75 Hawthorne Street, San Francisco, CA 94105,

Dear Nancy,

As a 5 year Resident of the Town of Florence i.e. Merrill Ranch, my Spouse & I remain apposed to the test Project by Florence Copper based on the likelihood of the mine polluting our drinking water supply when sulfuric acid is injected directly into a large water aquifer that is used to provide water to ourselves and our Neighbors, and which is critical to our future health and future values of our homes.
Please influence the rejection of the permit that will allow Florence Copper to initiate this test project and future projects of similar nature.

Thankyou so much for your cooperation in advance,

Guy & Ingrid Chetcuti
