What do you think we should do with this email? I wonder if see ever was going to put together a poster? I don't want to give her a slot unless we really have a hole. We could also tell her we will give her the first talk on Friday.

Bill

Dear Dr. Goodfellow and Dr. Greenberg,

I submitted an abstract to this meeting and was assigned a poster presentation. I do not have the time to prepare a poster but I do have an oral presentation if a slot opens up.

"Aftermath of the Gulf Oil Spill: A Marine Toxicologist's Perspective"

This is a plenary talk that I gave at the Gulf Coast Leadership Summit April 20 based on my work as part of the DOI's Strategic Science Working Group on the spill and my own research. I would be willing to shorten it. My bio is attached.

Thanks for your consideration, and please advise.

Subject: Gulf Oil Spill Assessment and Research Recommendations

Dear Susan,

Its not too late to sign up for the SETAC Gulf Oil Spill Focused Topic Meeting (Pensacola Beach, Florida, 26-28 April 2011)! We have put together a comprehensive program of platform and poster presentations and moderated panel discussions that offer substantial value to attendees. We believe this meeting will help us to better understand the environmental and community impacts of the April 2010 explosion of the Deepwater Horizon well rig, to better engineer solutions that prevent such situations, and to better present complex data to the public. We have assembled experts like you to facilitate the collection of available information in a format that allows open discussion and debate and to develop science-based recommendations for improving oil spill response and tracking, control techniques, management, effects assessment, and communication. Register now at (http://gulfoilspill.setac.org/node/22).
