your second review. They have been submitted to OCFO.

Included in batch 3 are:

TSCA Existing Chemicals Risk Evaluation - Formaldehyde IRIS Assessment	OCSPP-6
Rule - Application Exclusion Zone	OCSPP-18
Existing Chemicals Registration Review - Glyphosate	OCSPP-19
Existing Chemicals Registration Review - Chlorpyrifos	OCSPP-20
Use Restriction - Oxitec	OCSPP-24
Use Restriction - Seresto Pet Collars, New	OCSPP-25

Subject: FOR AA REVIEW AND CLEARANCE: Batch #1 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

The attached fact sheets are to prepare the Administrator for FY2022 Appropriations Hearings, scheduled as shown below. Once OCSPP submit these to OCFO, they will go through further reviews by OCIR, OCFO and OGC. The prep sessions with the Administrator and AAs are being by OCIR and OCFO.
These fact sheets are the first of several batches that we request your review and clearance **by 3pm, Monday, April 5**. Please return the files with your edits and your comments in track changes.
They have been reviewed and cleared by respective Office Directors and Rick.

Subject: FOR AA REVIEW AND CLEARANCE: Batch #1 - FY22PB Congressional Justification Program Project Narratives

Dear Michal,

Please see attached first 5 program project narratives for your review and clearance by **noon, Monday, 5/3**.

Each narrative is part of a fuller document which includes a Resources table and Performance table (as applicable). Those tables will be merged from OCFO Budget Formulation System (BFS) when the data has been finalized. Due to short turnaround and simultaneous efforts on different budget pieces by all offices across the agency, a complete narrative won't be ready until end of next week, just before the OMB review stage. We've attached an example from FY21PB for your reference (pdf file).

These have been cleared by Rick and ODs. Please return the files with your edits and comments in track changes. The five in Batch #1 are:

- FY22 CJ_09_STAG_Pest Prog Imp_04.30.21_for AA review.docx
- FY22 CJ_10_STAG_Cat Grant_Lead_04.30.21_for AA review.docx
- FY22 CJ_13_STAG_Cat Grant P2_04.30.21_for AA review.docx
- FY22 CJ_C2_EPM_ Science Policy Biotech_04.30.21_for AA review.docx
- FY22 CJ_D7_EPM_Lead Risk Reduction_04.30.21_for AA review.docx

Thank you.

Subject: FOR AA REVIEW AND CLEARANCE: Batch #3 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

Please see additional 6 fact sheets for your review and clearance **by noon Tuesday, 4/6**. These have been cleared by Rick and ODs. Please return the files with your edits and comments in track changes.
For those you reviewed last week and over the weekend (thank you!), we've worked with respective offices to incorporated your edits and comments. Rick has reviewed and deemed the revised version do not require your second review. They have been submitted to OCFO.

Included in batch 3 are:

TSCA Existing Chemicals Risk Evaluation - Formaldehyde IRIS Assessment	OCSPP-6
Rule - Application Exclusion Zone	OCSPP-18
Existing Chemicals Registration Review - Glyphosate	OCSPP-19
Existing Chemicals Registration Review - Chlorpyrifos	OCSPP-20
Use Restriction - Oxitec	OCSPP-24
Use Restriction - Seresto Pet Collars, New	OCSPP-25

Thanks

Subject: RE: FOR AA FINAL REVIEW AND CLEARANCE: Batch #7 - FY22 Appropriations Hearing Fact Sheets

Based upon an exchange of emails with Michal, the attached are ready to be cleaned up and sent to OCFO. In the atrazine fact sheet, we changed some language to address OGC's litigation concern. In the ETO fact sheet, we replaced the bullet that Michal flagged with new language that is consistent with our path forward.

Dear Michal,

Please see additional 6 fact sheets for your review and clearance.
In a separate email, we will send the revised fact sheets incorporating your substantial comments from last evening for your second look before sending to OCFO.

Included in batch #4 are:

TSCA Existing Chemicals Risk Evaluation - Systematic Review	OCSPP-4
Existing Chemicals Registration Review - Ethylene Oxide	OCSPP-22
Animal Testing	OCSPP-26
Biostimulants	OCSPP-28
FIFRA & Endangered Species Act	OCSPP-29
COVID-19 Disinfectants	OCSPP-31

Thanks

Subject: FOR AA REVIEW AND CLEARANCE: Batch #3 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

Please see additional 6 fact sheets for your review and clearance **by noon Tuesday, 4/6**. These have been cleared by Rick and ODs. Please return the files with your edits and comments in track changes.
For those you reviewed last week and over the weekend (thank you!), we've worked with respective offices to incorporated your edits and comments. Rick has reviewed and deemed the revised version do not require your second review. They have been submitted to OCFO.

Included in batch 3 are:

TSCA Existing Chemicals Risk Evaluation - Formaldehyde IRIS Assessment	OCSPP-6
Rule - Application Exclusion Zone	OCSPP-18
Existing Chemicals Registration Review - Glyphosate	OCSPP-19
Existing Chemicals Registration Review - Chlorpyrifos	OCSPP-20
Use Restriction - Oxitec	OCSPP-24
Use Restriction - Seresto Pet Collars, New	OCSPP-25

Thanks

I think we need some further help from OPP on ETO. I had been hoping that the OAR fact sheet might help us address Michal's comments; that turned out not to be the case. Sorry for not getting back to you on that.

OPP needs to look at atrazine.

With the edits I made earlier to that one bullet, I think dicamba is ready to be cleaned up and submitted to OCFO.

Subject: FOR AA REVIEW AND CLEARANCE: Batch #1 - FY22PB Congressional Justification Program Project Narratives

Dear Michal,

Please see attached first 5 program project narratives for your review and clearance by **noon, Monday, 5/3**.

Each narrative is part of a fuller document which includes a Resources table and Performance table (as applicable). Those tables will be merged from OCFO Budget Formulation System (BFS) when the data has been finalized. Due to short turnaround and simultaneous efforts on different budget pieces by all offices across the agency, a complete narrative won't be ready until end of next week, just before the OMB review stage. We've attached an example from FY21PB for your reference (pdf file).

These have been cleared by Rick and ODs. Please return the files with your edits and comments in track changes. The five in Batch #1 are:

- FY22 CJ_09_STAG_Pest Prog Imp_04.30.21_for AA review.docx
- FY22 CJ_10_STAG_Cat Grant_Lead_04.30.21_for AA review.docx
- FY22 CJ_13_STAG_Cat Grant P2_04.30.21_for AA review.docx
- FY22 CJ_C2_EPM_ Science Policy Biotech_04.30.21_for AA review.docx
- FY22 CJ_D7_EPM_Lead Risk Reduction_04.30.21_for AA review.docx

Thank you.

Subject: FOR AA REVIEW AND CLEARANCE: Batch #3 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

Please see additional 6 fact sheets for your review and clearance **by noon Tuesday, 4/6**. These have been cleared by Rick and ODs. Please return the files with your edits and comments in track changes.
For those you reviewed last week and over the weekend (thank you!), we've worked with respective offices to incorporated your edits and comments. Rick has reviewed and deemed the revised version do not require your second review. They have been submitted to OCFO.

Included in batch 3 are:

TSCA Existing Chemicals Risk Evaluation - Formaldehyde IRIS Assessment	OCSPP-6
Rule - Application Exclusion Zone	OCSPP-18
Existing Chemicals Registration Review - Glyphosate	OCSPP-19
Existing Chemicals Registration Review - Chlorpyrifos	OCSPP-20
Use Restriction - Oxitec	OCSPP-24
Use Restriction - Seresto Pet Collars, New	OCSPP-25

Thanks

Subject: FOR AA REVIEW AND CLEARANCE: Batch #1 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

The attached fact sheets are to prepare the Administrator for FY2022 Appropriations Hearings, scheduled as shown below. Once OCSPP submit these to OCFO, they will go through further reviews by OCIR, OCFO and OGC. The prep sessions with the Administrator and AAs are being by OCIR and OCFO.
These fact sheets are the first of several batches that we request your review and clearance **by 3pm, Monday, April 5**. Please return the files with your edits and your comments in track changes.
They have been reviewed and cleared by respective Office Directors and Rick.

Committee	Date
HAC	April 21, 2021 Time TBD
SEPW	April 28, 2021 at 10 AM
HEC	April 29, 2021 Time TBD
SAC	May 12, 2021 Time TBD

The first attachment is a list of fact sheets that you can expect before COB tomorrow. In Batch #1, the following fact sheets are included:

TSCA New Chemicals	OCSPP-1
TSCA Existing Chemicals Risk Evaluation	OCSPP-2
TSCA Existing Chemicals Risk Evaluation - Asbestos	OCSPP-3
TSCA Existing Chemicals Risk Evaluation - Systematic Review	OCSPP-4
TSCA Existing Chemicals Risk Evaluation - Data Gathering, New	OCSPP-5
TSCA Existing Chemicals Risk Management	OCSPP-7

TSCA Existing Chemicals Risk Management - PCBs	OCSPP-8
TSCA Existing Chemicals Risk Management - Methylene Chloride	OCSPP-9
TSCA Existing Chemicals Risk Management - Recent PBT Rules, New	OCSPP-10
TSCA - GAO Audit on Chemicals	OCSPP-12
PFAS - TRI and TSCA	OCSPP-13
Lead Based Paint	OCSPP-15
Pollution Prevention, New	OCSPP-16

Thank you,
Khanh

Subject: Seresto - Midwest Center for Investigative Reporting

Hello,

I'm a reporter with the Midwest Center for Investigative Reporting, a nonprofit newsroom based in Champaign, Illinois, that covers agribusiness. I am working on a story about EPA incident data surrounding Seresto collars. It is my understanding that there have been a significant amount of incidents surrounding the pesticides in the collars, and I had some questions.

According to a records request of EPA documents, there have been at least 75,000 incident reports involving pets, including 1,698 deaths. Is this a high number? Why is it still sold? Is there any sort of threshold for removing the collar from the market?

It is my understanding that these incidents do not include the main incident reporting system, which likely has additional incidents. Do you have more information about the number of incidents?

California toxicologists said the Bayer studies the EPA relied on to approve the collars underestimated the harm to adult dogs and cats. However, the EPA approved them. What science is there to support these registrations? How can customers know that these are safe to use?

There have been at least 907 human-related incidents since 2013, according to EPA data. Is this a high number? Is there any sort of threshold for removing the collar from the market?

It is my understanding that Bayer knew about these incidents for years, prior to selling dog collars to Elanco. Did Bayer make Elanco aware of these issues when selling the product to Elanco?

From my understanding talking with former EPA staff, Health Canada denied to approve Seresto because of the incident data. Do you have any response to this?

If possible, I would very much like to speak to someone for this story. Please let me know if you would have some time. My deadline is Friday, end-of-day.

Thanks,
Johnathan Hettinger

Michal,

Attached for your review are a redline and clean version of EPA's draft response to the House Oversight letter on Seresto collars (incoming letter also attached). OCIR notes that it is longstanding EPA practice to address oversight requests with a narrative response instead of a Q/A approach, and that this is an appropriate level of responsiveness for a first response—we can work with the Committee after getting this letter and production out to meet their needs.

I made two changes post-OPP clearance, both in response to comments by Dian Overby which you can see in the redline version. I'm running those two changes by OPP concurrent with your review.

OCIR also plans to provide aggregate summary incident reports. The reports are being compiled and you can view them in SharePoint at https://usepa-

my.sharepoint.com/:f:/g/personal/knapp_kristien_epa_gov/EhejWpBRjMpBs00fHjfwyPsB0-bwwk7i8FD4MWhLOwl4ww?e=rbhp9P Note that OCIR plans to consolidate these into a handful of PDFs.

Please let me know if this looks okay to you, and if you have any questions or comments.

Thank you,
Jonah

I know we are under a very short deadline to get these done. It looks like Michal didn't have any comments on the glyphosate and Oxitec fact sheets, so those can go to OCFO.

For formaldehyde, we will need help primarily from OPPT, so I've cc: Yvette and Mark.

For AEZ and Chlorpyrifos, I've offered some suggestions to try to address Michal's feedback, but these will need input from OPP.

For Seresto, I've offered a minor change that I think will address Michal's comment.

Subject: FOR AA REVIEW AND CLEARANCE: Batch #1 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

The attached fact sheets are to prepare the Administrator for FY2022 Appropriations Hearings, scheduled as shown below. Once OCSPP submit these to OCFO, they will go through further reviews by OCIR, OCFO and OGC. The prep sessions with the Administrator and AAs are being by OCIR and OCFO.
These fact sheets are the first of several batches that we request your review and clearance **by 3pm, Monday, April 5**. Please return the files with your edits and your comments in track changes.
They have been reviewed and cleared by respective Office Directors and Rick.

The first attachment is a list of fact sheets that you can expect before COB tomorrow. In Batch #1, the following fact sheets are included:

TSCA New Chemicals	OCSPP-1
TSCA Existing Chemicals Risk Evaluation	OCSPP-2
TSCA Existing Chemicals Risk Evaluation - Asbestos	OCSPP-3
TSCA Existing Chemicals Risk Evaluation - Systematic Review	OCSPP-4
TSCA Existing Chemicals Risk Evaluation - Data Gathering, New	OCSPP-5
TSCA Existing Chemicals Risk Management	OCSPP-7
TSCA Existing Chemicals Risk Management - PCBs	OCSPP-8
TSCA Existing Chemicals Risk Management - Methylene Chloride	OCSPP-9
TSCA Existing Chemicals Risk Management - Recent PBT Rules, New	OCSPP-10
TSCA - GAO Audit on Chemicals	OCSPP-12
PFAS - TRI and TSCA	OCSPP-13
Lead Based Paint	OCSPP-15
Pollution Prevention, New	OCSPP-16

Thank you,
Khanh

Those both work for me. Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

Sent from my iPhone

On Apr 8, 2021, at 12:49 PM, Keigwin, Richard <Keigwin.Richard@epa.gov> wrote:

Looking at your comments, are you okay with something along the lines of the following?

Atrazine
OGC (and apparently DOJ) are concerned about Ex. 5 AC/DP
Ex. 5 AC/DP Perhaps rather than saying

- "EPA issued its registration review Interim Decision for atrazine in September 2020, and EPA is Ex. 5 Deliberative Process (DP) in accordance with President Biden's Executive Orders and other direction to reexamine decisions made in the last Administration." (emphasis added)

To read (I've floated this approach with OGC and they were fine with this path):

- "EPA issued its registration review Interim Decision for atrazine in September 2020, and EPA is **determining our next steps in the registration review** in accordance with President Biden's Executive Orders and other direction to reexamine decisions made in the last Administration."

ETO
Regarding the bullets Ex. 5 Deliberative Process (DP), I think what the team was trying to say was what we did then, not where we are landing. What if we replaced the cullet that currently says:

- Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

With the following:

- In moving to risk mitigation, the Agency will rely on the best scientific data coupled with a consideration of the benefits of sterilizing medical devices and the availability of alternatives, consistent with the requirements under FIFRA.

Based upon an exchange of emails with Michal, the attached are ready to be cleaned up and sent to OCFO. In the atrazine fact sheet, we changed some language to address OGC's litigation concern. In the ETO fact sheet, we replaced the bullet that Michal flagged with new language that is consistent with our path forward.

Subject: FOR AA REVIEW AND CLEARANCE: Batch #2 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

Please see additional 4 fact sheets for your review and clearance by 3pm, Monday, April 5. Please return these files with your edits and comments in track changes.
We're taking your feedback from yesterday and applying to the remaining 15 fact sheets. They will not be ready for your review until Monday.

Included in batch 2 are:

TSCA Fee Rule	OCSPP-11
TRI Program	OCSPP-17
Biotech/Plant Incorporated Protectants	OCSPP-27
Pollinators	OCSPP-30

Thank you and hope you'll have a nice weekend.
Khanh

Subject: FOR AA REVIEW AND CLEARANCE: Batch #1 - FY22 Appropriations Hearing Fact Sheets

Dear Michal,

The attached fact sheets are to prepare the Administrator for FY2022 Appropriations Hearings, scheduled as shown below. Once OCSPP submit these to OCFO, they will go through further reviews by OCIR, OCFO and OGC. The prep sessions with the Administrator and AAs are being by OCIR and OCFO.
These fact sheets are the first of several batches that we request your review and clearance **by 3pm, Monday, April 5**. Please return the files with your edits and your comments in track changes.
They have been reviewed and cleared by respective Office Directors and Rick.

Committee	Date
HAC	April 21, 2021 Time TBD
SEPW	April 28, 2021 at 10 AM
HEC	April 29, 2021 Time TBD
SAC	May 12, 2021 Time TBD

The first attachment is a list of fact sheets that you can expect before COB tomorrow. In Batch #1, the following fact sheets are included:

TSCA New Chemicals	OCSPP-1
TSCA Existing Chemicals Risk Evaluation	OCSPP-2
TSCA Existing Chemicals Risk Evaluation - Asbestos	OCSPP-3
TSCA Existing Chemicals Risk Evaluation - Systematic Review	OCSPP-4
TSCA Existing Chemicals Risk Evaluation - Data Gathering, New	OCSPP-5
TSCA Existing Chemicals Risk Management	OCSPP-7
TSCA Existing Chemicals Risk Management - PCBs	OCSPP-8
TSCA Existing Chemicals Risk Management - Methylene Chloride	OCSPP-9
TSCA Existing Chemicals Risk Management - Recent PBT Rules, New	OCSPP-10
TSCA - GAO Audit on Chemicals	OCSPP-12
PFAS - TRI and TSCA	OCSPP-13
Lead Based Paint	OCSPP-15
Pollution Prevention, New	OCSPP-16

Thank you,
Khanh

Michal,

I'd like to add to my note below that OCIR's preferred approach with the aggregate summaries is:

1) (now) submit aggregate PDF summaries with an explanatory note
2) (later, or on request) submit more detailed individual reports with an explanatory note and an index of some sort – file type and media to be determined

Thanks,
Jonah

Subject: For Review: Draft response to Krishnamoorthi letter on Seresto Collars

Michal,

Attached for your review are a redline and clean version of EPA's draft response to the House Oversight letter on Seresto collars (incoming letter also attached). OCIR notes that it is longstanding EPA practice to address oversight requests with a narrative response instead of a Q/A approach, and that this is an appropriate level of responsiveness for a first response—we can work with the Committee after getting this letter and production out to meet their needs.

I made two changes post-OPP clearance, both in response to comments by Dian Overby which you can see in the redline version. I'm running those two changes by OPP concurrent with your review.

OCIR also plans to provide aggregate summary incident reports. The reports are being compiled and you can view them in SharePoint at https://usepa-my.sharepoint.com/:f:/g/personal/knapp_kristien_epa_gov/EheJWpBRjMpBs00fHjfwyPsB0-bwwk7i8FD4MWhLOwI4ww?e=rbhp9P Note that OCIR plans to consolidate these into a handful of PDFs.

Please let me know if this looks okay to you, and if you have any questions or comments.

Thank you,
Jonah

Subject: Seresto Flea and Tick Collar

Good day,

We would like to file an official complaint regarding Seresto Flea and Tick collars. We purchased an appropriately sized Seresto collar for our dog in November 2020 and within a few weeks, he began having seizures. He has continued having them, even though the collar was removed. They have been increasing in severity and frequency. He is an AKC registered Irish Setter with no family history of seizures. He did not have seizures at any time prior to wearing the collar. We are deeply saddened by these events and further disturbed upon finding through internet research that it was suggested Seresto recall a number of collars, but they have refused to do so. We would like to initiate and pursue the complaint process to the fullest extent possible. We would further like your organization's support in pursuing a recall so this type of tragedy does not befall any other dogs and their families.

Thank you for your consideration.

Subject: Seresto Collars

I am writing to you to report what I believe are serious issues with Seresto Flea collars. Last week, my 7 year old Australian Shepherd Zack, passed away due to liver cancer that had gone metastatic and spread. He previously had no serious health issues, and was only diagnosed shortly before he passed. He had worn Seresto collars since we adopted him 5 years ago. I believe the chemicals in the collar are the cause of his cancer. I believe this because last year my 10 year old Portuguese Water Dog developed a mass in her front leg, that was determined to be a cancerous tumor. After surgery to remove the tumor and radiation treatment, she is doing well. The surgeon told us the mass was the size of three golf balls. She too had been wearing the Seresto collar for the last several years. The odds of two different breeds of dogs developing cancer in the same household within a year of each other would seem to be small. But the collar was the common link, each had worn them, and each became ill. I have been a dog owner for 25 years, and never had a dog develop cancer, much less two within a year. Please pull these off the market, do the right thing. They are causing suffering and death beyond belief. If there is anything I need to do in addition to register a official report, please contact me.
Sincerely,
Ex. 6 Personal Privacy (PP)

We bought the seresto collar March 18 (receipt we have) put it on our dog who was healthy and no issues A few days after April 2/3 dog drops to the ground in a full blown seizure and unable to move.. rush to vet .. nothing mentioned about collar (but thinking back realized that as soon as he collar was put in our dog started acting differently... but they put our dog on seizure meds... has second seizure around May 10 . Collar still on... no one says anything about the collar.. we have several break thru seizure thru Aug and they raise her meds... collar still on... finally husband takes off collar in sept/oct and we have not had once since.. March report comes out and realized then that was the cause of our dogs seizures as she has not had one since removing it...we still have the collar if you want to test it and see the level still in it to cause a dog to have seizures Thank you for your time..
