Michael – The air and soil data tables for TRW Microwave are attached. Please note that the older air data (prior to 2013) is not currently in our central database system.

Michael – A groundwater extract table from our central database is attached. It contains the raw data on the first sheet ("output" tab) and a formatted cross tab report on the second sheet ("xtab" tab). In reviewing our database, some of the older air and soil gas data was not uploaded, so I am working on getting that pulled together and imported before I send that on to you. Also, working on the soil data extract as well which I will send separately.

Hi Kurt,

Thank you for the Annual GWM Report. Do you have current to historical groundwater monitoring results electronically that you can email me in an flat Excel table? As well, is there a source where GWM concentration trends were graphed?

Separately, if you have past soil and VI related sampling results electronically, can you email me that data electronically as well?

Thank you again,
Michael
